New 1z0-1046-25 Test Cost Authoritative Questions Pool Only at CertkingdomPDF

Choosing our 1z0-1046-25 learning guide is not only an enrichment of learning content, but also an opportunity to improve our own discovery space. Our 1z0-1046-25 study dumps could bring huge impact to your personal development, because in the process of we are looking for a job, hold a certificate you have more advantage than your competitors, the company will be a greater probability of you. After using our 1z0-1046-25 Study Dumps, users can devote more time and energy to focus on their major and makes themselves more and more prominent in the professional field. Therefore, our 1z0-1046-25 exam materials can help you achieve multiple returns in the future, provide you with more opportunities to pursue higher life goals, and create a higher quality of life.

Oracle Global Human Resources Cloud 2025 Implementation Professional Sample Questions (Q83-Q88):

NEW QUESTION # 83

Challenge 1

Manage Legal Addresses

Scenario

An organization has just acquired a company, that manufactures spring hinges for spectacles in Michigan.

You need to create a legal address for this company.

Task Create a legal address for the legal entity using the following details.

900 Main st, Dearborn Heights, Wayne, Michigan 48127.

Answer:

Explanation:

See the solution in Explanation below.

This task requires creating a legal address for a legal entity in Oracle Global Human Resources Cloud using the Manage Legal Addresses task. The address provided is 900 Main St, Dearborn Heights, Wayne, Michigan 48127, for a company recently acquired by the organization. Below is a verified, step-by-step solution based on Oracle's official documentation, ensuring accuracy and compliance with the system's functionality as of the latest releases Step-by-Step Solution Step 1: Log in to Oracle Fusion Applications

* Action: Log in to Oracle Fusion Applications using a user account with privileges such as Application Implementation Consultant or HCM Application Administrator. These roles grant access to the Setup and Maintenance work area.

* Explanation: The Setup and Maintenance work area is the central hub for configuration tasks, including managing legal addresses. The user must have permissions to access the Workforce Structures functional area and the Manage Legal Addresses task. Roles like Application Implementation Consultant include the necessary privileges (e.g., Manage Legal Address duty role).

* Verification: Oracle documentation specifies that setup tasks require specific security roles, and the Manage Legal Addresses task is restricted to authorized users.

Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Security for Setup Tasks.

Step 2: Navigate to Setup and Maintenance

Action:

From the Oracle Fusion Applications home page, click the Navigator icon (hamburger menu) in the top-left corner.

Under the Tools section, select Setup and Maintenance.

Explanation: The Setup and Maintenance work area provides access to all implementation and configuration tasks, organized by functional areas. This is the entry point for accessing the Manage Legal Addresses task.

Verification: Oracle's user interface consistently places Setup and Maintenance under the Navigator's Tools section, as confirmed in the Redwood and responsive interfaces.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Setup and Maintenance Overview.

Step 3: Select the Workforce Structures Functional Area and Locate the Task Action:

In the Setup and Maintenance work area, click the Functional Area dropdown and select Workforce Structures.

In the task list, locate Manage Legal Addresses by scrolling or using the search bar (type "Manage Legal Addresses").

Click the Go to Task icon (typically a play button or arrow) next to Manage Legal Addresses to open the task.

Explanation: The Workforce Structures functional area includes tasks related to organizations, positions, and addresses. The Manage Legal Addresses task is specifically designed to create and manage addresses for legal entities. Using the search bar ensures quick access if the task list is extensive.

Verification: Oracle documentation lists Manage Legal Addresses under Workforce Structures, and the task is accessible via the Setup and Maintenance UI in both Redwood and responsive interfaces.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Manage Legal Addresses.

Step 4: Initiate Creation of a New Legal Address

Action:

On the Manage Legal Addresses page, click the Create button (typically a plus sign (+) or labeled "Create" in the Redwood interface).

This opens the Create Legal Address page for entering address details.

Explanation: The Manage Legal Addresses page displays a searchable list of existing addresses. The Create action starts the process of adding a new address, opening a form where address components can be entered.

Verification: Oracle's UI for managing addresses includes a Create button, as confirmed in documentation and Redwood interface updates (24C and later).

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Creating Legal Addresses.

Step 5: Enter the Address Details

Action: On the Create Legal Address page, enter the following details as provided in the scenario:

Country: Select United States from the dropdown list.

Address Line 1: Enter 900 Main St.

Address Line 2: Leave blank (not provided in the scenario).

Address Line 3: Leave blank (not provided in the scenario).

City: Enter Dearborn Heights.

County: Enter or select Wayne (if a dropdown is available, choose Wayne County; otherwise, type "Wayne").

State: Select Michigan from the dropdown list.

Postal Code: Enter 48127.

Address Type: Ensure Legal is selected or check the box for legal address usage (may appear as Address Purpose or Usage in some configurations).

Effective Start Date: Enter 04/15/2025 (current date, unless the acquisition date is specified; adjust if a specific date is required).

Validate Address: Click the Validate button (if available) to verify the address format and accuracy using Oracle's address validation service.

Explanation:

Country, City, State, Postal Code: These are mandatory fields for US addresses, and the values must match the scenario exactly.

Address Line 1: "900 Main St" is the primary address component.

County: Wayne is the county for Dearborn Heights, Michigan, and should be included for accuracy, as it is part of the provided address.

Address Type/Purpose: The address must be designated as a Legal address to meet the scenario's requirement for a legal entity. This may be a checkbox or dropdown, depending on the UI.

Effective Start Date: Oracle uses effective dating for addresses to track validity periods. The current date (04/15/2025) is appropriate unless the acquisition date is specified.

Validation: Oracle's address validation (via third-party services like Loqate or internal rules) ensures the address is correct and formatted properly. If validation fails, manually confirm the details, as "900 Main St, Dearborn Heights, MI 48127" is a valid US address.

Verification: Oracle documentation specifies mandatory fields for US addresses and the availability of validation in the Manage Legal Addresses task. The address format aligns with US standards, and Wayne County is correctly associated with Dearborn Heights.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Address Fields and Validation.

Step 6: Save the Legal Address

Action:

After entering and validating the address, click Save and Close (or Save if additional actions are needed).

If prompted, confirm the creation of the address.

Explanation: Saving the address creates a record in the system, making it available for association with a legal entity. The Save and Close button finalizes the task, while Save allows further edits if needed. Oracle validates mandatory fields before saving.

Verification: Oracle's UI includes Save and Save and Close options for address creation, as confirmed in documentation for both responsive and Redwood interfaces.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Saving Legal Addresses.

Step 7: Verify the Address Creation

Action:

Return to the Manage Legal Addresses page.

In the search criteria, enter 900 Main St or Dearborn Heights and click Search.

Confirm that the new address appears with the details:

Address: 900 Main St, Dearborn Heights, Wayne, Michigan 48127

Country: United States

Effective Start Date: 04/15/2025

Address Type: Legal

Explanation: Verification ensures the address was created correctly and is available for use. Searching by address components confirms the record's accuracy and checks for errors in data entry or validation.

Verification: Oracle documentation emphasizes verifying setup tasks by searching created records, and the Manage Legal Addresses page supports address searches.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Searching Legal Addresses.

Step 8: Associate the Address with a Legal Entity (Conditional)

Action:

If the scenario implies linking the address to a legal entity (as it states "for the legal entity"), navigate to the Manage Legal Entity task in the Workforce Structures functional area.

Search for the legal entity representing the acquired company (e.g., by name or identifier). If it does not exist, create a new legal entity using the Create action, providing details like name, jurisdiction (United States, Michigan), and type.

In the legal entity's details, go to the Address section and select the newly created address (900 Main St, Dearborn Heights, Wayne, Michigan 48127).

Set the address as the Primary Legal Address if required.

Save the changes to the legal entity.

Explanation: While the scenario focuses on creating the address, Oracle best practices require associating a legal address with a legal entity for compliance, reporting, and operational use (e.g., tax filings). The Manage Legal Entity task allows linking the address to the

entity. If the legal entity is not yet created, additional steps to create it are needed, but the scenario assumes the entity exists or will be set up separately. This step is conditional, as the task explicitly asks for address creation, but it ensures the address serves its intended purpose.

Verification: Oracle documentation confirms that legal addresses must be linked to legal entities via the Manage Legal Entity task, and the UI supports address selection.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Associating Addresses with Legal Entities.

Detailed Explanation

Purpose of Legal Addresses: Legal addresses are critical for legal entities, used for regulatory compliance (e.g., tax reporting, legal filings) and operational purposes. The address 900 Main St, Dearborn Heights, Wayne, Michigan 48127 must be accurately recorded to represent the acquired company's location.

Address Validation: Oracle integrates with third-party services (e.g., Loqate) or uses internal rules to validate US addresses, ensuring fields like City, State, and Postal Code align. The provided address is valid, with Wayne as the county, which enhances accuracy.

Effective Dating: Legal addresses are effective-dated to track changes over time. The effective start date (e.g., 04/15/2025) ensures the address is active from the specified date, supporting historical tracking if the address changes later.

Redwood Interface: In the Redwood interface (available in 24C and later), the Manage Legal Addresses page may feature enhanced UI elements (e.g., inline validation, improved search), but the core steps remain identical to the responsive interface.

Security Considerations: Only users with roles granting the Manage Legal Address privilege can perform this task. If access is denied, an administrator must assign the appropriate role.

Key Considerations

Accuracy: The address must be entered exactly as provided (900 Main St, Dearborn Heights, Wayne, Michigan 48127) to avoid validation errors. Typos or missing components (e.g., omitting Wayne County) could cause issues.

Validation Handling: If validation fails (e.g., due to service issues), manually confirm the address details, as the provided address is correct per US standards.

Legal Entity Association: While not explicitly required by the task, linking the address to a legal entity completes the setup. If the legal entity is undefined, coordinate with the implementation team to create it.

Audit Trail: Address creation generates an audit record, traceable via Audit Reports for compliance.

Time Zone: The address may prompt for a time zone (e.g., Eastern Time for Michigan). If required, select America/Detroit.

Potential Challenges and Solutions

Access Denied: If the user lacks the Manage Legal Address privilege, an error occurs. Solution: Assign the Application Implementation Consultant role or equivalent via Security Console.

Validation Failure: If the address validation service is unavailable or rejects the address, an error may appear. Solution: Verify the address manually (it is valid) and proceed, or contact Oracle Support if persistent.

Existing Address: If 900 Main St already exists, the system may prevent duplicate creation. Solution:

Search for the address first; if it exists, associate it with the legal entity instead of creating a new one.

Redwood UI Variations: The Redwood interface may rename buttons (e.g., Create as Add) or reorganize fields. Solution: Follow the field labels and ensure all required fields are populated.

NEW QUESTION # 84

When creating your THEN condition, which Approver Types enable you to configure the Automatic Approval Action type?

- A. Users, Representative, Management Hierarchy, Job Level Based Line Manager Hierarchy, Position Hierarchy
- B. Approval Groups, Representative, Management Hierarchy, Position Hierarchy

- C. Application Role, Users, Representative, Approval Groups
- D. Management Hierarchy, Job Level Based Line Manager Hierarchy, Position Hierarchy
- E. Representative, Management Hierarchy, Position Hierarchy

Answer: B

Explanation:

In Oracle HCM Cloud's Transaction Console, approval rules are defined with "IF" and "THEN" conditions.

The "THEN" condition specifies the action, such as "Automatic Approval," and the approver type determines who or what approves the transaction. The Automatic Approval Action type allows a transaction to be approved without human intervention based on predefined rules. According to Oracle documentation, the approver types that support configuring Automatic Approval include Approval Groups (static or dynamic groups of approvers), Representative (e.g., HR or Payroll Representative), Management Hierarchy (based on supervisor hierarchy), and Position Hierarchy (based on position structure). These types can be configured to automatically approve under specific conditions.

Option A omits Approval Groups, which is a valid type for automatic approval. Option B includes "Users" and "Job Level Based Line Manager Hierarchy," but "Users" (individual named users) and "Job Level" are not typically used for automatic approval—they are more suited for manual routing. Option C includes

"Application Role," which is used for role-based access, not automatic approval in workflows. Option D misses Approval Groups and Representative, both critical for this feature. Option E correctly lists Approval Groups, Representative, Management Hierarchy, and Position Hierarchy, aligning with Oracle's supported approver types for automatic approval.

NEW QUESTION # 85

You have a business requirement to default the Business Title of a worker when a user updates a worker's assignment by using one of the worker employment responsive flows. How can you enable this feature and which options are available for defaulting?

- A. Enable the ORA_PER_EMPL_DEFAULT_BUSINESS_TITLE_FROM profile option, and select Retain User Changes, Automatically Update Based on Job Change, Automatically Update Based on Position Change, or Allow Override if Position Data is Overridden.
- B. Enable the Default Business Title field on the Enterprise HCM Information task, and select Retain User Changes, Automatically Update Based on Job Change, or Automatically Update Based on Position Change.
- **C. Enable the ORA_PER_EMPL_DEFAULT_BUSINESS_TITLE_FROM profile option, and select Retain User Changes, Automatically Update Based on Job Change, or Automatically Update Based on Position Change.**
- D. Enable the Default Business Title field on the Legal Entity HCM Information task, and select Retain User Changes, Automatically Update Based on Position Change, or Allow Override if Position Data is Overridden.

Answer: C

Explanation:

Full Detailed in Depth Explanation:

Defaulting the Business Title in Oracle HCM Cloud during assignment updates is controlled by a profile option, not HCM Information tasks.

Option D ("Enable the ORA_PER_EMPL_DEFAULT_BUSINESS_TITLE_FROM profile option, and select Retain User Changes, Automatically Update Based on Job Change, or Automatically Update Based on Position Change") is correct. The profile option

"ORA_PER_EMPL_DEFAULT_BUSINESS_TITLE_FROM" determines how the Business Title is populated in responsive flows (e.g., Change Assignment). Available settings are:

Retain User Changes: Keeps manual edits.

Automatically Update Based on Job Change: Updates from the job title.

Automatically Update Based on Position Change: Updates from the position title. This is detailed in the "Implementing Global Human Resources" guide under profile options.

Option A and B reference HCM Information tasks, which don't control this feature.

Option C adds "Allow Override if Position Data is Overridden," which is not a valid setting for this profile option.

References:

"Oracle Global Human Resources Cloud: Implementing Global Human Resources" - Profile options for employment flows.

NEW QUESTION # 86

In which two ways can you add rates to a grade?

- A. Use the default grade rates that are available after creating grades.
- B. First add the rates for each step, and then add the grade to a grade ladder.
- C. Add the rates separately by using the Manage Grade Rates task.
- D. Add rates when creating grades by using the Manage Grades task.

Answer: C,D

Explanation:

In Oracle Global Human Resources Cloud, grades define levels within a job or position structure, and grade rates specify the pay ranges or values associated with those grades. The question asks for two ways to add rates to a grade. Oracle provides multiple methods to configure grade rates, either during grade creation or as a separate task, to support flexibility in compensation management.

* Option A: First add the rates for each step, and then add the grade to a grade ladder. This option is incorrect because Oracle does not require rates to be added for each step before associating a grade with a grade ladder. In Oracle HCM Cloud, grades can exist independently or within a grade ladder, and rates are associated with grades, not steps, unless using a grade ladder with steps (a specific configuration). Even in such cases, rates are defined at the grade level or step level within the ladder, and the process does not mandate adding rates first. Grade ladders with steps involve defining step rates after the grade is included in the ladder, not before. Oracle documentation does not support this sequence as a standard method for adding rates to a grade, making this option invalid.

* Option B: Add the rates separately by using the Manage Grade Rates task. This is a correct answer.

The Manage Grade Rates task in the Setup and Maintenance work area allows users to define grade rates independently of grade creation. This task enables the creation of rate values (e.g., minimum, midpoint, maximum salaries, or hourly rates) and associates them with existing grades. For example, after creating a grade called "Grade 1," you can use Manage Grade Rates to add a salary range (e.g.,

\$50,000-\$70,000) for that grade. This method is useful when rates need to be updated or added post- grade creation, offering flexibility for compensation adjustments. Oracle documentation confirms this as a standard approach for managing grade rates.

* Option C: Use the default grade rates that are available after creating grades. This option is incorrect because Oracle HCM Cloud does not automatically provide default grade rates upon grade creation. When a grade is created via the Manage Grades task, no default rates are assigned unless explicitly configured by the user. While sample data or predefined setups in some environments might include rates, Oracle's standard functionality requires users to define rates manually, either during grade creation or separately via Manage Grade Rates. The absence of automatic default rates in the documentation rules out this option.

* Option D: Add rates when creating grades by using the Manage Grades task. This is a correct answer. The Manage Grades task allows users to create grades and define associated grade rates within the same process. When creating or editing a grade in the Manage Grades task, you can navigate to the Rates tab (or equivalent section) to specify rate values, such as minimum, midpoint, and maximum salaries or hourly rates. For instance, while creating "Grade 2," you can add a rate range of \$60,000-\$80,000 directly. This method streamlines grade setup by combining grade and rate definition, and Oracle documentation supports this as a primary way to add rates.

* Why these two methods? Both Manage Grade Rates (Option B) and Manage Grades (Option D) are explicit methods supported by Oracle HCM Cloud for adding rates to grades. Manage Grades allows rates to be defined during grade creation or editing, ideal for initial setup, while Manage Grade Rates provides a standalone task for adding or updating rates later, offering flexibility for ongoing maintenance. These methods align with the customer's need to associate pay ranges or values with grades, ensuring compliance with compensation structures.

NEW QUESTION # 87

As an implementation consultant, you are in the process of setting up geographies in the application. Which three statements are true

about defining geographies?

- A. You can only modify all levels of the geography structure before you load geography hierarchy.
- B. You must identify the top-level of geography as Country and define a geography type.
- C. You must map geography to reporting establishments for reporting purposes.
- D. You must set geography validation for the specific address style for a country.

Answer: A,B,D

Explanation:

Geographies in Oracle Global Human Resources Cloud are set up via the "Manage Geographies" task to define address hierarchies (e.g., country, state, city) for location and reporting purposes.

Option A: Correct. The geography structure (levels like country, province) can only be modified before loading the hierarchy data; post-load changes are restricted to maintain data integrity.

Option B: Incorrect. Mapping geographies to reporting establishments is not mandatory; it's an optional configuration for specific reporting needs.

Option C: Correct. The top level must be defined as "Country," and each level requires a geography type (e.g., State, City) to structure the hierarchy.

Option D: Correct. Geography validation must be enabled for a country's address style (e.g., US vs. UK format) to ensure accurate address entry, set via Manage Geographies.

The correct answers are A, C, and D, per "Implementing Global Human Resources" on geography setup.

References: Oracle Global Human Resources Cloud - Implementing Global Human Resources, Chapter 2: Enterprise Structures, Geographies.

NEW QUESTION # 88

.....

It is quite clear that let the facts speak for themselves is more convincing than any word, therefore, we have prepared free demo in this website for our customers to have a taste of the 1z0-1046-25 test torrent compiled by our company. You will understand the reason why we are so confident to say that the 1z0-1046-25 exam torrent compiled by our company is the top-notch 1z0-1046-25 Exam Torrent for you to prepare for the exam. Just like the old saying goes: "Facts are stronger than arguments." You can choose to download our free demo at any time as you like, you are always welcome to have a try, and we trust that our 1z0-1046-25 exam materials will never let you down.
