Do not hesitate, Add the TestkingPass's PECB NIS-2-Directive-Lead-Implementer exam training materials to your shopping cart quickly.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q23-Q28):

NEW QUESTION # 23

Scenario 8: FoodSafe Corporation is a well-known food manufacturing company in Vienna, Austria, which specializes in producing diverse products, from savory snacks to artisanal desserts. As the company operates in regulatory environment subject to this NIS 2 Directive, FoodSafe Corporation has employed a variety of techniques for cybersecurity testing to safeguard the integrity and security of its food production processes.

To conduct an effective vulnerability assessment process, FoodSafe Corporation utilizes a vulnerability assessment tool to discover vulnerabilities on network hosts such as servers and workstations. Additionally, FoodSafe Corporation has made a deliberate effort to define clear testing objectives and obtain top management approval during the discovery phase. This structured approach ensures that vulnerability assessments are conducted with clear objectives and that the management team is actively engaged and supports the assessment process, reinforcing the company's commitment to cybersecurity excellence.

In alignment with the NIS 2 Directive, FoodSafe Corporation has incorporated audits into its core activities, starting with an internal assessment followed by an additional audit conducted by its partners. To ensure the effectiveness of these audits, the company meticulously identified operational sectors, procedures, and policies. However, FoodSafe Corporation did not utilize an organized audit timetable as part of its internal compliance audit process. While FoodSafe's Corporation organizational chart does not clearly indicate the audit team's position, the internal audit process is well-structured. Auditors familiarize themselves with established policies and procedures to gain a comprehensive understanding of their workflow. They engage in discussions with employees further to enhance their insights, ensuring no critical details are overlooked.

Subsequently, FoodSafe Corporation's auditors generate a comprehensive report of findings, serving as the foundation for necessary changes and improvements within the company. Auditors also follow up on action plans in response to nonconformities and improvement opportunities.

The company recently expanded its offerings by adding new products and services, which had an impact on its cybersecurity program. This required the cybersecurity team to adapt and ensure that these additions were integrated securely into their existing framework. FoodSafe Corporation commitment to enhancing its monitoring and measurement processes to ensure product quality and operational efficiency. In doing so, the company carefully considers its target audience and selects suitable methods for reporting monitoring and measurement results. This includes incorporating additional graphical elements and labeling of endpoints in their reports to provide a clearer and more intuitive representation of data, ultimately facilitating better decision-making within the organization.

According to scenario 8, internal auditors follow up on action plans in response to nonconformities or improvement opportunities. Is this in alignment with best practices?

- A. Yes, the internal auditor should follow up on action plans submitted in response to nonconformities
- B. Yes, the internal auditor is responsible to track the progress of action plans and make sure they are all implemented immediately
- C. No, the corrections and corrective actions should be reviewed by the information security manager

Answer: A

NEW QUESTION # 24

What is the key difference between Tier 2 and Tier 3 disaster recovery strategies?

- A. Tier 2 mandates dual sites with peer-to-peer connections, whereas Tier 3 focuses on data transfer enhancement
- B. Tier 2 uses couriers to transport data between centers, while Tier 3 uses electronic vaulting of critical data
- C. Tier 2 involves electronic vaulting of critical data, while Tier 3 relies on offsite vaults

Answer: B

NEW QUESTION # 25

During which phase of the key management life cycle can keys be manually adjusted to implement alternative algorithms?

- A. Key rotation
- B. Key generation
- C. Key backup or recovery

Answer: A

NEW QUESTION # 26
