PECB NIS-2-Directive-Lead-Implementer Study Materials - NIS-2-Directive-Lead-Implementer Interactive Practice Exam

As is known to us, there are best sale and after-sale service of the NIS-2-Directive-Lead-Implementer certification training dumps all over the world in our company. Our company has employed a lot of excellent experts and professors in the field in the past years, in order to design the best and most suitable NIS-2-Directive-Lead-Implementer latest questions for all customers. More importantly, it is evident to all that the NIS-2-Directive-Lead-Implementer Training Materials from our company have a high quality, and we can make sure that the quality of our products will be higher than other study materials in the market. If you want to pass the NIS-2-Directive-Lead-Implementer exam and get the related certification in the shortest time, choosing the NIS-2-Directive-Lead-Implementer training materials from our company will be in the best interests of all people.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which of the following statements regarding critical entities is correct?

- A. Critical entities must provide one or more essential services and must have their critical infrastructure within the territory of the respective Member State
- B. Member States can exclusively rely on self-registration mechanisms for the identification and reporting of all critical entities, with no direct oversight from the competent authorities
- C. Critical entities are obligated to report only their names and relevant (sub)sectors to competent authorities

Answer: A

NEW QUESTION # 43

What is the key difference between Tier 2 and Tier 3 disaster recovery strategies?

- A. Tier 2 uses couriers to transport data between centers, while Tier 3 uses electronic vaulting of critical data
- B. Tier 2 mandates dual sites with peer-to-peer connections, whereas Tier 3 focuses on data transfer enhancement
- C. Tier 2 involves electronic vaulting of critical data, while Tier 3 relies on offsite vaults

Answer: A

NEW QUESTION # 44

Which of the following teams continuously manages existing threats by establishing rules, identifying exceptions, and detecting emerging risks?

- A. Incident response team
- B. Crisis management team
- C. Security operations center team

Answer: C

NEW QUESTION # 45

Scenario 6: Solicure is a leading pharmaceutical company dedicated to manufacturing and distributing essential medications. Thriving in an industry characterized by strict regulations and demanding quality benchmarks, Solicure has taken proactive steps to adhere to the requirements of the NIS 2 Directive. This proactive approach strengthens digital resilience and ensures the continued excellence of product offerings.

Last year, a cyberattack disrupted Solicure's research and development operations, raising concerns about the potential compromise of sensitive information regarding drug formulation. Solicure initiated an immediate investigation led by its cybersecurity team, gathering technical data to understand the attackers' methods, assess the damage, and swiftly identify the source of the breach. In addition, the company implemented measures to isolate compromised systems and remove the attackers from its network. Lastly, acknowledging the necessity for long-term security improvement, Solicure implemented a comprehensive set of security measures to comply with NIS 2 Directive requirements, covering aspects such as cybersecurity risk management, supply chain security, incident handling, crisis management, and cybersecurity crisis response planning, among others.

In line with its crisis management strategy, Solicure's chief information security officer, Sarah, led the initiative to develop a comprehensive exercise plan to enhance cyber resilience. This plan was designed to be adaptable and inclusive, ensuring that organizational decision-makers possessed the essential knowledge and skills required for effective cybersecurity threat mitigation. Additionally, to enhance the efficacy of its crisis management planning, Solicure adopted an approach that prioritized the structuring of crisis response.

A key aspect of Solicure's cybersecurity risk management approach centered on the security of its human resources. Given the sensitive nature of its pharmaceutical products, the company placed utmost importance on the employees' backgrounds. As a result, Solicure implemented a rigorous evaluation process for new employees, including criminal history reviews, prior role investigations, reference check, and pre-employment drug tests.

To comply with NIS 2 requirements, Solicure integrated a business continuity strategy into its operations. As a leading provider of life-saving medicines and critical healthcare products, Solicure faced high stakes, with potential production and distribution interruptions carrying life-threatening consequences for patients. After extensive research and consultation with business management experts, the company decided to utilize a secondary location to reinforce the critical operations at the primary site. Along with its business continuity management strategy, Solicure developed a set of procedures to recover and protect its IT infrastructure in the event of a disaster and ensure the continued availability of its medications.

Based on this scenario, answer the following question:

Which of the following screening levels did Solicure implement during the evaluation process for new employees?

- A. Level 3
- **B. Level 4**
- C. Level 2

Answer: B

NEW QUESTION # 46

According to Article 7 of the NIS 2 Directive, what is one of the policies that Member States are required to adopt?

- **A. Supply chain cybersecurity policy**
- B. Physical access control policy
- C. Disaster recovery planning policy

Answer: A

NEW QUESTION # 47

.....
