General pest management 7a

To control pests of structures, pesticide application is the only means for suppressing pests.
False
When technicians use other practices in addition to pesticide use for controlling pests: These practices often reduce pesticide use or make such use a secondary operation of the program.
The title technician is used in this manual to denote:
All of the above.
Which Michigan regulation requires that pesticide applications be made in a manner that prevents off-target discharges of pesticides, and that pesticide application equipment be properly calibrated and in sound mechanical condition?
Regulation 637
Which Michigan legislation gives the MDARD authority to certify commercial applicators and to prescribe standards for certification?
Natural Resources and Environmental Protection Act
Which federal legislation specifies that all pesticides be classified as either general-use or restricted-use?
FIFRA
Which Michigan legislation establishes the types of certified applicators and expands the pesticide record-keeping requirements?
Regulation 636
Structural pest managers do not have to concern themselves with the possibility of harming endangered species.
False
In Michigan, a vehicle used to transport pesticides for a pesticide application business must:
Have the name of the pesticide applicator firm and the business phone number printed on the exterior
In Michigan, commercial pesticide applicators must provide their customer written information in the Applicator Service Agreement including:
All of the above.
Describe what type of pesticide information should be a part of the risk and benefit information provided to customers.
Definition, general description, why pesticide is used, general toxicity information (i.e., compound type, where applied, exposure information, amount/type applied, label compliance), precautionary measures and instructions to customer on site preparation, precautions, etc.
If requested, a commercial pesticide applicator must provide the customer with pesticide product labels and MSDS sheets.
True
Pesticide drift is not a concern to Category 7A applicators.
False
Notification and posting requirements include:

よくできたCategory-7A-General-and-Household-Pest-Control試験対策書

& 資格試験におけるリーダーオファー & 正確な Category-7A-General-and-Household-Pest-Control 受験練習参考書

お客様に最高のサービスをお楽しみいただくために、当社の Category-7A-General-and-Household-Pest-Control 試験準備はすべて、何百人もの経験豊富な専門家によって設計されました。Category-7A-General-and-Household-Pest-Control テストの質問は、お客様が試験に関する重要な知識を学ぶのに役立ちます。同時に、Category-7A-General-and-Household-Pest-Control テストトレンドは、暗記学習の習慣に陥るのを防ぐのに役立ちます。学習に20~30時間費やすだけで、Category-7A-General-and-Household-Pest-Control 試験を受けて合格することができます。さらに、当社の Category-7A-General-and-Household-Pest-Control 試験準備の正式な制作チームは、お客様に最新の情報をお楽しみいただけるよう、毎日学習システムを更新します。

OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam 認定 Category-7A-General-and-Household-Pest-Control 試験問題 (Q63-Q68):

質問 # 63

If you wear contacts, ____ when handling pesticides.

- A. Do not wear them
- B. Wear goggles
- C. Wear a face shield

正解: A

解説:

Contact lenses can trap pesticide residues against the eye, increasing the risk of irritation or injury if exposure occurs. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 3: Pesticide Safety) advises applicators to not wear contact lenses when handling pesticides to avoid this risk. Option A (face shield) and Option B (goggles) are protective measures for the eyes but do not address the specific hazard of contact lenses trapping chemicals.

質問 # 64

FIRST AID for TEMPRID if swallowed includes:

- A. Sipping water if conscious but no induced vomiting unless told to do so by poison control center or doctor
- B. Inducing vomiting if conscious
- C. Giving sips of water even if victim is unconscious

正解: A

解説:

The TEMPRID SC label provides first aid instructions: if swallowed, the victim should sip water if conscious, but vomiting should not be induced unless directed by a poison control center or doctor. This aligns with standard pesticide safety protocols in the General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 3: Pesticide Safety). Option A (inducing vomiting) can be dangerous without professional guidance. Option B (giving water if unconscious) is incorrect, as no liquids should be given to an unconscious person.

質問 # 65

Notification requirements for multi-family residents require:

- A. Decal notification in all entryways to the building
- B. A decal notice in each unit prior to the application
- C. The post-application decal notice in each unit

正解: A

解説:

For multi-family residences, NJDEP regulations (N.J.A.C. 7:30-9.13) require decal notification in all entryways to the building to inform residents of pesticide applications. This ensures visibility for all tenants without requiring individual unit notices. Option A

(decal in each unit prior) is not required, though advance notice to tenants is. Option C (post-application decal in each unit) is impractical and not mandated; post-application notices are typically posted in common areas.

質問 # 66

Never get rid of rinsate or unused pesticide material:

- A. Both of the answers are applicable
- B. Into a drain or sewer
- C. On the soil

正解: A

解説:

Disposing of rinsate (rinse water from cleaning equipment) or unused pesticide material improperly can lead to environmental contamination. NJDEP regulations (N.J.A.C. 7:30-9.12) and the General Pest Management: Guide for Commercial Applicators - Category 7A(Chapter 3: Pesticide Safety) prohibit disposal on the soil (which can contaminate groundwater) or into a drain or sewer (which can pollute water systems). Both methods are illegal and environmentally harmful, making Option C correct. Rinsate should be applied to a labeled site or disposed of at a designated facility.

質問 # 67

The transfer of Lyme disease to humans can occur from the:

- A. Nymph or adult stage
- B. Nymph stage only
- C. Adult stage only

正解: A

解説:

Lyme disease is transmitted by the blacklegged tick, and both the nymph and adult stages can transfer the disease to humans if infected with the bacterium *Borrelia burgdorferi*. The General Pest Management: Guide for Commercial Applicators - Category 7A(Chapter 7: Ticks) notes that nymphs are more likely to transmit due to their small size and longer feeding time, but adults can also transmit.

Option A (nymph only) and Option C (adult only) are incorrect, as both stages are capable.

質問 # 68

.....

たくさんの人はOCPE Category-7A-General-and-Household-Pest-Control「Pesticide Applicator Category 7A General and Household Pest Control Exam」認証試験を通ることが難しいと思います。もし弊社の問題集を勉強してそれは簡単になります。弊社はオンラインサービスとアフターサービスとオンラインなどの全面方面を含めてます。オンラインサービスは研究資料模擬練習問題などで、アフターサービスはCertJukenが最新の認定問題だけでなく、絶えずに問題集を更新しています。
