

F5CAB4 Test Study Guide & Reliable F5CAB4 Test Tips

BONUS!!! Download part of Pass4guide F5CAB4 dumps for free: https://drive.google.com/open?id=1RtwlGYAo5B-ka-XdC4-b10XjGD0nKR_t

The F5CAB4 study guide to good meet user demand, will be a little bit of knowledge to separate memory, but when you add them together will be surprised to find a day we can make use of the time is so much debris. The F5CAB4 exam prep can allow users to use the time of debris anytime and anywhere to study and make more reasonable arrangements for their study and life. Choosing our F5CAB4 simulating materials is a good choice for you, and follow our step, just believe in yourself, you can do it perfectly!

The Pass4guide is one of the best platforms that has been helping the F5CAB4 exam candidates for many years. Over this long time period the countless BIG-IP Administration Control Plane Administration F5CAB4 exam candidates have passed their dream F5 F5CAB4 Certification Exam and they have become certified F5 F5CAB4 professionals. All the successful F5 F5CAB4 certification professionals are doing jobs in small, medium, and large size enterprises.

Reliable F5 F5CAB4 Test Tips, Valid F5CAB4 Test Prep

In addition to guarantee that our F5CAB4 exam pdf provided you with the most updated and valid, we also ensure you get access to our F5CAB4 dumps collection easily whenever you want. Our test engine mode allows you to practice our F5CAB4 vce braindumps anywhere and anytime as long as you downloaded our F5CAB4 study materials. Try free download the trial of our website before you buy.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q48-Q53):

NEW QUESTION # 48

What are the recommended methods for forcing a BIG-IP system to standby mode? (Choose two answers)

- A. Active BIG-IP: Configuration Utility > Device Management > Traffic Groups > Local Device (Self) > Force to Standby
- B. Active BIG-IP: CLI > tmsh run /sys failover device standby
- C. Active BIG-IP: Configuration Utility > Device Management > Devices > Local Device (Self) > Force to Standby
- D. Active BIG-IP: CLI > tmsh run /sys failover standby

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

BIG-IP provides two supported and documented methods to manually force a device into standby state in a high-availability (HA) configuration:

CLI method (A):

```
tmsh run /sys failover device standby
```

This is the correct and supported TMSH command to force the local device to transition from active to standby.

Configuration Utility method (B):

Navigating to Device Management > Devices > Local Device (Self) and selecting Force to Standby performs the same operation through the GUI and is fully supported.

Why the other options are incorrect:

C is incorrect: Traffic Groups do not provide a "Force to Standby" option for the local device; traffic groups are used to manage which device owns specific traffic, not to force device-level failover.

D is incorrect: tmsh run /sys failover standby is not a valid TMSH command. The correct syntax requires device standby.

Thus, the correct answers are A and B.

NEW QUESTION # 49

A BIG-IP Administrator must determine if a Virtual Address is configured to fail over to the standby member of a device group. In which area of the Configuration Utility can this be confirmed?

- A. Device Management > Overview
- B. Device Management > Traffic Groups
- C. Local Traffic > Virtual Servers
- D. Device Management > Devices

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: To report the current status of high availability for specific traffic, an administrator must verify the Traffic Group association²⁸. In the Configuration Utility, Virtual Server properties include the Virtual Address settings where the 'Traffic Group' is assigned²⁹²⁹. If the Virtual Address is assigned to a floating traffic group (like traffic-group-1), it is configured to fail over to the standby member³⁰³⁰³⁰.

NEW QUESTION # 50

A BIG-IP Administrator needs to update the license on a BIG-IP device. Where can this be done?

- A. System > License
- B. System > Software Management
- C. System > Platform
- D. Device Management

Answer: A

Explanation:

Managing the license is a primary Control Plane task required to activate software modules and features on a BIG-IP device.

* License Management Utility: All actions related to the device license, including initial activation, renewal, and adding add-on keys,

are performed under the System > License section of the Configuration Utility.

* Procedural Requirements: Licensing often requires the generation of a "dossier," which is a unique encrypted string used by the F5 License Server to generate the final license file.

* Impact on Services: Updating or re-activating a license generally requires a restart of system services (such as the tmm daemon), which will temporarily disrupt traffic processing unless performed on a standby unit in a high availability pair.

* Add-on Licenses: If an administrator needs to increase the capacity of a specific module (like increasing the SSL TPS limit or adding a new module like ASM), the new registration keys are entered through this same interface using the "Re-activate" button.

NEW QUESTION # 51

Administrative user accounts have been defined on the remote LDAP server and are unable to log in to the BIG-IP device. Which log file should the BIG-IP Administrator check to find the related messages? (Choose one answer)

- A. /var/log/tmm
- B. /var/log/user.log
- C. /var/log/messages
- D. /var/log/secure

Answer: D

Explanation:

When BIG-IP is configured to use remote authentication (such as LDAP), all authentication and authorization attempts-including successes and failures-are logged to /var/log/secure.

For LDAP-based administrative login issues, /var/log/secure contains:

- * LDAP authentication failures
- * PAM authentication errors
- * Authorization and access-denied messages
- * Details explaining why a remote user could not log in

Why the other options are incorrect:

- * /var/log/user.log is not a standard BIG-IP log file for authentication.
- * /var/log/tmm logs traffic management events, not user authentication.
- * /var/log/messages contains general system messages but not detailed authentication failure information.

Therefore, the correct log file to troubleshoot LDAP administrative login failures is /var/log/secure.

NEW QUESTION # 52

Administrative user accounts have been defined on the remote LDAP server and are unable to log in to the BIG-IP device. Which log file should the BIG-IP Administrator check to find the related messages? (Choose one answer)

- A. /var/log/tmm
- B. /var/log/user.log
- C. /var/log/messages
- D. /var/log/secure

Answer: D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

When BIG-IP is configured to use remote authentication (such as LDAP), all authentication and authorization attempts-including successes and failures-are logged to /var/log/secure.

For LDAP-based administrative login issues, /var/log/secure contains:

- LDAP authentication failures
- PAM authentication errors
- Authorization and access-denied messages
- Details explaining why a remote user could not log in

Why the other options are incorrect:

- /var/log/user.log is not a standard BIG-IP log file for authentication.
- /var/log/tmm logs traffic management events, not user authentication.
- /var/log/messages contains general system messages but not detailed authentication failure information.

Therefore, the correct log file to troubleshoot LDAP administrative login failures is /var/log/secure.

NEW QUESTION # 53

.....

If you purchasing the F5CAB4 study materials designed by many experts and professors from our company, we can promise that our online workers are going to serve you day and night during your learning period. If you have any questions about our study materials, you can send an email to us, and then the online workers from our company will help you solve your problem in the shortest time. So do not hesitate to buy our F5CAB4 Study Materials.
