## CheckPoint 156-551 Exam Test - 156-551 Practice Tests

This product is enough to get ready for the 156-551 test on the first attempt. Three formats are easy to use and meet the needs of every Check Point Certified VSX Specialist - R81 (CCVS) (156-551) test applicant. The CheckPoint 156-551 practice material's three formats are Desktop practice test software, web-based practice exam, and PDF.

## CheckPoint Check Point Certified VSX Specialist - R81 (CCVS) Sample Questions (Q110-Q115):

### NEW QUESTION # 110

What must be defined when removing a Virtual System using the VSX Provisioning Tool?

- A. Associated policy
- B. VSX Gateway hostname
- **C. VSID**
- D. Object UUID

**Answer: C**

**Explanation:**

To remove a Virtual System using the VSX Provisioning Tool, you must specify its unique VSID.

This ID identifies the Virtual System on the gateway and ensures the correct object is deleted without affecting others.

### NEW QUESTION # 111

What should be verified before performing a vsx\_util delete?

- A. Logs are archived
- B. There are no TCP sessions
- **C. The VS is inactive and policy is removed**
- D. The sync interface is idle

**Answer: C**

Explanation:

Before deleting a VS, ensure it is inactive (disabled) and any associated policy is removed. This prevents issues such as policy enforcement failures or unexpected routing changes on the VSX Gateway.

### NEW QUESTION # 112

Which configuration allows traffic between two Virtual Systems without external routing?

- **A. Connecting both VSs to the same Virtual Switch**
- B. Export/import routes between policy packages
- C. Using NAT between VSs
- D. Use of internal interfaces and physical switch

**Answer: A**

Explanation:

When both VSs are connected to the same Virtual Switch, they can communicate at Layer 2 without involving any physical interfaces or external routing. This is efficient for intra-gateway communication in segmented environments.

### NEW QUESTION # 113

What is the function of the vsx\_util vsls command?

- A. Removes all VSs from a VSX cluster
- **B. Shows how VSs are distributed across cluster members**
- C. Displays log statistics per VS
- D. Synchronizes routing tables

**Answer: B**

Explanation:

vsx\_util vsls displays the current load-sharing status of Virtual Systems across VSX cluster members when VSLs is enabled. This helps verify which node is active for each VS and is essential for performance analysis and failover planning.

### NEW QUESTION # 114

Which routing method is supported in VSX to manage dynamic routing?

- **A. OSPF**
- B. RIP
- C. BGP
- D. Static only

**Answer: A**

Explanation:

VSX supports dynamic routing through the use of OSPF (Open Shortest Path First). It enables Virtual Systems and Virtual Routers to exchange routing information with external peers, ensuring scalability and dynamic route updates in large or changing environments.

## NEW QUESTION # 115

.....

Our 156-551 practice quiz will provide three different versions, the PDF version, the software version and the online version. The trait of the software version of our 156-551 exam dump is very practical. Although this version can only be run on the windows operating system, the software version our 156-551 Guide materials is not limited to the number of computers installed, you can install the software version in several computers. So you will like the software version, of course, you can also choose other versions of our 156-551 study torrent if you need.
