NEW QUESTION # 223
An administrator is attempting to create policies for deployment of a device group and template stack. When creating the policies, the zone drop-down list does not include the required zone.
What can the administrator do to correct this issue?

- A. Add a firewall to both the device group and the template.
- B. Enable "Share Unused Address and Service Objects with Devices" in Panorama settings.
- C. Add the template as a reference template in the device group.
- D. Specify the target device as the master device in the device group.

Answer: C

Explanation:
In order to see what is in a template, the device-group needs the template referenced. Even if you add the firewall to both the template and device-group, the device-group will not see what is in the template.
