Latest AWS-Solutions-Associate Braindumps Sheet & Practice AWS-Solutions-Associate Questions

Our to-the-point and trustworthy AWS Certified Solutions Architect - Associate (SAA-C03) Exam Questions in three formats for the Amazon AWS-Solutions-Associate certification exam will surely assist you to qualify for Amazon AWS-Solutions-Associate Certification. Do not underestimate the value of our Amazon AWS-Solutions-Associate exam dumps because it is the make-or-break point of your career.

The AWS-Solutions-Associate Exam consists of multiple-choice questions that cover various topics related to AWS services, including EC2, S3, RDS, VPC, and others. AWS-Solutions-Associate exam duration is 130 minutes, and the passing score is 720 out of 1000. AWS-Solutions-Associate exam is available in multiple languages, including English, Japanese, Korean, and Simplified Chinese.

Amazon AWS-Solutions-Architect-Associate Certification Exam, also known as the AWS Certified Solutions Architect - Associate (SAA-C02), is a rigorous certification exam designed for IT professionals who want to showcase their expertise in designing and deploying scalable, cost-effective, and reliable applications on Amazon Web Services (AWS). AWS Certified Solutions Architect - Associate (SAA-C03) certification exam is intended for individuals who have practical experience in designing distributed systems and applications on the AWS platform and want to validate their technical skills and knowledge.

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q231-Q236):

NEW QUESTION # 231
A bucket owner has allowed another account's IAM users to upload or access objects in his bucket. The IAM user of Account A is trying to access an object created by the IAM user of account B.
What will happen in this scenario?

- A. It is not possible to give permission to multiple IAM users
- B. The bucket policy may not be created as S3 will give error due to conflict of Access Rights
- C. It is not possible that the IAM user of one account accesses objects of the other IAM user
- D. AWS S3 will verify proper rights given by the owner of Account A, the bucket owner as well as by the IAM user B to the object

Answer: D

Explanation:
Explanation/Reference:
Explanation:
If a IAM user is trying to perform some action on an object belonging to another AWS user's bucket, S3 will verify whether the owner of the IAM user has given sufficient permission to him. It also verifies the policy for the bucket as well as the policy defined by the object owner.

NEW QUESTION # 232
A company's web application resizes uploaded images lot users.
The application stores the original images and the resized images in Amazon S3.
The company needs lo minimize the storage costs tor all the images Original images ate viewed frequently. and resized images are viewed infrequently after they are created Both types of images need to be immediately available.
Which combination of actions should a solutions architect take to meet these requirements? (Select TWO.)

- A. Store the original images in S3 Glacier

- B. Store the resized Images In S3 Glacier
- C. Store the resized images in S3 Standard
- D. Store the original images In S3 Standard.
- E. Store the resized Images In S3 One Zone-Infrequent Access (S3 One Zone-IA).

Answer: B,D

NEW QUESTION # 233
A company is designing a new web service that will run on Amazon EC2 instances behind an Elastic Load Balancer. However, many of the web service clients can only reach IP addresses whitelisted on their firewalls.
What should a solutions architect recommend to meet the clients' needs?

- A. An A record in an Amazon Route 53 hosted zone pointing to an Elastic IP address
- B. An EC2 instance with a public IP address running as a proxy in front of the load balancer
- C. A Network Load Balancer with an associated Elastic IP address.
- D. An Application Load Balancer with an associated Elastic IP address

Answer: C

NEW QUESTION # 234
A company is running its application in a single region on Amazon EC2 with Amazon Elastic Block Store (Amazon EBS) and S3 as part of the storage design.
What should be done to reduce data transfer costs?

- A. Replicate Amazon S3 data to buckets in AWS Regions closer to the requester.
- B. Create an Amazon CloudFront distribution with Amazon S3 as the origin
- C. Create a copy of the compute environment in another AWS Region
- D. Convert the application to run on Lambda@Edge

Answer: B

NEW QUESTION # 235
A company needs to ingested and handle large amounts of streaming data that its application generates. The application runs on Amazon EC2 instances and sends data to Amazon Kinesis Data Streams. which is contained wild default settings. Every other day the application consumes the data and writes the data to an Amazon S3 bucket for business intelligence (BI) processing the company observes that Amazon S3 is not receiving all the data that trio application sends to Kinesis Data Streams.
What should a solutions architect do to resolve this issue?

- A. Update the Kinesis Data Streams default settings by modifying the data retention period.
- B. Update the number of Kinesis shards lo handle the throughput of me data that is sent to Kinesis Data Streams.
- C. Turn on S3 Versioning within the S3 bucket to preserve every version of every object that is ingested in the S3 bucket.
- D. Update the application to use the Kinesis Producer Library (KPL) lo send the data to Kinesis Data Streams.

Answer: A

Explanation:
The data retention period of a Kinesis data stream is the time period from when a record is added to when it is no longer accessible1. Thedefault retention period for a Kinesis data stream is 24 hours, which can be extended up to 8760 hours (365 days)1. The dataretention period can be updated by using the AWS Management Console, the AWS CLI, or the Kinesis Data Streams API1.
To meet the requirements of the scenario, the solutions architect should update the Kinesis Data Streams default settings by modifying the data retention period. The solutions architect should increase the retention period to a value that is greater than or equal to thefrequency of consuming the data and writing itto S32. This way, the company can ensure that S3 receives all the data that the application sends to Kinesis Data Streams.
