HPE0-J68 Online Exam engine supports all web browsers, and it can also have a performance review, therefore you can have a review of about what you have learned.

## HPE Storage Solutions Sample Questions (Q62-Q67):

### NEW QUESTION # 62

Which tool is used to determine current compaction ratios on Primera arrays?

- A. NinjaStars
- B. Storage Management Utility (SMU)
- C. WebUI
- D. SSMC System Reporter

**Answer: A**

Explanation:

When managing HPE Primera arrays, it's important to assess the current compaction ratios to understand how effectively data is being stored.

NinjaStars is an HPE tool specifically designed to analyze and report on data reduction technologies, including deduplication and compression, on HPE storage arrays like Primera. It helps in determining the compaction ratios, providing insights into how efficiently the storage capacity is being utilized.

#### **NEW QUESTION # 63**

A customer has a new Nimble CS3000 21T storage systems and is facing latency issues for his 2TB ERP database. What would be a design approach to solve this issue ?

- A. Perform controller upgrade to a Nimble CS3000 storage systems
- **B. Add additional SSD drives as cache to the system and PIN the volume**
- C. Change RAID of the drives to RAID -1 and setup quality of services for the volume
- D. Enable storage tiering on the system and map the volume to the new tier

**Answer: B**

#### **NEW QUESTION # 64**

A customer purchased a StoreOnce 3620 earlier in the year and has decided to add a 10GBase-T adapter to it, which the customer sourced elsewhere and installed themselves. They complain that the new adapter is not configurable.

What is the most likely reason for this issue?

- A. The customer failed to install a License to Use (LTU) for it
- **B. The StoreOnce software requires updating**
- C. The StoreOnce needs to connect to InfoSight to validate the adapter authenticity
- D. Secure boot must be enabled in the BIOS to securely enable HBAs

**Answer: B**

#### **NEW QUESTION # 65**

Which of the following statements describes the encryption capabilities of the HPE Alletra 5000?

- A. It supports data in flight encryption for synchronous replication
- B. It is hardware based and requires DAR capable disks
- C. It supports data in flight encryption for async replication
- **D. It only supports data at rest encryption**

**Answer: D**

Explanation:

To create a configuration including the sizing and performance values for a customer solution for Alletra MP, the recommended HPE tool is Ninja STARS. This tool is specifically designed for storage sizing and configuration, providing detailed insights into the performance requirements and helping to tailor the solution to meet the specific needs of the customer. Ninja STARS helps in accurately sizing the storage solution to ensure it meets both current and future demands.
