Do not underestimate the value of our ASIS ASIS-PSP exam dumps because it is the make-or-break point of your career.

ASIS-PSP (Physical Security Professional) Certification Exam is a globally recognized certification designed for professionals working in the field of physical security. Physical Security Professional Exam certification sets a benchmark for those who have a deep understanding of security methodology, technology, and business operations. ASIS-PSP exam is designed to test the candidate's knowledge and understanding of security management functions, including risk assessment, security planning and design, communications, and investigations.

ASIS-PSP exam consists of 125 multiple-choice questions that are divided into four domains: physical security assessment, application, design, and integration of physical security systems, implementation of physical security measures, and management of physical security operations. Candidates have four hours to complete the exam, and a passing score is 70%. ASIS-PSP Exam is computer-based and can be taken at a Prometric testing center. Candidates must meet certain eligibility requirements, such as having a minimum of five years of experience in physical security or a related field, to be able to take the exam.

Holding the ASIS ASIS-PSP certification demonstrates to employers and clients that a professional has a deep understanding of physical security best practices and is committed to ongoing professional development. Physical Security Professional Exam certification can also lead to increased job opportunities and higher salaries.

## ASIS Physical Security Professional Exam Sample Questions (Q45-Q50):

### NEW QUESTION # 45

A legal research generally involves locating:

- A. the applicable statute
- B. the applicable case law
- C. related articles in professional journals
- D. All of the above

**Answer: D**

#### NEW QUESTION # 46

The sites that are partially configured but are missing the central computer are called:

- A. Frequent sites
- B. Hot sites
- C. Cold sites
- D. Warm sites

**Answer: D**

Explanation:

Warm sites are backup facilities that are partially equipped and can be brought online relatively quickly in the event of a disaster. They typically have necessary infrastructure (e.g., power, networking) and some hardware but are missing the primary computer systems or up-to-date data.

Hot sites (A) are fully configured and ready for immediate use.

Cold sites (C) are empty facilities with just space and basic utilities.

Frequent sites (D) is not a recognized term.

#### NEW QUESTION # 47

\_\_\_\_\_ is a controllable variable and how much control is necessary depends on the degree of honesty of each individual.

- A. Honesty
- B. Aptitude
- C. Potential
- D. Capability

**Answer: D**

Explanation:

Capability refers to the potential of a person to commit dishonest acts, and it is considered a controllable variable in security management. The degree of control needed over a person's capability depends on their level of honesty. In environments with higher risks of internal threats, security systems, supervision, and checks may be increased to mitigate the risks associated with those who have both opportunity and capability.
