Our services before, during and after the clients use our NGFW-Engineer certification material are considerate. Before the purchase, the clients can download and try out our NGFW-Engineer learning file freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. Our company gives priority to the satisfaction degree of the clients on our NGFW-Engineer Exam Questions and puts the quality of the service in the first place. We also have free demo of our NGFW-Engineer learning guide for you to check the quality before your payment.

Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings.
Topic 2	<ul style="list-style-type: none"> • Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA-Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics.
Topic 3	<ul style="list-style-type: none"> • PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active • active and active • passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPSec, quantum-resistant cryptography, and GRE tunnels.

Our Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) practice exam simulator mirrors the Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) exam experience, so you know what to anticipate on Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) certification exam day. Our Palo Alto Networks NGFW-Engineer Practice Test software features various question styles and levels, so you can customize your Palo Alto Networks NGFW-Engineer exam questions preparation to meet your needs.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q76-Q81):

NEW QUESTION # 76

A security administrator is creating a new custom report to get a consolidated view of network events and needs to select a database to query for the report data.

Which valid set of databases is available for the task?

- A. System, Config, Authentication, Session Flow
- B. Threat, URL Filtering, WildFire Submissions, GlobalProtect
- C. Traffic, User-ID, Application Statistics, HIP Match
- D. Data Filtering, IP-Tag, User-ID, Endpoint Security

Answer: B

Explanation:

These are valid PAN-OS log databases available for custom reporting, allowing consolidated reporting across security events, web access, malware analysis, and remote access activity using built-in firewall logging sources.

NEW QUESTION # 77

A cloud security team wants to extend its existing Palo Alto Networks Security policies into the organization's Kubernetes environments. The team requires an NGFW solution that can be deployed natively as a container and managed by Panorama. Which firewall form factor meets these requirements?

- A. Cloud NGFW
- B. VM-Series
- C. CN-Series
- D. PA-5400 Series

Answer: C

Explanation:

The CN-Series firewall is a container-native NGFW designed specifically for Kubernetes environments, deployable as containers and fully manageable by Panorama, enabling consistent policy enforcement across cloud-native and traditional network environments.

NEW QUESTION # 78

An engineer is implementing a new rollout of SAML for administrator authentication across a company's Palo Alto Networks NGFWs. User authentication on company firewalls is currently performed with RADIUS, which will remain available for six months, until it is decommissioned.

The company wants both authentication types to be running in parallel during the transition to SAML.

Which two actions meet the criteria? (Choose two.)

- A. Create an authentication sequence that includes both the "RADIUS" Server Profile and "SAML Identity Provider" Server Profile to run the two services in tandem.
- B. Create a testing and rollback plan for the transition from Radius to SAML, as the two authentication profiles cannot be run in tandem.
- C. Create and apply an authentication profile with the "SAML Identity Provider" Server Profile.
- D. Create and add the "SAML Identity Provider" Server Profile to the authentication profile for the "RADIUS" Server Profile.

Answer: A,C

Explanation:

B). Create an authentication sequence that orders the RADIUS profile first followed by the SAML profile, allowing the firewall to attempt RADIUS authentication and fall back to SAML if needed, supporting tandem operation for administrator logins.

C). Create and apply an authentication profile using the SAML Identity Provider Server Profile, which can then be sequenced alongside the existing RADIUS profile without disrupting current authentication.

NEW QUESTION # 79

How do Zone Protection Profiles enhance network security?

- A. By replacing security policies with predefined rule sets
- B. By encrypting all traffic entering and leaving the zone
- **C. By providing protection against flood attacks, reconnaissance scans, and packet-based threats**
- D. By dynamically assigning users to security groups

Answer: C

NEW QUESTION # 80

A PA-Series firewall with all licensable features is being installed. The customer's Security policy requires that users do not directly access websites. Instead, a security device must create the connection, and there must be authentication back to the Active Directory servers for all sessions.

Which action meets the requirements in this scenario?

- A. Deploy the Advanced URL Filtering license and captive portal.
- B. Deploy the Next-Generation Firewalls as normal and install the User-ID agent.
- C. Deploy the transparent proxy with Web Cache Communications Protocol (WCCP).
- **D. Deploy the explicit proxy with Kerberos authentication scheme.**

Answer: D

Explanation:

In this scenario, the customer requires that users do not directly access websites and that a security device (the firewall) manages the connection, while also ensuring that there is authentication back to the Active Directory (AD) servers for all sessions. The explicit proxy with Kerberos authentication is the best solution because:

The explicit proxy allows the firewall to intercept user web traffic and manage the connections on behalf of users.

Kerberos authentication ensures that the user's identity is validated against the Active Directory servers before the session is allowed, fulfilling the authentication requirement.

NEW QUESTION # 81

.....

We have professional technicians examine the website every day, and if you purchase NGFW-Engineer learning materials from us, we can offer you a clean and safe online shopping environment, and if you indeed meet any questions in the process of buying, you can contact us, our technicians will solve the problem for you. Moreover, NGFW-Engineer Exam Braindumps of us contain most of knowledge points for the exam, and they will help you pass the exam successfully. We also pass guarantee and money back guarantee if you fail to pass the exam after buying NGFW-Engineer learning materials from us.
