## Salesforce Certified Advanced Administrator Sample Questions (Q145-Q150):

### NEW QUESTION # 145

AW Computing is running a special bundle deal on monitors and keyboards. Normally, discounts need VP approval, but this special bundle is pre-approved.

What should the administrator recommend for these requirements?

- A. Remove the approval process.
- **B. Create a separate price book.**
- C. Enable Subscriptions.
- D. Implement CPQ.

**Answer: B**

Explanation:

A price book is a list of products and their prices for a specific segment of customers or market. By creating a separate price book for the special bundle deal on monitors and keyboards, AW Computing can offer different prices for these products without affecting their standard prices or requiring VP approval. The price book can also specify which products are included in the bundle and which are not. References:

#### NEW QUESTION # 146

A developer is getting errors for Production deployment. The test deployment in the Full sandbox, which included a local test run, was successful. The Full sandbox was last refreshed 2 weeks ago.

Where should the administrator check to see what was recently changed?

- A. Field History
- B. Salesforce Optimizer
- C. Dev Console
- D. Setup Audit Trail

**Answer: D**

Explanation:

Setup Audit Trail is a tool that tracks the recent setup changes made by anyone in an org. It can help identify who made what changes and when, as well as any errors or failures that occurred during the changes. Setup Audit Trail can help troubleshoot deployment issues by comparing the changes made in production with those made in sandbox.
