How would this requirement be prioritized in the MoSCoW classification?

- A. As a 'C'.
- B. As a 'M'.
- C. As a 'S'.
- D. As a 'W'.

Answer: A

NEW QUESTION # 48

Which of the following actions could sustain business change?

- A. Establish clear benefits for selected, powerful stakeholders.
- B. Retain the previous system and its associated processes
- C. Develop the coaching skills of selected staff members.
- D. Ensure that improved staff performance is not rewarded

Answer: C

NEW QUESTION # 49

An airline wishes to assess the punctuality of its flights.

What type of business activity would do this?

- A. A controlling activity
- B. A monitoring activity
- C. A planning activity
- D. An enabling activity.

Answer: B

NEW QUESTION # 50

In which step of the scenario development process would the handling of unusual conditions or outcomes be considered?

- A. Identify exception situations
- B. Identify steps and sequence
- C. Identify task or interaction
- D. Define control conditions

Answer: A

Explanation:

Scenario development (often linked to Use Case analysis) is a technique that uses narrative descriptions to explore how a business process or a proposed system feature will work. The process of creating a full scenario typically involves several steps: establishing the context, defining the main success scenario, and then exploring alternatives. The step where the handling of unusual conditions or outcomes is considered is Identify exception situations. Exceptions are the circumstances that cause the main path of a process or interaction to be interrupted or fail, and they represent unusual or undesirable deviations from the expected flow. These conditions, which could include error messages, data unavailability, or system failures, must be thoroughly analyzed and documented to ensure the proposed solution is robust and complete. This step is distinct from identifying the main tasks (A) or the normal flow sequence (B).
