

# **Pass Guaranteed 2026 Fortinet FCP\_FCT\_AD-7.4– Reliable Frenquent Update**

Are really envisioned to attempt to be FCP\_FCT\_AD-7.4 certified professional. Then enrolled in our preparation suite and get the perceptively planned actual Dumps in two accessible formats, PDF and preparation software. DumpsValid is the preeminent platform, which offers FCP\_FCT\_AD-7.4 Dumps duly equipped by experts. Our FCP\_FCT\_AD-7.4 Exam Material is good to pass the exam within a week. DumpsValid is considered as the top preparation material seller for FCP\_FCT\_AD-7.4 exam dumps, and inevitable to carry you the finest knowledge on FCP\_FCT\_AD-7.4 exam certification syllabus contents.

Fortinet Certification exams are essential to move ahead, because being certified professional a well-off career would be in your hand. Fortinet is among one of the strong certification provider, who provides massively rewarding pathways with a plenty of work opportunities to you and around the world. But the mystery is quite challenging to pass FCP\_FCT\_AD-7.4 exam unless you have an updated exam material. Thousands of people attempt FCP\_FCT\_AD-7.4 Exam but majorly fails despite of having good professional experience, because only practice and knowledge isn't enough a person needs to go through the exam material designed by Fortinet, otherwise there is no escape out of reading. Well, you have landed at the right place; DumpsValid offers your experts designed material which will gauge your understanding of various topics.

## FCP\_FCT\_AD-7.4 Practice Test

Choosing our Fortinet FCP\_FCT\_AD-7.4 study material, you will find that it will be very easy for you to overcome your shortcomings and become a persistent person. If you decide to buy our FCP - FortiClient EMS 7.4 Administrator FCP\_FCT\_AD-7.4 study questions, you can get the chance that you will pass your FCP\_FCT\_AD-7.4 exam and get the certification successfully in a short time.

### Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q51-Q56):

#### NEW QUESTION # 51

Refer to the exhibit.

Endpoints > All Endpoints

Date	Count	Message
2025-02-12 00:40:51	1	Malware: EICAR_TEST_FILE found in C:\Users\administrator\Desktop\Resources\testfile

You provide a webserver hosting service. An endpoint downloads a test file, testfile.txt, that gets blocked by FortiClient. Which configuration can you use to make the file accessible on the endpoint? (Choose one answer)

- A. Exclude testfile.txt from the malware protection profile.
- B. Restore access to file directly using FortiClient.
- C. Allow the webserver URL in the exclusion list in the web filter profile.
- D. Add the file to the allowlist in quarantine management on FortiClient EMS.

**Answer: D**

Explanation:

According to the FortiClient EMS 7.2/7.4 Administration Guide (specifically the Quarantine Management and Malware Protection sections), the correct administrative workflow to restore a blocked file and ensure it is no longer flagged as malicious is to use the Quarantine Management feature on the EMS server.

#### 1. Analysis of the Exhibit

\* Event Type: The exhibit shows an Antivirus Event where a file named testfile.txt was flagged as Malware: EICAR\_TEST\_FILE.

\* Location: The file was found in a local user directory (C:\Users\administrator\Desktop\Resources\testfile.txt).

\* System State: The endpoint is managed by EMS (indicated by the Policy: Default and EMS status icons).

#### 2. Why Option D is the Correct Choice:

\* Centralized Control: In a managed environment, the administrator uses the EMS console to oversee security incidents. To restore a file that has been quarantined, the administrator must navigate to Quarantine Management > Files.

\* Allowlist & Restore Action: By selecting the specific blocked file (testfile.txt) and clicking Allowlist & Restore, two things happen simultaneously:

\* Restoration: EMS sends a command to the FortiClient endpoint to release the file from the local quarantine folder and return it to its original path.

\* Allowlisting: The file's hash is added to the Allowlist (managed under Quarantine Management > Allowlist), which prevents FortiClient from re-quarantining the file during future real-time or on-demand scans.

\* Accessibility: This is the documented method to make a file "accessible on the endpoint" while ensuring it is not immediately re-blocked by the security engine.

#### 3. Why Other Options are Incorrect:

\* A. Restore access directly using FortiClient: While FortiClient has a local quarantine tab, the "Release" button is typically greyed out or restricted when the client is managed by EMS to ensure centralized security policy enforcement.

\* B. Allow the webserver URL in the exclusion list: The exhibit shows an Antivirus/Malware event, not a Web Filter event. The file has already been downloaded to the local disk and is being blocked by the Real-Time Protection engine, so a Web Filter URL exclusion would have no effect on the local file block.

\* C. Exclude testfile.txt from the malware protection profile: While adding a path exclusion to the Malware Protection profile is a valid way to prevent future scans of a directory, it does not automatically restore a file that has already been moved to quarantine. The

proper workflow for an existing block is to use the Quarantine Management tool first.

## NEW QUESTION # 52

Refer to the exhibit.

The screenshot displays the Fortinet FortiClient EMS interface. On the left, a sidebar shows the user 'admin' and a list of endpoints. The main area is divided into three columns: 'Device', 'Connection', and 'Status'. The 'Device' column shows details for 'br-pc-1', including OS (Linux - Ubuntu 22.04.3 LTS), IP (10.1.0.10), MAC (02:09:0f:00:04:02), Public IP (35.230.181.150), Status (Online), Location (On-Fabric), Owner (Brave-Dumps.com), Organization, Group Tag, and Security Posture Tags (all\_registered\_clients, Brave-Dumps.com). The 'Connection' column shows 'Managed by EMS' and 'Configuration' details: Policy (Default), Installer (Not assigned), FortiClient Version (7.4.0.1636), FortiClient Serial Number (FCT8000082946488), FortiClient ID (C832EF1D7DBD4A2AA1A4B2487F68...), and ZTNA Serial Number (Disabled). The 'Status' column shows 'Managed' and a list of features: Antivirus enabled, Real-Time Protection enabled, Anti-Ransomware not installed, Cloud Based Malware Outbreak Det, Sandbox not installed, Sandbox Cloud not installed, Web Filter enabled, Application Firewall not installed, Remote Access installed, Vulnerability Scan enabled, SSOMA not installed, User Verification supported, and ZTNA installed (highlighted in yellow).

The zero trust network access (ZTNA) serial number on endpoint br-pc-1 is in a disabled state.

What is causing the problem? (Choose one answer)

- A. The ZTNA destinations endpoint profile is disabled.
- B. The ZTNA is disabled due to FortiClient disconnected from FortiClient EMS.
- C. The ZTNA certificate has been revoked by administrator.
- D. The ZTNA feature is not installed on FortiClient.

**Answer: A**

Explanation:

Based on the FortiClient EMS 7.2/7.4 Study Guides and the visual evidence provided in the exhibit, here is the verified breakdown of why the ZTNA Serial Number is showing as Disabled:

1. Analysis of the Exhibit

\* Operating System: The endpoint is running Linux (Ubuntu 22.04.3 LTS).

\* Connection Status: The endpoint status is Online and Managed by EMS. This immediately eliminates Option C, as the device is actively communicating with the EMS server.

\* Features List: At the bottom right of the "Features" column, it explicitly states "ZTNA installed". This eliminates Option A, confirming the software component is present on the endpoint.

\* ZTNA Serial Number Field: The field is highlighted in red and shows "Disabled".

2. Identifying the Root Cause (Option B)

In the FortiClient EMS curriculum regarding ZTNA (Zero Trust Network Access), the ZTNA Serial Number (also known as the ZTNA Tagging or Client Certificate UID) is generated and activated based on the assigned Endpoint Profile.

\* Profile Dependency: For FortiClient to generate a ZTNA serial number/certificate and participate in ZTNA, the administrator must enable and configure the ZTNA Destinations (or ZTNA Connection) profile within the EMS.

\* Disabled State: If the ZTNA Destinations feature is disabled in the profile assigned to that specific endpoint (or if the endpoint is assigned the "Default" profile where ZTNA is not configured), the "ZTNA Serial Number" status on the EMS dashboard will reflect as Disabled.

\* Linux Specifics: In FortiClient for Linux, ZTNA support is available but requires the profile to be explicitly pushed and active. If the profile is toggled off in the EMS GUI under Endpoint Profiles > ZTNA Destinations, the serial number functionality is suspended.

3. Why Other Options are Incorrect

\* A. The ZTNA feature is not installed: The exhibit clearly shows "ZTNA installed" under the Features list.

\* C. FortiClient disconnected from EMS: The exhibit shows the status as "Online" and "Managed by EMS" with a green checkmark.

\* D. The ZTNA certificate has been revoked: If a certificate is revoked, the status typically shows as

"Revoked" or "Expired," or the serial number would still be present but marked as untrusted. A

"Disabled" state indicates the feature itself is turned off at the policy/profile level.

## NEW QUESTION # 53

Which two statements are true about ZTNA? (Choose two.)

- A. ZTNA manages access for remote users only.
- B. ZTNA manages access through the client only.
- C. ZTNA provides role-based access.
- D. ZTNA provides a security posture check.

**Answer: C,D**

Explanation:

ZTNA (Zero Trust Network Access) is a security architecture that is designed to provide secure access to network resources for users, devices, and applications. It is based on the principle of "never trust, always verify," which means that all access to network resources is subject to strict verification and authentication.

Two functions of ZTNA are:

ZTNA provides a security posture check: ZTNA checks the security posture of devices and users that are attempting to access network resources. This can include checks on the device's software and hardware configurations, security settings, and the presence of malware.

ZTNA provides role-based access: ZTNA controls access to network resources based on the role of the user or device. Users and devices are granted access to only those resources that are necessary for their role, and all other access is denied. This helps to prevent unauthorized access and minimize the risk of data breaches.

#### **NEW QUESTION # 54**

What is the function of the quick scan option on FortiClient?

- A. It performs a full system scan including all files, executable files, DLLs, and drivers for threats.
- B. It scans executable files, DLLs, and drivers that are currently running, for threats.
- C. It scans programs and drivers that are currently running, for threats
- D. It allows users to select a specific file folder on their local hard disk drive (HDD), to scan for threats.

**Answer: A**

Explanation:

\* Understanding Quick Scan Function:

\* The quick scan option on FortiClient is designed to scan certain elements of the system quickly for threats.

\* Evaluating Scan Scope:

\* The quick scan specifically targets executable files, DLLs, and drivers that are currently running, providing a rapid assessment of the active components of the system.

\* Conclusion:

\* The correct answer is D, as it accurately describes the function of the quick scan option on FortiClient.

References:

FortiClient scanning options documentation from the study guides.

#### **NEW QUESTION # 55**

Refer to the exhibit.

Based on the FortiClient log details shown in the exhibit, which two statements are true? (Choose two.)

- A. The file location is \\??\\D:\\Users\\.
- B. The file status is Quarantined
- C. The filename is Unconfirmed 899290.crdownload.
- D. The filename is sent to FortiSandbox for further inspection.

**Answer: B,C**

## NEW QUESTION # 56

.....

With our FCP\_FCT\_AD-7.4 practice materials, you don't need to spend a lot of time and effort on reviewing and preparing. For everyone, time is precious. Office workers and mothers are very busy at work and home; students may have studies or other things. Using FCP\_FCT\_AD-7.4 guide torrent, you only need to spend a small amount of time to master the core key knowledge to pass the FCP\_FCT\_AD-7.4 Exam and get a FCP\_FCT\_AD-7.4 certificate. It is proved that if you spend 20 to 30 hours to study our FCP\_FCT\_AD-7.4 exam questions, it is easy for you to pass the FCP\_FCT\_AD-7.4 exam.
