## Scaled Agile SAFe Release Train Engineer Sample Questions (Q186-Q191):

### NEW QUESTION # 186

What is one technique for building a one-team culture across the ART?

- A. Ensure the team leader does not show vulnerability
- B. Review each teams' predictability measure with the ART
- **C. Foster an environment in which the whole ART succeeds and fails together**
- D. Rotate team members to new teams to facilitate relationship building

**Answer: C**

Explanation:

Building a one-team culture across the Agile Release Train (ART) is essential for the success of any SAFe implementation. One effective technique for fostering this culture is to create an environment where the entire ART shares in successes and failures, promoting unity and collective responsibility. This approach encourages collaboration, increases transparency, and helps to build trust among team members. It aligns with the SAFe principle of alignment, which emphasizes that the more alignment you have, the more autonomy you can grant<sup>2</sup>. This shared sense of purpose helps to break down silos and ensures that everyone is working towards the same goals. It is not about rotating team members (B) or avoiding vulnerability (A), nor is it solely about reviewing predictability measures (D). Instead, it's about fostering a collective mindset where the ART operates as a cohesive unit, supporting one another and striving for common objectives<sup>1</sup>.

### NEW QUESTION # 187

Which three topics are covered on the first day of the Program Increment (PI) Planning event? (Choose three.)

- A. Team velocity Metrics
- **B. Architecture Vision and development practices**
- **C. Product/Solution Vision**
- **D. Business context**
- E. Ishikawa diagrams
- F. Cumulative flow diagrams

**Answer: B,C,D**

Explanation:

The first day of the Program Increment (PI) Planning event covers several critical topics that align the Agile Release Train (ART) to a shared mission and vision. The key topics covered include:

\* Business Context: This provides the teams with an understanding of the market, the customer needs, and the business objectives that are driving the ART<sup>1</sup>.

\* Product/Solution Vision: The vision is presented to inspire and provide a big-picture view of the product or solution to be developed, setting the stage for the planning activities<sup>1</sup>.

\* Architecture Vision and Development Practices: This includes the presentation of the architectural vision and the development practices that will guide the teams during the PI. It ensures that everyone understands the technical direction and the development guidelines<sup>1</sup>.

These topics are essential for establishing a clear direction and alignment among all team members and stakeholders. They help in building the social network the ART depends upon and aligning development to business goals. The RTE facilitates this event, which includes all members of the ART and occurs within the Innovation and Planning (IP) Iteration<sup>1</sup>. The discussions on these topics enable the teams to create their Iteration plans and objectives for the upcoming PI effectively.

### NEW QUESTION # 188

Which of the Core Competencies of Business Agility includes aligning strategy with execution?

- A. Organizational Agility
- B. Agile Product Delivery
- **C. Lean Portfolio Management**
- D. Lean-Agile Leadership

**Answer: C**

Explanation:

The Core Competency of Business Agility that includes aligning strategy with execution is Lean Portfolio Management. This is verified by the information provided on the SAFe website, which states that Lean Portfolio Management aligns strategy and execution by applying Lean and systems thinking approaches to strategy and investment funding, Agile portfolio operations, and governance 1. This competency enables organizations to align their strategy to execution, ensuring that they create and maintain a portfolio of investments that align with the enterprise's strategic objectives and meet the customer's needs. It involves collaboration between the portfolio stakeholders and Agile Release Trains (ARTs) to develop and implement the strategic themes and Lean budgets that guide the portfolio.

#### NEW QUESTION # 189

A Release Train Engineer (RTE) would like to try a new retrospective technique at the next Inspect and Adapt event. However, the RTE is unsure how to prepare for it and thinks there may be some pitfalls. How could an RTE get help?
