High Pass-Rate OGEA-103 Valid Dumps Ppt Spend Your Little Time and Energy to Clear OGEA-103 exam easily

Maybe you want to get the OGEA-103 certification, but daily work and long-time traffic make you busier to improve yourself. Thanks to our OGEA-103 training materials, you can learn for your certification anytime, everywhere. If you get our products, you will surely find a better self. As we all know, the best way to gain confidence is to do something successfully. With our OGEA-103 Study Guide, you will easily pass the OGEA-103 examination and gain more confidence.

Our top priority is to help every customer in cracking the TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) test. Therefore, we have created these formats so that every applicant can prepare successfully for the TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) exam on the first attempt. We are aware that the cost for the registration of the The Open Group OGEA-103 examination is not what everyone can pay. After paying the hefty TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) test registration fee, applicants usually run on a tight budget. This is why Actual4Cert provides you with the TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) real questions with up to 1 year of free updates.

The Open Group - OGEA-103 - Updated TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Valid Dumps Ppt

Society will never welcome lazy people, and luck will never come to those who do not. We must continue to pursue own life value, such as get the test The Open Group certification, not only to meet what we have now, but also to constantly challenge and try something new and meaningful. For example, our OGEA-103 prepare questions are the learning product that best meets the needs of all users. There are three version of our OGEA-103 training prep: PDF, Soft and APP versions. And you can free download the demo of our OGEA-103 learning guide before your payment. Just rush to buy our OGEA-103 exam braindump!

The Open Group Architecture Framework (TOGAF) is a widely recognized framework for Enterprise Architecture. It provides a common language, methodology, and tools for designing and managing enterprise architecture. TOGAF is used by organizations worldwide to improve the efficiency and effectiveness of their IT architecture. It is a comprehensive framework that covers all aspects of Enterprise Architecture, including business, data, application, and technology architecture.

The Open Group OGEA-103 certification exam is designed for professionals who want to demonstrate their expertise in enterprise architecture. OGEA-103 Exam is a combination of Part 1 and Part 2 of the TOGAF Enterprise Architecture certification, which enables learners to demonstrate their knowledge and understanding of the framework. OGEA-103 exam is designed for individuals who are working in IT, business, or enterprise architecture and are interested in gaining a deeper understanding of the TOGAF

framework.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q57-Q62):

NEW QUESTION # 57
Consider the following chart:
Which important concept for Enterprise Architecture Practitioners does it illustrate?

- A. ADM phases must be run in a sequenced approach to produce the Architecture.
- B. Enterprise Architects must use Gantt charts to communicate with Stakeholders.
- C. ADM phases must be run simultaneously until the relevant information has been produced.
- D. An Enterprise Architecture must be developed in phases with a limited fixed duration.

Answer: A

Explanation:
The chart shown is a Gantt chart, which is commonly used for project management to illustrate a project schedule. In the context of TOGAF (The Open Group Architecture Framework), which is a framework for enterprise architecture, this Gantt chart is demonstrating the sequenced approach to the Architecture Development Method (ADM). The ADM is the core process of TOGAF which provides a tested and repeatable process for developing architectures. The ADM is described as being iterative, over the whole process, between phases, and within phases. For each iteration of the ADM, a fresh decision must be taken about each of the parameters (scope, granularity, time period, and architecture assets).
The ADM consists of a number of phases that have to be followed in sequence:
* Preliminary Phase: Framework and principles
* Phase A: Architecture Vision
* Phase B: Business Architecture
* Phase C: Information Systems Architectures, including Data and Application Architectures
* Phase D: Technology Architecture
* Phase E: Opportunities and Solutions
* Phase F: Migration Planning
* Phase G: Implementation Governance
* Phase H: Architecture Change Management
* Requirements Management
Each phase is dependent on the outputs of the previous phase and the Requirements Management phase runs throughout. The Gantt chart clearly shows the dependency and sequence in which these phases occur, implying that a structured approach is followed to produce the enterprise architecture.

NEW QUESTION # 58
Complete the sentence The Architecture Landscape is divided into levels known as_____.

- A. Segment Strategic and Capability Architectures
- B. Gaps Plateaus, and Target Architectures
- C. Baseline. Transition and To Be Architectures
- D. Transitional Complete and incremental Architectures

Answer: A

Explanation:
The Architecture Landscape is divided into levels known as Segment Strategic and Capability Architectures. These levels correspond to different scopes and purposes of architectures within an enterprise. Segment Architectures are architectures that address specific business units, functions, or processes within an enterprise. Strategic Architectures are architectures that provide a high-level view of the enterprise's vision, goals, and direction. Capability Architectures are architectures that address specific business capabilities or services that span multiple segments or domains. Reference: The TOGAF Standard | The Open Group Website, Section 2.4 Architecture Repository.

NEW QUESTION # 59

Consider the following statements

1 A whole corporation or a division of a corporation

2 A government agency or a single government department

3 Partnerships and alliances of businesses working together such as a consortium or supply chain What are those examples of according to the TOGAF Standard?

- A. Organizations
- B. Business Units
- C. Enterprises
- D. Architectures Scopes

Answer: C

Explanation:

Enterprises are examples of the scope of an architecture according to the TOGAF Standard. An enterprise is defined as any collection of organizations that has a common set of goals and/or a single bottom line. Enterprises can be whole corporations or divisions of a corporation, government agencies or single government departments, partnerships and alliances of businesses working together, etc. Reference: The TOGAF® Standard | The Open Group Website, Section 2.1 Core Concepts.

NEW QUESTION # 60

Consider the following statement:

According to the TOGAF Standard a governed approach of a particular deliverable will ensure a system of continuous monitoring to check integrity changes decision-making and audit of all architecture-related activities Which deliverable is being referred to?

- A. The Statement of Architecture Work
- B. An Architecture Contract
- C. The Architecture Vision
- D. The Architecture Definition Document

Answer: B

Explanation:

An Architecture Contract is a deliverable that specifies the responsibilities and obligations of the parties involved in the implementation and governance of an architecture. It ensures a system of continuous monitoring to check integrity changes decision-making and audit of all architecture-related activities. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.4 Architecture Contracts.

NEW QUESTION # 61

Consider the following statement:

Separate projects may operate their own ADM cycles concurrently, with relationships between the different projects What does it illustrate?

- A. Iteration
- B. Enterprise Architecture
- C. Implementation governance
- D. Requirements management

Answer: A

Explanation:

The statement illustrates iteration and the ADM. Iteration is the technique of repeating a process or a phase with the aim of improving or refining the outcome. Iteration allows for feedback loops and adaptations at any point in the architecture development and transition process. Separate projects may operate their own ADM cycles concurrently, with relationships between the different projects, to address different aspects or levels of the architecture in an iterative manner. Reference: The TOGAF® Standard | The Open Group Website, Section 3.1 Introduction to the ADM.
