Pegasystems PEGACPBA24V1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Case Management: This domain targets Case Designers and Process Architects and explores designing a case lifecycle, including setting case statuses and adding instructions for tasks. Candidates demonstrate ability to configure service level agreements with urgency, goals, and deadlines, and manage routing of assignments to users, work groups, or queues. This section also includes configuring email correspondence, identifying duplicate cases, adding optional actions and automating workflow decisions using conditions. Candidates learn to pause and resume case processing, skip stages or processes, configure child cases, use automation shapes appropriately, and create and manage user teams.

Topic 2	<ul style="list-style-type: none"> • User Experience: This domain assesses skills of UX Designers and Frontend Developers in configuring user interface elements. Candidates learn to group fields to create views, add or remove fields, configure portal content, adjust form appearance, visibility, and controls for an improved user experience.
Topic 3	<ul style="list-style-type: none"> • Reporting: This domain measures reporting capabilities of Reporting Analysts and Data Visualization Specialists. Candidates learn the benefits of using Insights, creating visualizations with tables and charts, and utilizing columns and filters for effective data representation.
Topic 4	<ul style="list-style-type: none"> • Application Development: This section evaluates skills of Pega Business Architects and Developers in application development. It covers the roles and skills of a Pega Business Architect, identification of project stakeholders, and benefits of Pega's Center-out™ business architecture. Candidates learn about App Studio's value, understand rules, rulesets, classes, and the role of generative AI. The domain also covers Pega's CI • CD pipeline with Deployment Manager, use of collaboration tools, managing application development with user stories, feedback, and bug tracking, and using tools like Case Type Backlog and Estimator for project scoping.

* Pega Academy,Business Architect '23 Mission; CPBA Study Guide 8.8, Data Transforms; Pega Help, Configuring Data Transforms.

NEW QUESTION # 78

In a job application case, a hiring manager needs to receive an automatic email notification when the case reaches a Collect Work Sample assignment. How would you configure this correspondence requirement?

Response:

- A. After the assignment add a SendEmail SmallShape.
- **B. Enable assignment notifications for the case type.**
- C. Add a SendCorrespondence local action to the assignment.
- D. Before the assignment add a SendEmail SmartShape.

Answer: B

NEW QUESTION # 79

Which two statements about data records are true? (Choose Two)

- **A. Data records are displayed in a drop-down list by default.**
- **B. Data records define permissible values for data fields.**
- C. Data records require external storage.
- D. Data records need unique, user-generated IDs.

Answer: A,B

Explanation:

Data records are displayed in a drop-down list by default: This is true because Pega displays data records in drop-down lists to facilitate user selection.

* Pega Academy, Data Management, Data Records and Drop-down Lists.

Data records define permissible values for data fields: This is true because data records are used to define the set of permissible values for a particular field.

Reference: Pega Academy, Data Management, Data Validation.

NEW QUESTION # 80

In Designer Studio, the Application Explorer displays _____.

Response:

- A. the class structure only
- B. all the rules used by all applications
- **C. the class tree and rules organized by the classes they apply to**
- D. the data structure only

Answer: C

NEW QUESTION # 81

You are configuring a declarative network that contains eleven declare expressions to calculate the interest rate for a home mortgage. For example, the target value Property Tax Assessment is used as a source value when calculating the Assessed Property Value. The declare expressions use target values from other expressions to calculate their target values.

The field that displays the interest rate appears on the approval form. To improve performance, how can you reduce the number of calculations?

Response:

- A. Calculate the total interest rate value by adding all the declare expression target property values.
- B. Apply the declare expression in the approval flow action.
- C. Specify Property Tax Assessment as trigger event in the declare expression that calculates the total interest rate value.
- **D. Specify whenever used in the total interest rate declare expression**

Answer: D
