PL-900 Exam Details

The Microsoft PL-900 test is directly associated with the Microsoft Certified: Power Platform Fundamentals certification. This is the first exam that will help one get started in the Power Platform field by addressing the Power BI concepts. It assesses the candidate's ability to explain the critical business value of the Power Platform, highlight its major components, demonstrate an in-depth knowledge of Power BI, and skills in using Power Automate. Also, it will confirm if the individual understands the role of Power Apps and the real-world value of the Power Virtual Agents.

The PL-900 Certification Exam is an excellent starting point for individuals who are new to the Power Platform and are looking to get started with the platform. PL-900 exam covers the basics of the platform, including creating canvas apps, connecting to data sources, building reports, and creating workflows. PL-900 exam also covers the basics of automation with Power Automate and how to use Power Virtual Agents to create chatbots.

Microsoft Power Platform Fundamentals Sample Questions (Q245-Q250):

NEW QUESTION # 245

You create a model-driven app.

The app is ready to be shared.

You need to complete the process required to set the app up to be shared.

How should you complete the process for setting up the app to be shared? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 246

A company plans to use Microsoft Flow to automate tasks.

Match each flow type to its function. To answer, drag the appropriate flow type from the column on the left to its description on the right. Each option may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Answer:

Explanation:

Explanation:

Box 1: automated

Automated flows start with an event or trigger, such as an email being received. These also support a multitude of actions in the 200+ Flow connectors.

Box 2: business process

The business process flow that creates stages or screens that enforce a certain sequence of steps. It collects data from users for each step in the stage and can kick off automated workflows.

Box 3: scheduled

Scheduled flows run regular reports that are sent out to a team and summarize everything that's happened in the past week. This includes everything from simple daily scheduling to more complex scheduling like "every 3rd Monday."

Box 4: instant

An instant flow is triggered when you click a button inside of the Flow mobile app, SharePoint, Dynamics, PowerApps, or Excel that passes context directly into your flow.

Note: There are four different Flow types that you can choose from when starting out. You can create a scheduled flow, automated flow, instant flow, or a business process flow.

NEW QUESTION # 248

A recent update has been made to a canvas app.

The update has caused a negative impact to users.

You need to roll back the app to a previous version.

What should you do?

- A. Delete the app and create a new app based on the previous version.
- B. Restore the previous version of the app.
- C. Deactivate the live app, import the previous version of the app, and then activate the app.
- D. Uninstall the app for all users and reinstall by using the previous versions' package.

Answer: B

Explanation:

Restore a canvas app to a previous version in PowerApps.

Restore an app from your account

* Open powerapps.com, and then click or tap Apps in the left navigation bar.

* Near the right edge, click or tap the info icon for the app that you want to restore.

* Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

* In the confirmation dialog box, click or tap **Restore**.

A new version is added to your list.
