Salesforce Certified Experience Cloud Consultant Sample Questions (Q69-Q74):

NEW QUESTION # 69

A manager at Ursa Major Solar is responsible for creating and editing only the community users for the Partner Community they have recently set up using Experience Cloud. However, the manager is able to make organizational changes to the user records of the internal users as web.

What could be the possible issue here?

- A. The manager has been given the Manage User permission.
- B. The manager has been given the Manage Customer Users permission.
- C. The manager has been given the Manage External Users permission.
- **D. The manager has been given the Manage Profiles and Permission Sets permission.**

Answer: D

NEW QUESTION # 70

Which two Community licenses allow records to be shared with a criteria-based sharing rule?

Choose 2 answers

- **A. Customer Community Plus**
- B. Customer Community
- C. Customer Portal
- **D. Partner Community**

Answer: A,D

Explanation:

Two Community licenses that allow records to be shared with a criteria-based sharing rule are Partner Community and Customer Community Plus. These license types allow users to access custom objects and a subset of standard CRM objects, such as accounts, contacts, cases, and dashboards. These license types also support advanced sharing features, such as role hierarchy, sharing rules, manual sharing, and Apex sharing.

NEW QUESTION # 71

Northern Trail Outfitters has configured chat so customers can quickly get answers to their questions by chatting with an agent while browsing the Experience site.

How should an administrator embed the chat window in an Experience site?

- A. Configure the Embedded Service connector.
- B. Create a custom component using the Embedded Service API.
- **C. Add the Embedded Service component to Builder pages.**
- D. Create an Embedded Service quick action.

Answer: C

Explanation:

The Embedded Service component allows you to embed a chat window in your Experience Cloud site, so customers can chat with agents while browsing the site. You can add the Embedded Service component to any Builder page and configure its properties, such as the chat button label, pre-chat fields, and offline support.

NEW QUESTION # 72

Universal Containers (UC) would like to create a site for its existing customers. The site will contain articles, manuals, and FAQs. The site will also contain access to UC's Contracts object specific to each customer and the ability for customers to update their billing information, requiring them to log in to the site to access any information. Which template should UC select when building its site?

- A. Partner Central
- **B. Customer Account Portal**
- C. Customer Service
- D. Help Center

Answer: B

Explanation:

The Customer Account Portal template is designed for creating a site for existing customers who need to access their account information, such as contracts, billing, and support. The template includes features such as login, registration, profile management, case management, and commerce integration. The template also supports Knowledge articles, manuals, and FAQs.

NEW QUESTION # 73

Which two statements regarding data categories are true?
Choose 2 answers

- A. When a category is made visible to a user through custom settings or is made visible by default, its child and parent categories are not included.
- **B. Customer Portal users and partner portal users inherit data category visibility settings of the role assigned to their account (owner) managers by default.**
- **C. Child roles cannot see more data categories than their parent role. If the parent role's visibility changes, the child role's category visibility is reset to its parent's category visibility.**
- D. Translated articles will not follow the master article data category. Therefore, translated articles can be assigned to a different data category.

Answer: B,C

Explanation:

Two statements regarding data categories that are true are A and B. Data category visibility is controlled by roles, permission sets, or profiles. Child roles cannot see more data categories than their parent role, and if the parent role's visibility changes, the child role's category visibility is reset to match the parent's. Customer Portal users and partner portal users inherit data category visibility settings of the role assigned to their account (owner) managers by default, unless they have a custom profile that overrides the role settings.
