Cybersecurity-Architecture-and-Engineering Complete Exam Dumps & Cybersecurity-Architecture-and-Engineering Guaranteed Success

What's more, part of that DumpsTests Cybersecurity-Architecture-and-Engineering dumps now are free: https://drive.google.com/open?id=1FS_qH0iQ8bRqLWf7nVrMpwpiOAmhkk2h

We would like to make it clear that learning knowledge and striving for certificates of Cybersecurity-Architecture-and-Engineering exam is a self-improvement process, and you will realize yourself rather than offering benefits for anyone. So our Cybersecurity-Architecture-and-Engineering training guide is once a lifetime opportunity you cannot miss. With all advantageous features introduced on the website, you can get the first expression that our Cybersecurity-Architecture-and-Engineering Practice Questions are the best.

In the world in which the competition is constantly intensifying, owning the excellent abilities in some certain area and profound knowledge can make you own a high social status and establish yourself in the society. Passing the test Cybersecurity-Architecture-and-Engineering certification can help you realize your goal and find an ideal job. Buying our Cybersecurity-Architecture-and-Engineering latest question can help you pass the Cybersecurity-Architecture-and-Engineering exam successfully. Just have a try on our free demo of our Cybersecurity-Architecture-and-Engineering exam questions, you will love our Cybersecurity-Architecture-and-Engineering study material!

Pass for Sure Cybersecurity-Architecture-and-Engineering Exam Cram Materials: WGU Cybersecurity Architecture and Engineering (KFO1/D488) are the best dumps for testers - DumpsTests

DumpsTests provides you with the best preparation material. What makes DumpsTests Cybersecurity-Architecture-and-Engineering brain dumps the first choice for their exam preparation is obviously its superior content that beats its competitors in quality and usefulness. DumpsTests currently has a clientele of more than 60,000 satisfied customers all over the world. This is factual proof of the incomparable quality of our products. The way our brain dumps introduce you the syllabus contents of Cybersecurity-Architecture-and-Engineering Exam increases your confidence to perform well in the actual exam paper.

WGU Cybersecurity Architecture and Engineering (KFO1/D488) Sample Questions (Q150-Q155):

NEW QUESTION # 150
Which database has multiple tables with interrelated fields?

- A. Hierarchical
- B. Flat file
- C. Interrelated

- D. Relational

Answer: D

Explanation:
* Arelational databaseis structured to recognize relations among stored items of information.
* Multiple tablesin a relational database can have interrelated fields.
* These relationships are often managed throughforeign keys, which reference the primary keys of other tables.
* This relational model allows for complex queries and data integrity across the database.
* Example:Tables such asCustomers,Orders, andProductsin a sales database, whereOrderstable may reference bothCustomersandProducttables to establish relationships.
References:
* "Database SystemConcepts" by Silberschatz, Korth, and Sudarshan.
* "SQL and Relational Theory" by C.J. Date.

NEW QUESTION # 151

A financial institution is planning to conduct a business impact analysis (BIA) to evaluate the criticality of its business processes and functions.
Which steps will allow the company to perform a BIA?

- A. Determine recovery time objectives and recovery point objectives, develop recovery strategies, and document the recovery plan
- B. Determine business processes and recovery criticality, identify resource requirements, and identify recovery priorities for system resources
- C. Develop business continuity plans and procedures, establish a crisis management team, and test the plan regularly
- D. Monitor network and system activity, detect security incidents, and respond quickly to minimize the impact on critical business processes

Answer: B

Explanation:
The correct answer is C - Determine business processes and recovery criticality, identify resource requirements, and identify recovery priorities for system resources.
According to WGU Cybersecurity Architecture and Engineering (KFO1 / D488), a BIA identifies critical business functions, determines the impact of disruptions, and establishes recovery priorities, including resource needs.
A (monitoring) relates to incident response. B (developing BCP) is after BIA. D (recovery strategies) is part of disaster recovery planning after BIA findings.
Reference Extract from Study Guide:
"Business impact analysis (BIA) involves determining critical business processes, evaluating their recovery requirements, and prioritizing system recovery efforts."
- WGU Cybersecurity Architecture and Engineering (KFO1 / D488), Business Impact Analysis Procedures

NEW QUESTION # 152

Which two options allow an application to access a database?
Choose 2 answers

- A. Structured Query Language (SQL)
- B. Database management system (DBMS)
- C. Java Database Connectivity (JDBC)
- D. Graphical user interface (GUI)
- E. Open Database Connectivity (ODBC) application

Answer: A,C

Explanation:
* SQLis a standard language used to communicate with and manage databases. It allows applications to perform operations such as querying, updating, and managing data.
* JDBCis an API in Java that enables Java applications to interact with databases. It provides methods for querying and updating data in a database using SQL.

* DBMS (Database Management System)is the system software for creating and managing databases but not directly used by applications for database access.
* ODBC (Open Database Connectivity)is another standard API but specific to applications in a broader range of languages and platforms.
* GUI (Graphical User Interface)is a user interface and not a method for applications to access databases.
References:
* "SQL: The Complete Reference" by James R. Groff and Paul N. Weinberg.
* "Java Database Connectivity: JDBC and Java" by Daniel K. Akers.

NEW QUESTION # 153
Which type of services are Google Apps, Dropbox. and GoToMeeling?

- A. Platform-as-a-Service (PaaS)
- B. Security-as-a-Service (SECaaS)
- C. Software-as-a-Service (SaaS)
- D. Infrastructure-as-a-Service (laaS)

Answer: C

Explanation:
Google Apps, Dropbox, and GoToMeeting are examples of Software-as-a-Service (SaaS). SaaS provides software applications over the internet as a service. Users can access the software through a web browser without needing to install and maintain the software on their local devices, making it convenient and cost-effective for both individuals and businesses.

NEW QUESTION # 154
What is the role of the compiler?

- A. To take the most recent line of code, translate it, and execute the machine code
- B. To run scripting languages to test one line of code at a time
- C. To create executable code that is compatible with different operating systems
- D. To create an executable program by translating all of the code at one time

Answer: D

Explanation:
Step by Step Comprehensive Detailed Explanation
A compiler is a program that translates source code written in a high-level programming language into machine code.
Definition: A compiler processes the entire source code of a program and translates it into a machine code executable.
Functionality: This process is typically done in several stages, including lexical analysis, syntax analysis, semantic analysis, optimization, and code generation.
Output: The result is an executable file that can be run on a specific operating system.
