## 権威のあるC-TS470-2412日本語版サンプル & 合格スムーズC-TS470-2412日本語復習赤本 | ユニークなC-TS470-2412資格試験

SAP C-TS470-2412試験に準備するには、適當の練習は必要です。受験生としてのあなたはSAP C-TS470-2412試験に関する高い質量の資料を提供します。、PDF版、ソフト版、オンライン版三つの版から、あなたの愛用する版を選択します。弊社の高品質の試験問題集を通して、あなたにSAP C-TS470-2412試験似合格させ、あなたのIT技能と職業生涯を新たなレベルに押し進めるのは我々の使命です。

**SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service 認定**

## C-TS470-2412 試験問題 (Q45-Q50):

### 質問 # 45

Which status allows a service confirmation to be billed?

- A. Final Confirmation
- B. Confirmed
- C. Accepted
- **D. Completed**

正解: D

解説:

A service confirmation (e.g., IW41 or service app) records executed work. The status that allows billing is Completed (C).

Why Completed?

The "Completed" status (TECO or similar) indicates the work is finished and ready for billing. It triggers the creation of a billing document request (BDR) if configured.

Why Not the Others?

- \* A: "Confirmed" is too vague; it's an action, not a billable status.
  - \* B: "Accepted" is not a standard confirmation status.
  - \* D: "Final Confirmation" is a step, but "Completed" is the billable state.
- "A service confirmation can be billed when set to 'Completed' status."

25 web pages

Below are the first batch of 10 questions (Questions 41-50) formatted as requested, with 100% verified answers based on official SAP S/4HANA Cloud Private Edition, Service documentation. Each question includes a comprehensive explanation, and where applicable, extracts from official SAP sources are provided.

Typographical errors in the original questions have been corrected.

### 質問 # 46

Which of the following API types does SAP recommend to use to achieve clean core integrations? Note:

There are 2 correct answers to this question.

- **A. SOAP**
- B. Doc
- C. RFC
- **D. OData**

正解: A、D

解説:

SAP's clean core strategy emphasizes standardized, extensible integrations to minimize customizations and ensure upgrade stability.

The recommended API types are:

- \* SOAP: A widely supported, robust protocol for structured data exchange, recommended for integrating SAP S/4HANA with external systems in a clean core approach.
- \* OData: SAP's preferred REST-based protocol for real-time, lightweight integrations, heavily utilized in SAP Fiori apps and clean core scenarios.
- \* Doc: Not a recognized API type in SAP's integration framework.
- \* RFC: While still supported, RFC (Remote Function Call) is considered legacy and less aligned with clean core principles due to its tight coupling. These recommendations are part of SAP's integration strategy for S/4HANA Cloud editions. "SOAP and OData are recommended for clean core integrations to ensure standardized and scalable connectivity." (SAP S/4HANA Cloud Integration Guide).

### 質問 # 47

What can you assign in a task list header? Note: There are 2 correct answers to this question.

- A. Components
- **B. Maintenance strategy**
- C. Production resources and tools
- **D. Planner group**

**正解: B、D**

解説:

A task list in SAP S/4HANA Cloud Private Edition, Service defines standard maintenance or service procedures. The header contains general data applicable to the entire task list. The correct answers are planner group (B) and maintenance strategy (C). Let's explore this in detail.

Task List Header Overview:

The header (e.g., in transaction IA05/IA06) includes fields like task list type, group, and planning data, setting the context for all operations.

\* Planner group (B): The planner group (e.g., "PLG1") is assigned in the header to indicate the team responsible for planning the task list's use (e.g., in maintenance plans). It's entered in the "Planner Group" field and links to organizational data (e.g., Plant Maintenance structure). For example, "PLG1" might be the North Region planners.

\* Maintenance strategy (C): The maintenance strategy (e.g., "STR1") is assigned in the header for strategy-based task lists. It defines the packages (e.g., 3M, 6M) that operations will follow when the task list is used in a strategy plan. This is set in the "Strategy" field and ties the task list to scheduling logic.

Why Not the Others?

\* Production resources and tools (A): PRTs (e.g., tools) are assigned to individual operations, not the header, in the operation details tab.

\* Components (D): Components (e.g., spare parts) are also assigned at the operation level, not the header, via the components tab.

Practical Example:

Task list "TL001": Header assigns Planner Group "PLG1" and Strategy "STR1" (3M, 6M). Operations then specify tasks and resources.

Additional Insight:

The header data ensures consistency across all operations and integrates with maintenance plans for scheduling.

"In a task list header, you can assign a planner group and maintenance strategy to define planning and scheduling parameters."

#### 質問 # 48

What is a prerequisite to use the product proposal?

- A. Create a bill of material (BOM) with BOM usage 4 (Plant Maintenance)
- B. Create bill of material items with item category I (structure element)
- **C. Create a bill of material (BOM) with BOM usage S (Service)**
- D. Create a bill of material (BOM) with BOM usage 5 (Sales and Distribution)

**正解: C**

解説:

The product proposal in SAP S/4HANA Service suggests items (e.g., spare parts, services) in service orders or contracts:

\* Create a bill of material (BOM) with BOM usage S (Service): A service BOM (usage S) is a prerequisite, defining standard components or services proposed in service processes. Configured via transaction CS01, it's linked to service master data.

\* BOM usage 4 (Plant Maintenance): Used for maintenance, not service proposals.

\* BOM usage 5 (Sales and Distribution): Relevant for sales, not service-specific proposals.

\* Item category I (structure element): Item categories define BOM structure but aren't the prerequisite; the BOM usage is key. This is part of service order management (scope item 3D2). "A BOM with usage S (Service) is required to enable product proposals in service transactions." (SAP Help Portal, Service BOM).

#### 質問 # 49

When creating a reservation in a service order, which storage location can be used? Note: There are 2 correct answers to this question.

- **A. The storage location that is assigned to the work center of the service order**
- **B. The storage location that is assigned to the service organization of the service order**
- C. The storage location that is assigned to the service employee of the service order
- D. The storage location that is assigned to the sales organization of the service order

**正解: A、B**

解説:

A reservation in a service order reserves materials (e.g., spare parts) from a storage location. The correct answers are A and C. Let's

explore this in detail.

Reservation Process:

When a service order includes materials (e.g., via a BOM or manual entry), the system creates a reservation (movement type 261) specifying the storage location.

\* Storage location assigned to the service organization (A): The service organization (defined in org management) can be linked to a default storage location in customizing (e.g., SPRO # Service # Organizational Data). This location is proposed for reservations, reflecting where the service team typically sources parts.

\* Storage location assigned to the work center (C): The work center (e.g., "Repair Shop") executing the order can have a storage location assigned in its master data (transaction IR02). This ensures parts are reserved from the work center's designated stock.

Why Not the Others?

\* Sales organization (B): Sales orgs handle commercial aspects, not physical stock locations for service execution.

\* Service employee (D): Employees don't have storage locations assigned; they're linked to work centers or org units.

Example:

Service order for Plant 1000, service org "SERV1" (storage loc. "0001"), work center "WC01" (storage loc. "0002"). Reservation can use "0001" or "0002" based on configuration.

"Reservations in service orders can use storage locations assigned to the service organization or work center."

## 質問 # 50

.....

今日、雇用市場での競争C-TS470-2412は過去のどの時代よりも激しくなっています。Fast2test良い仕事を見つけないなら、あなたは良い能力と熟練した主要な知識を所有していなければなりません。そのため、最高の学習教材を提供するため、SAPのC-TS470-2412認定を取得する必要があります。当社のSAP試験トレントは高品質で効率的であり、テストに合格するのに役立ちます。
