

CWAP-405 Download Free Dumps, Test CWAP-405 Dumps.zip

The image shows a screenshot of the CWNP CWAP-405 Certification Syllabus. It features a table with two columns: 'Topic' and 'Weight'. The topics and their weights are: Protocol Analysis (15%), Spectrum Analysis (10%), PHY Layers and Technologies (10%), MAC Sublayer and Functions (25%), WLAN Medium Access (10%), and 802.11 Frame Exchanges (30%). At the bottom of the screenshot, there is a small text that reads '100% Guaranteed Success with NWExam.com'.

Topic	Weight
Protocol Analysis	15%
Spectrum Analysis	10%
PHY Layers and Technologies	10%
MAC Sublayer and Functions	25%
WLAN Medium Access	10%
802.11 Frame Exchanges	30%

What's more, part of that GetValidTest CWAP-405 dumps now are free: <https://drive.google.com/open?id=15uibebCQS8diSUK9LuVMeFzgNzgXXba>

Three versions for CWAP-405 training materials are available, you can choose one you like according to your own needs. All three versions have free demo for you to have a try. CWAP-405 PDF version is printable and you can learn them anytime and anyplace. CWAP-405 Soft test engine can stimulate the real exam environment, so that you can know the procedures for the exam, and your confidence for CWAP-405 Exam Materials will also be improved. CWAP-405 Online test engine is convenient and easy to learn, it has testing history and performance review, and you can have a general review of what you have learned by this version.

Preparation for the professional Certified Wireless Analysis Professional (CWAP-405) exam is no more difficult because experts have introduced the preparatory products. With GetValidTest products, you can pass the Certified Wireless Analysis Professional (CWAP-405) exam on the first attempt. If you want a promotion or leave your current job, you should consider achieving a professional certification like Certified Wireless Analysis Professional (CWAP-405) exam.

Test CWAP-405 Dumps.zip | CWAP-405 Best Vce

You can invest safely spend your money to get CWAP-405 exam preparation products with as we provide money back guarantee. If you won't pass the actual CWAP-405 exam, after using the GetValidTest practice test or PDF questions and answers booklet useful for preparing the CWAP-405 exam version, you can get the money back. We offer a free trial also, so that you can check the quality and working of CWAP-405 Exam Practice test software. In case, you have prepared the CWAP-405 exam with our products and did not pass the exam we will reimburse your money.

CWNP Certified Wireless Analysis Professional Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which one of the following statements is not true concerning DTIMs?

- A. DTIM stands for Delivery Traffic Indication Map
- **B. Every Beacon frame must contain a DTIM**
- C. The DTIM interval can dictate when an STA will wake up to listen to beacon frames
- D. Buffered Broadcast and Multicast traffic will be transmitted following a DTIM

Answer: B

Explanation:

Every Beacon frame must contain a DTIM is not a true statement concerning DTIMs. DTIM stands for Delivery Traffic Indication Message, and it is a subfield within the TIM (Traffic Indication Map) element in a Beacon frame. The DTIM indicates how many

Beacon frames (including the current one) will appear before the next DTIM. For example, if the DTIM interval is set to 3, it means that every third Beacon frame will contain a DTIM. Buffered broadcast and multicast traffic will be transmitted following a DTIM, so that STAs in power save mode can wake up and receive them. The DTIM interval can also dictate when an STA will wake up to listen to Beacon frames, as some STAs may choose to only listen to Beacon frames that contain a DTIM. References: CWAP-405 Certified Wireless Analysis Professional Study and Reference Guide, Chapter 6: MAC Sublayer Frame Exchanges, page 200; CWAP-405 Certified Wireless Analysis Professional Study and Reference Guide, Chapter 6: MAC Sublayer Frame Exchanges, page 201.

NEW QUESTION # 42

Which common feature of a Spectrum Analyzer would be the best to help you locate a non-802.11 interference source?

- A. Location filter
- B. Max hold
- C. Min hold
- **D. Device finder**

Answer: D

Explanation:

The device finder is a common feature of a spectrum analyzer that helps locate a non-802.11 interference source. The device finder uses a directional antenna to measure the signal strength of a specific frequency or signal source. By pointing the antenna in different directions, the device finder can indicate the direction and distance of the interference source. The device finder can also filter out other signals that are not related to the interference source. The other options are not correct, as they do not help locate a non-802.11 interference source. Max hold and min hold are features that show the maximum and minimum RF power levels over time, respectively. Location filter is a feature that filters out signals that are not from a specific location or area. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 3: Spectrum Analysis, page 77-78

NEW QUESTION # 43

What is encrypted within the third message of the 4-Way Handshake?

- A. PMK
- **B. GTK**
- C. PTK
- D. GMK

Answer: B

Explanation:

The GTK (Group Temporal Key) is encrypted within the third message of the 4-Way Handshake. The 4-Way Handshake is a process that establishes a secure connection between a STA (station) and an AP (access point) using WPA2 (Wi-Fi Protected Access 2), which is a security protocol that uses AES-CCMP (Advanced Encryption Standard-Counter Mode CBC-MAC Protocol) as its encryption algorithm. The 4-Way Handshake consists of four messages that are exchanged between the STA and the AP. The first message is sent by the AP to the STA, containing the ANonce (Authenticator Nonce), which is a random number generated by the AP. The second message is sent by the STA to the AP, containing the SNonce (Supplicant Nonce), which is a random number generated by the STA, and the MIC (Message Integrity Code), which is a value that verifies the integrity of the message. The third message is sent by the AP to the STA, containing the GTK, which is a key that is used to encrypt and decrypt multicast and broadcast data frames, and the MIC. The GTK is encrypted with the KEK (Key Encryption Key), which is derived from the PTK (Pairwise Temporal Key).

The PTK is a key that is used to encrypt and decrypt unicast data frames, and it is derived from the PMK (Pairwise Master Key), the ANonce, and the SNonce. The fourth message is sent by the STA to the AP, containing only the MIC, to confirm the completion of the 4-Way Handshake. The other options are not correct, as they are not encrypted within the third message of the 4-Way Handshake. The PMK is a key that is derived from a passphrase or obtained from an authentication server, and it is not transmitted in any message of the 4-Way Handshake. The PTK is a key that is derived from the PMK, the ANonce, and the SNonce, and it is not transmitted in any message of the 4-Way Handshake. The GMK (Group Master Key) is a key that is generated by the AP and used to derive the GTK, and it is not transmitted in any message of the 4-Way Handshake. NEW QUESTION # 44

Which one of the following is an advantage of using display filters that is not an advantage of capture-time filters?

- A. Multiple of them can be applied simultaneously
- B. They allow for focused analysis on just the packets of interest
- C. They only hide the packets from view and the filtered packets can be enabled for view later
- D. Once created they are reusable for later captures

Answer: C

Explanation:

Display filters are applied after the capture is completed and they only hide the packets from view. The filtered packets are still present in the capture file and can be enabled for view later by changing or removing the display filter. This is an advantage over capture-time filters, which discard the packets that do not match the filter criteria and cannot be recovered later.

NEW QUESTION # 45

Which one of the following is not an 802.11 Management frame?

- A. Action
- B. Authentication
- C. Beacon
- D. PS-Poll

Answer: D

Explanation:

A PS-Poll (Power Save Poll) frame is not an 802.11 management frame. A PS-Poll frame is a type of control frame that is used by a STA in power save mode to request data frames from an AP. A STA in power save mode can conserve battery power by periodically sleeping and waking up. When a STA sleeps, it cannot receive any data frames from the AP, so it informs the AP of its power save status by setting a bit in its MAC header. The AP then buffers any data frames destined for the sleeping STA until it wakes up. When a STA wakes up, it sends a PS-Poll frame to the AP, indicating its association ID and requesting any buffered data frames. The AP then responds with one or more data frames, followed by an ACK or BA frame from the STA. The other options are not correct, as they are types of 802.11 management frames. An Action frame is used to perform various management actions, such as spectrum management, QoS management, radio measurement, etc. A Beacon frame is used to advertise the presence and capabilities of an AP or BSS. An Authentication frame is used to establish or terminate an authentication relationship between a STA and an AP. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 6: 802.11 Frame Exchanges, page 169-170

NEW QUESTION # 46

.....

The CWAP-405 online exam simulator is the best way to prepare for the CWAP-405 exam. GetValidTest has a huge selection of CWAP-405 dumps and topics that you can choose from. The CWNP Exam Questions are categorized into specific areas, letting you focus on the CWAP-405 subject areas you need to work on. Additionally, CWNP CWAP-405 exam dumps are constantly updated with new CWAP-405 questions to ensure you're always prepared for CWAP-405 exam.

Test CWAP-405 Dumps.zip: <https://www.getvalidtest.com/CWAP-405-exam.html>

Like actual certification exams, our Practice Tests are in multiple-choice (MCQs) Our CWNP CWAP-405 Exam will provide you with exam questions with verified answers that reflect the actual exam, We have the most amazing aftersales services which have covered all necessities you may need, so just trust our CWAP-405 verified answers, All the experts in our company are devoting all of their time to design the best CWAP-405test question for all people.

This is ahead of the ceremony, As for its advantages, CWAP-405 here have many things to say, Like actual certification exams, our Practice Tests are in multiple-choice (MCQs) Our CWNP CWAP-405 Exam will provide you with exam questions with verified answers that reflect the actual exam.

Certified Wireless Analysis Professional dumps torrent & CWAP-405 exam pdf & Certified Wireless Analysis Professional study practice

We have the most amazing aftersales services which have covered all necessities you may need, so just trust our CWAP-405 verified answers, All the experts in our company are devoting all of their time to design the best CWAP-405 test question for all people.

As you all know that the Certified Wireless Analysis Professional (CWAP-405) exam is the most challenging exam, since it's difficult to find preparation material for passing the CWNP CWAP-405 exam.

There are thousands of candidates choose to trust us and get paid.
