### NEW QUESTION # 14

You need to complete inventory setup in Business Central to meet requirements and resolve issues. Which two inventory setup configurations should you use? To answer, select the appropriate options in the answer area.

**Answer:**

Explanation:

Explanation:

FIFO is a widely used costing method where the oldest inventory items are sold first. This is a common and straightforward method for valuing inventory.

Automatic cost adjustment is a crucial setting for resolving inventory reconciliation issues. When this is enabled, Business Central automatically adjusts the cost of goods sold (COGS) to match the actual cost of the inventory. This helps prevent discrepancies between the inventory sub-ledger and the general ledger, ensuring that the financial data is accurate.

**NEW QUESTION # 15**

The company uses Dynamics 365 Business Central. You create several dimensions that will be used to perform cost analyses. Some dimension value combinations are not allowed when posting purchase transactions.

You need to set up dimension combinations.

In which order should you perform the actions? To answer, move all the actions from the .list of actions and arrange them in the correct order.

**Answer:**
