You can see our ICWIM exam materials have three version, including PDF version, APP version and soft version, the PDF version support printing. You can free download part of ICWIM simulation test questions and answers of ICWIM exam dumps and print it, using it when your eyes are tired. It is more convenient for you to look and read while protect our eye. If you print the ICWIM exam materials out, you are easy to carry it with you when you out, it is to say that will be a most right decision to choose the ICWIM, you will never regret it.

CISI International Certificate in Wealth & Investment Management Sample Questions (Q19-Q24):

NEW QUESTION # 19

In the FX market standard spot settlement is:

- A. T+5
- B. T+3
- C. T+2
- D. T+10

Answer: C

Explanation:

In foreign exchange markets, spot refers to an exchange of two currencies for delivery on a standard settlement date rather than immediate delivery. The market convention for most major currency pairs is settlement two business days after the trade date,

described as T+2. This convention exists to allow sufficient time for the confirmation of trade details, netting processes where relevant, and the movement of funds through payment systems across different jurisdictions and time zones. The key exam point is that FX spot is not same-day settlement; it is a defined market standard. While there are notable exceptions for certain currency pairs where local market practice differs, the standard convention tested is T+2 for spot FX.

Understanding settlement conventions is important because it affects cash management, funding, and settlement risk, especially when FX is used to support securities transactions that may have their own settlement cycles. In an advice and investment operations context, knowing the standard spot cycle helps avoid failed settlements and supports accurate valuation and liquidity planning.

NEW QUESTION # 20

How does 'relief at source' normally operate in relation to overseas dividend income?

- A. A staggering of the tax levy is granted
- B. A credit is applied against a separate tax liability
- C. A reduced rate of withholding tax is levied
- D. A tax rebate is paid in cash

Answer: C

Explanation:

Relief at source for overseas dividend income typically operates by reducing the withholding tax applied to dividends at the source.

This is achieved through double taxation agreements (DTAs) between countries, which set out reduced tax rates for such income.

Example: If the standard withholding tax rate in a country is 30%, a DTA may reduce this to 15% for eligible investors.

NEW QUESTION # 21

The concept of the Sharpe ratio is to measure the:

- A. Ability of the fund manager in different scenarios
- B. Effect the annual charge has on fund performance
- C. Amount of performance attributable to a benchmark
- D. Return above a risk-free rate

Answer: D

Explanation:

* Sharpe Ratio Defined

* The Sharpe ratio measures risk-adjusted return, specifically the excess return over the risk-free rate per unit of volatility.

* Formula: $\text{Sharpe Ratio} = \frac{\text{Portfolio Return} - \text{Risk-Free Rate}}{\text{Standard Deviation of Portfolio Returns}}$

$\text{Sharpe Ratio} = \frac{\text{Portfolio Return} - \text{Risk-Free Rate}}{\text{Standard Deviation of Portfolio Returns}}$

* Why the Answer is B

* The ratio quantifies the return generated for each unit of risk taken, relative to the risk-free rate.

* Why Other Options are Incorrect

* A. Benchmark performance: The Sharpe ratio does not measure performance relative to a benchmark.

* C. Annual charge effect: Unrelated to fund expenses.

* D. Manager ability: Focuses on risk-adjusted returns, not managerial skill.

* ICWIM Study Guide, Chapter on Risk-Adjusted Metrics: Explains the Sharpe ratio.

* Portfolio Management Literature: Highlights its use in assessing performance.

References Thus, the correct answer is B. Return above a risk-free rate.

NEW QUESTION # 22

How would an active fund manager seek to avoid underperforming their peer group when deciding on asset allocation?

- A. By assessing the prospects for each main asset class
- B. By hedging currency and market risk
- C. Through the use of asset allocation by consensus
- D. Through the use of quantitative models

Answer: C

Explanation:

* Active Fund Management

* Active fund managers aim to outperform or avoid underperforming their peers by dynamically managing asset allocation.

* Asset allocation by consensus ensures alignment with the strategies and expectations of the broader investment community, minimizing the risk of significant divergence from the peer group.

* Why the Answer is A

* Using consensus-driven allocation avoids extreme deviations in performance relative to peers, which is key for managers seeking to maintain competitive performance.

* Why Other Options are Incorrect

* B. Assessing prospects: This involves market analysis but does not specifically address peer performance.

* C. Hedging risks: Focuses on risk management, not peer alignment.

* D. Quantitative models: Useful for analysis but not tailored to peer group considerations.

* ICWIM Study Guide, Chapter on Portfolio Management: Discusses consensus-driven asset allocation.

* Active Fund Management Literature: Highlights peer-relative performance strategies.

References Thus, the correct answer is A. Through the use of asset allocation by consensus.

NEW QUESTION # 23

Setting standards for national anti-money laundering (AML) and counter-terrorist financing (CTF) programs and evaluating how effectively member countries have implemented the standards is the role of which of the following?

- **A. Financial Action Task Force (FATF)**
- B. National Crime Agency
- C. International Monetary Fund (IMF)
- D. Interpol

Answer: A

Explanation:

The Financial Action Task Force (FATF) is an intergovernmental organization that sets global AML/CTF standards and assesses compliance.

Why is Option C Correct?

FATF develops recommendations that countries must implement to combat money laundering and terrorist financing.

It conducts peer reviews and blacklists non-compliant nations.

Why Not Other Options?

A (IMF) # The IMF monitors economic stability, not AML enforcement.

B (Interpol) # Handles criminal investigations, not financial regulations.

D (National Crime Agency) # The NCA is UK-specific, while FATF is global.

Reference: FATF Guidelines, CISI Wealth & Investment Management.

NEW QUESTION # 24

.....

After undergoing a drastic change over these years, our ICWIM actual exam have been doing perfect job in coping with the exam. Up to now our ICWIM practice materials account for 60 percent of market share in this line for their efficiency and accuracy when dealing with the exam. With the best reputation in the market our ICWIM Training Materials can help you ward off all unnecessary and useless materials and spend all your limited time on practicing most helpful questions.
