And our PRINCE2-Agile-Foundation Study Materials can stand the test of the market and the candidates all over the world. Besides, the prices for our PRINCE2-Agile-Foundation learning guide are quite favourable.

PRINCE2 Agile Foundation Sample Questions (Q125-Q130):

NEW QUESTION # 125

Which TWO statements about the typical tailoring of a checkpoint report in an agile environment are CORRECT?

- 1) It should be replaced by the project manager attending a daily stand-up.
- 2) It should be displayed in the form of an information radiator in a team room.
- 3) It should be produced when the amount to be delivered will result in tolerance being exceeded.
- 4) It should be produced in a product backlog in the form of prioritized user stories.

- A. 2 and 3
- B. 1 and 4
- C. 3 and 4
- D. 1 and 2

Answer: A

NEW QUESTION # 126

Which role is responsible for facilitating the Agilometer assessment?

- A. Team manager
- B. Project board
- C. Customer subject matter expert
- D. Project manager

Answer: D

Explanation:

NEW QUESTION # 127

Which of the following defines agility?

- A. The ability to embrace and respond to change
- B. The set of activities that define the sequence of actions
- C. The ability to protect from uncontrolled changes
- D. The core belief that anyone is capable of learning

Answer: A

Explanation:

Agility is defined as the ability to embrace and respond to change quickly and effectively. It is a core principle of agile methods, enabling organizations and teams to adapt to evolving business needs, customer feedback, and external factors while delivering value continuously.

This definition contrasts with traditional change control, which often aims to prevent changes (C). Agility promotes flexibility, learning, and continuous improvement, but the belief that anyone is capable of learning (D), while important, is a cultural aspect rather than a direct definition of agility. The sequence of actions (A) relates more to processes than agility itself.

Understanding agility as the capacity to adapt ensures project approaches remain relevant in dynamic environments.

NEW QUESTION # 128

Which is NOT one of the core concepts of Lean Startup that apply to PRINCE2?

- A. To build, measure, learn from your experiences
- B. To create a minimum viable product to manage uncertainty
- C. To use empiricism, based on knowledge that comes from experience
- D. To fail fast, if you are going to fail

Answer: C

Explanation:

NEW QUESTION # 129

Which of the following is a prioritized list of the requirements for a product?

- A. Project canvas
- **B. Backlog**
- C. Project log
- D. Release map

Answer: B

Explanation:

In PRINCE2 Agile, a Backlog is the prioritized list of requirements, features, or user stories that define what needs to be delivered for a product. It is a dynamic and evolving list that is continually refined and re-prioritized to ensure the most valuable work is done first. The backlog acts as a single source of truth for what the team needs to deliver and provides transparency to stakeholders regarding progress and priorities. It aligns with agile principles and practices such as Scrum, where the Product Backlog contains all desired work for the product.

The Project Canvas is a high-level tool used for defining project scope and objectives, the Release Map plans releases and iterations, and the Project Log tracks issues, risks, and actions but does not list prioritized requirements.

Reference: PRINCE2 Agile Foundation Version 2, Section 5.3 "Agile Concepts," and PRINCE2 Agile Study Guide, Chapter 5, "Products and Backlogs."

NEW QUESTION # 130

.....

We stipulate the quality and accuracy of PRINCE2-Agile-Foundation exam questions every year for your prospective dream.
