MB-500 practice exam will provide you with wholehearted service throughout your entire learning process. This means that unlike other products, the end of your payment means the end of the entire transaction our Microsoft MB-500 Learning Materials will provide you with perfect services until you have successfully passed the Microsoft Dynamics 365: Finance and Operations Apps Developer MB-500 exam.

To succeed in this certification test and get the passing score, you need to have a good knowledge of the exam content alongside the details it contains. The content is really broad, so you should be ready that you can face with some questions that will not be covered in the topics. All in all, Microsoft MB-500 has the following sections that you need to explore:

- **Implementing security & optimizing performance (10-15%)**

    This last domain will measure your skills in implementing the role-based security policies and requirements, applying the fundamental performance optimization techniques, and optimizing the user interface performance. This means that you need to know how to create and modify permissions, privileges, and duties, diagnose client performance with the use of the Performance Timer or browser-based tools, as well as enforce permissions policy.

- **Implementing reporting (10-15%)**

    As for this section, it will measure your level of the knowledge base that includes such areas as the advantages and weak points of reporting tools in Dynamics 365 FO, creation and revision of Dynamics Reports, as well as design of Dynamics workspace. This means that you should be able to implement the reporting security requirements, create the Finance and Operations apps reports with the use of Power BI or Microsoft Excel.

- **Integrating data solutions & managing them (10-15%)**

Here, the students need to know how to implement data management, identify data integration scenarios, and implement data integration solutions and concepts. These objectives include the details of the selection of the appropriate data integration capabilities, development of a data entity in Visual Studio, monitoring of the status and availability of entities, development of data transformations, and other processes required in the company.

- **Planning solution & architecture design (10-15%)**

  In this topic, it is important to know how to identify the major components of Dynamics 365 Finance and Dynamics 365 Supply Chain Management. This subsection includes the evaluation of your understanding of the ways to select the app components as well as architecture that are based on the business components. Also, it covers your skills in preparing and deploying the deployment package, identifying the components of the app stack and map them to the standard models, as well as identifying the architectural differences between the Cloud and on-premises versions of the Finance and Operations applications. The section also includes the area about the design and implementation of a user interface and implementation of Application Lifecycle Management. It covers the details of the Finance and Operations user interface components and layouts, page options, extension models, LCS and their components, DevOps source control process, etc.

Microsoft MB-500 Certification Exam is designed for individuals who wish to become certified in developing applications for Microsoft Dynamics 365: Finance and Operations. MB-500 exam is specifically intended for developers who work with Microsoft Dynamics 365: Finance and Operations applications and want to validate their skills and knowledge in this area. Passing MB-500 exam demonstrates that you have the necessary skills to design, develop, test, and deploy custom solutions using Microsoft Dynamics 365: Finance and Operations.

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/extensibility/naming-guidelines-extensions

NEW QUESTION # 187
You are a Dynamics 365 Finance and Operations developer.
Users are experiencing slower load times for the All Customers form.
You need to update caching for CustTable to improve data retrieval times.

How should you configure CacheLookup properties? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Entire table

In Microsoft Dynamics AX, groups of records can be cached all at once with set-based caching. Set-based caching can be implemented in two ways:

At design time, by setting the table's CacheLookup property to EntireTable.

In code, by using the RecordViewCache class.

Box 2: Found

* Record caching is enabled for a table when all the following statements are true:

* The CacheLookup property on the table is enabled by setting it to one of the following values:

* NotInTTS, Found, FoundAndEmpty.

* The record buffer disableCache method has not been called with a parameter of true.

NEW QUESTION # 189

You are a Dynamics 365 Finance and Operations developer.

You need to monitor system performance.

Which tools should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: LCS Environment Monitoring tool

Microsoft Dynamics Lifecycle Services (LCS) provides to help you monitor, diagnose, and analyze the health of the Finance and Operations environments that you manage.

Box 2: Trace Parser

You can use the Trace parser to consume traces and analyze performance in your deployment.

Box 3: SQL Profiler

Incorrect Answers:

Fiddler:

Fiddler can help in different ways with Dynamics 365 troubleshooting, including determine what errors are being reported, and by speeding up the JavaScript development process.
