## Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Click the 'Exhibit' button to view the screenshot.

How will the HTTP request `http://xenapp.training.lab/url1` be redirected based on the screenshot?

- A. The request will be dropped at the CS vServer.
- B. The request will be sent to `lb_vsrv_www`.
- C. The request will be sent to `LB_vserver1`.**
- D. The request will be sent to `LB_vserver2`.

**Answer: C**

**NEW QUESTION # 48**

A Citrix Administrator complains that between the two rewrite policies bound to the vserver, only one policy, whichever has lower priority, works. The other policy is never used.

Click the 'Exhibit' button to view the screenshot of the relevant policy binding.

What is the cause of the issue?

- A. The Policy expression of the no\_chunk\_pol is 'true' and 'NOT HTTP.REQ.IS\_VALID'.
- B. GotoExpression value for Policy RP\_remove\_srv\_header is configured as 'END'.
- C. The Invoke label is NOT configured.
- D. The Priority of the no\_chunk\_pol is a higher numeric value than 100.

**Answer: A**

**NEW QUESTION # 49**

Which Front-End Optimization (FEO) action can a Citrix Administrator use to achieve the results shown in the screenshots?

Click the Exhibit button to view the screenshots.

- A. Truncate CSS
- B. **Inline CSS**
- C. Rearrange CSS
- D. Move CSS to head

**Answer: B**

**NEW QUESTION # 50**

Which three statements are correct regarding Citrix printing? (Choose three.)

- A. Citrix printing allows administrators, but NOT users, to print to any other users' active session client printers.
- B. **Citrix printing sets the default security descriptor for auto-created printers to ensure client printer security.**
- C. The Citrix Print Manager Service monitors session events, such as logon and logoffs or session termination.
- D. Citrix printing does NOT assign each printer a unique namespace within a given session.
- E. **The Citrix Print Manager Service handles requests by impersonating the actual session user.**

**Answer: B,C,E**

Explanation:

Citrix Print Manager Service: Monitors session events like logon, logoffs, and session termination to manage printing tasks within the session.

Security Descriptor: Sets the default security descriptor for auto-created printers, enhancing the security of client printers in a session.

Impersonation: The Citrix Print Manager Service processes print requests by impersonating the session user, ensuring that the user's permissions are applied to the printing process.

**NEW QUESTION # 51**

Scenario: A Citrix Administrator created a machine catalog using Machine Creation Services. The Desktop Experience was set to 'Random'.

Where will the unique information for the virtual machines be stored?

- A. Only in the Site database
- B. In the PERSONALITY.INI file at the root directory of each virtual machine
- C. **In the identity disk of each virtual machine**
- D. In the differencing disk of each virtual machine

**Answer: C**

### Explanation:

## Explanation

The identity disk is a small disk attached to each virtual machine that stores the unique information for that machine, such as computer name, IP address, and Active Directory account. This disk is created when using Machine Creation Services with the Desktop Experience set to 'Random'.<sup>1</sup>

## 1: Identity disks
