

# Professional-Cloud-Database-Engineer Fresh Dumps & Exam Professional-Cloud-Database-Engineer Simulator

BTW, DOWNLOAD part of Braindumpsqa Professional-Cloud-Database-Engineer dumps from Cloud Storage:  
<https://drive.google.com/open?id=1NLur2MYmlsA7znDDS4jw0lGubIQo4Dy7>

You can choose one of version of our Professional-Cloud-Database-Engineer study guide as you like. There are three versions of our Professional-Cloud-Database-Engineer exam dumps. All of the content are the absolute same, just in different ways to use. Therefore, you do not worry about that you get false information of Professional-Cloud-Database-Engineer Guide materials. According to personal preference and budget choice, choosing the right goods to join the shopping cart. Then you can pay for it and download it right away.

The Google Professional-Cloud-Database-Engineer Exam Tests the candidates' knowledge and skills in various areas related to database management, such as database design, data modeling, database administration, data security, and data analysis. It also covers topics related to Google Cloud Platform services, such as Cloud SQL, Cloud Spanner, Cloud Bigtable, and Cloud Datastore.

Google Professional-Cloud-Database-Engineer exam is designed to test the skills and knowledge required to design, develop, and manage scalable and highly available databases on the Google Cloud Platform. Google Cloud Certified - Professional Cloud Database Engineer certification is ideal for individuals who are responsible for managing database solutions, creating and managing databases, ensuring data security and compliance, and optimizing database performance.

## 100% Pass Professional-Cloud-Database-Engineer - Google Cloud Certified - Professional Cloud Database Engineer –Efficient Fresh Dumps

Our company is a professional exam dumps material providers, with occupying in this field for years, and we are quite familiar with compiling the Professional-Cloud-Database-Engineer exam materials. If you choose us, we will give you free update for one year after purchasing. Besides, the quality of Professional-Cloud-Database-Engineer Exam Dumps is high, they contain both questions and answers, and you can practice first before seeing the answers. Choosing us means you choose to pass the exam successfully.

### Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q36-Q41):

#### NEW QUESTION # 36

You are managing a Cloud SQL for PostgreSQL instance in Google Cloud. You have a primary instance in region 1 and a read replica in region 2. After a failure of region 1, you need to make the Cloud SQL instance available again. You want to minimize data loss and follow Google-recommended practices. What should you do?

- A. Restore the Cloud SQL instance from the automatic backups in region 3.
- B. Restore the Cloud SQL instance from the automatic backups in another zone in region 1.
- C. Check "Lag Bytes" in the monitoring dashboard for the primary instance in the read replica instance. Check the replication status using `pg_catalog.pg_last_wal_receive_lsn()`. Then, fail over to region 2 by promoting the read replica instance.
- D. Check your instance operational log for the automatic failover status. Look for time, type, and status of the operations. If the failover operation is successful, no action is necessary. Otherwise, manually perform gcloud sql instances failover .

**Answer: C**

Explanation:

[https://cloud.google.com/sql/docs/postgres/replication/cross-region-replicas#disaster\\_recovery](https://cloud.google.com/sql/docs/postgres/replication/cross-region-replicas#disaster_recovery)

#### NEW QUESTION # 37

You are deploying a new Cloud SQL instance on Google Cloud using the Cloud SQL Auth proxy. You have identified snippets of application code that need to access the new Cloud SQL instance. The snippets reside and execute on an application server running on a Compute Engine machine. You want to follow Google- recommended practices to set up Identity and Access Management (IAM) as quickly and securely as possible.

What should you do?

- A. For each application code, set up a common shared user account.
- B. For each application code, set up a dedicated user account.
- C. For the application server, set up a common shared user account.
- D. For the application server, set up a service account.

**Answer: D**

Explanation:

<https://cloud.google.com/sql/docs/mysql/sql-proxy#using-a-service-account>

#### NEW QUESTION # 38

Your team is running a Cloud SQL for MySQL instance with a 5 TB database that must be available 24/7. You need to save database backups on object storage with minimal operational overhead or risk to your production workloads. What should you do?

- A. Use Cloud SQL serverless exports.
- B. Use the mysqldump utility on the primary database instance to export the backup.
- C. Clone the Cloud SQL instance, and then use the mysqldump utility to export the data.
- D. Create a read replica, and then use the mysqldump utility to export each table.

**Answer: A**

Explanation:

<https://cloud.google.com/blog/products/databases/introducing-cloud-sql-serverless-exports>

#### NEW QUESTION # 39

You are working on a new centralized inventory management system to track items available in 200 stores, which each have 500 GB of data. You are planning a gradual rollout of the system to a few stores each week. You need to design an SQL database architecture that minimizes costs and user disruption during each regional rollout and can scale up or down on nights and holidays. What should you do?

- A. Use a Bigtable cluster with autoscaling.
- B. Use Oracle Real Application Cluster (RAC) databases on Bare Metal Solution for Oracle.
- **C. Use Cloud Spanner with a custom autoscaling solution.**
- D. Use sharded Cloud SQL instances with one or more stores per database instance.

**Answer: C**

Explanation:

<https://cloud.google.com/spanner/docs/autoscaling-overview>

1. CloudSQL max out at 64TB, so unable to hold 100TB of data. [https://cloud.google.com/sql/docs/quotas#metrics\\_collection\\_limit](https://cloud.google.com/sql/docs/quotas#metrics_collection_limit)
2. Scale is done manually on SQL Cloud

#### NEW QUESTION # 40

You are configuring a new application that has access to an existing Cloud Spanner database. The new application reads from this database to gather statistics for a dashboard. You want to follow Google-recommended practices when granting Identity and Access Management (IAM) permissions. What should you do?

- A. Create a new service account, and grant it the `spanner.databases.select` permission.
- B. Reuse the existing service account that populates this database.
- C. Create a new service account, and grant it the Cloud Spanner Database Admin role.
- **D. Create a new service account, and grant it the Cloud Spanner Database Reader role.**

**Answer: D**

Explanation:

<https://cloud.google.com/iam/docs/overview>

#### NEW QUESTION # 41

.....

You can easily use the PDF format on your tablets, laptops, and smartphones. It means you can save your free time and read Actual Professional-Cloud-Database-Engineer PDF Questions from any place. So, get PDF questions, study it properly and have faith in yourself. You can reach new heights and prove yourself to those who used to think that you are not worth competing with them.
