# Nutanix NCP-DB-6.10 Exam Questions For Guaranteed Success

To upgrade skills, hundreds of candidates attempt the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) certification exam and try to be smart and more efficient than the rest. In that case, they are now finding ways by which they can get help to crack the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) certification exams. Let's discuss the sources that can prove to be a major help if you are planning to take the exam.

For candidates who are going to attend the exam, the pass rate is quite important. NCP-DB-6.10 training materials of us are pass guaranteed, and if you can't pass the exam one time, we are money back guaranteed. Besides NCP-DB-6.10 training materials are verified by skilled experts, therefore the quality and accuracy can be guaranteed, and you can use the NCP-DB-6.10 Exam Dumps at ease. We also have online and offline chat service stuff, if any other questions, please contact us, we will give a reply to you as quickly as possible.

Nutanix In-Depth Explanations of NCP-DB-6.10 exam success

By analyzing the syllabus and new trend, our NCP-DB-6.10 practice engine is totally in line with this exam for your reference. So grapple with this chance, our NCP-DB-6.10 learning materials will not let you down. With our NCP-DB-6.10 Study Guide, not only that you can pass you exam easily and smoothly, but also you can have a wonderful study experience based on the diversed versions of our NCP-DB-6.10 training prep.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q256-Q261):

NEW QUESTION # 256
Which disk is omitted from a Software Profile?

- A. System Database
- B. SQL Installation
- C. System Page File
- D. User Database

Answer: C

Explanation:
According to the Nutanix Database Automation (NCP-DB) course, a Software Profile is a template that defines the configuration of the database engine, such as the version, edition, features, and parameters. It also specifies the disk layout for the database installation, such as the size, type, and mount point of each disk. However, the System Page File disk is omitted from the Software Profile, as it is automatically created by the NDB service based on the memory size of the database server VM. The other options are included in the Software Profile, as they are essential for the database operation and performance.

NEW QUESTION # 257
Because of a cost reduction program, many Microsoft SQL server instances will be consolidated on DB server VMs managed by NDB using a medium compute profile. Database administrators are concerned about DB storage capacity and are looking to expand it.
Which NDB task should be performed?

- A. Scale the source database.
- B. Update the compute profile.
- C. Update the Database server VMs.
- D. Expand vDisk in Prism Element.

Answer: C

Explanation:
When consolidating Microsoft SQL Server instances on database server VMs managed by NDB using a medium compute profile, concerns about DB storage capacity can arise due to increased demand. In NDB, the appropriate task to address this is to "Update the Database Server VMs," which allows the administrator to adjust resource allocations, including storage capacity, for the VMs hosting the databases. This task can be performed within the NDB interface to expand disk space or reconfigure storage settings without altering the compute profile or requiring external tools.

NEW QUESTION # 258
A clone needs to be created on an existing database server, but there are no Authorized database servers defined to support the cloned database.
In which two ways can Database Server VMs be authorized during a Clone Create operation?
(Choose two.)

- A. Within the Database Server VM Summary window, update the database sever to be authorized for supporting cloned databases.
- B. During the database server provisioning process, flag the database server to be authorized for supporting cloned databases.
- C. Within Time Machine, use the Actions menu and Authorize Database Server VMs to identify which database server VMs to authorize for clones.
- D. During the Clone creation process, click the plus icon to authorize one or more database server VMs.

Answer: C,D

Explanation:
When creating a clone on an existing database server but no Authorized database servers are defined to support the cloned database, the administrator must authorize the necessary Database Server VMs. Two valid methods exist within NDB: (1) Using the Time Machine interface, the administrator can navigate to the Actions menu and select "Authorize Database Server VMs" to designate specific VMs for clone support, providing a proactive authorization step. (2) During the Clone creation process, the wizard includes an option (e.g., a plus icon) to authorize one or more database server VMs on the fly, streamlining the process if authorization is needed mid- operation.

NEW QUESTION # 259
An administrator was asked to change the snapshot schedule for a given database. The administrator discovered that the time machine is in a paused state.
How should the administrator change the schedule?

- A. Clone the database and define an appropriate schedule for the clone.
- B. Select the Time Machine; under Action select Update end define an appropriate schedule.
- C. Select Time Machine: Under actions Resume the Time Machine and then Update to define an appropriate schedule.
- D. Clone the Time Machine and define an appropriate schedule for the clone.

Answer: B

Explanation:
According to the Nutanix Database Automation (NCP-DB) learning documents, an administrator can change the snapshot schedule for a given database by selecting the Time Machine, then under Action, select Update and define an appropriate schedule. This is

because the Time Machine in Nutanix Era allows you to specify the number of backups or snapshots the time machine should take, the time of day it takes those snapshots, and the day of the week it takes weekly or monthly backups. These options help you build a complete schedule of time machine capture operations. Even if the Time Machine is in a paused state, the administrator can still update the schedule. Cloning the Time Machine or the database is not necessary for changing the snapshot schedule.

NEW QUESTION # 260
What is the first step to add Time Machine (TM) data access to a Nutanix cluster?

- A. Disable multi-cluster in ND8.
- B. Delete the TM data from the source database.
- C. Register the required Nutanix clusters in ND8.
- D. Enable multi-cluster in NDB.

Answer: C

Explanation:
To add Time Machine data access to a Nutanix cluster, the first step is to register the cluster in NDB. This will allow NDB to discover and manage the databases and snapshots on the cluster.
You can register multiple Nutanix clusters in NDB using the Add Cluster option in the NDB settings page. You can also specify the cluster role, such as source, target, or both, depending on the data access and replication needs. Enabling or disabling multi-cluster in NDB is not the first step, as this is a global setting that affects the entire NDB instance. Deleting the TM data from the source database is not the first step, as this will remove the data protection and availability of the database.

NEW QUESTION # 261
......

We understand your itching desire of the exam. Do not be bemused about the exam. We will satisfy your aspiring goals. Our NCP-DB-6.10 real questions are high efficient which can help you pass the exam during a week. We just contain all-important points of knowledge into our NCP-DB-6.10 latest material. And we keep ameliorate our NCP-DB-6.10 latest material according to requirements of NCP-DB-6.10 exam. Besides, we arranged our NCP-DB-6.10 Exam Prep with clear parts of knowledge. You may wonder whether our NCP-DB-6.10 real questions are suitable for your current level of knowledge about computer, as a matter of fact, our NCP-DB-6.10 exam prep applies to exam candidates of different degree. By practicing and remember the points in them, your review preparation will be highly effective and successful.

NCP-DB-6.10 New Dumps Ebook: https://www.examcollectionpass.com/Nutanix/NCP-DB-6.10-practice-exam-dumps.html

With this computer-based program, you may automate the entire Nutanix NCP-DB-6.10 New Dumps Ebook exam testing procedure, We are sure that our NCP-DB-6.10 updated questions will enable you to crack the Nutanix NCP-DB-6.10 test in one go, Nowadays, there are more and more people realize the importance of NCP-DB-6.10, because more and more enterprise more and more attention it, This is a mutually beneficial learning platform, that's why our NCP-DB-6.10 study materials put the goals that each user has to achieve on top of us, our loyal hope that users will be able to get the test NCP-DB-6.10 certification, make them successful, and avoid any type of unnecessary loss and effortless harvesting that belongs to their success.

How to create project plans and schedules, The most commonly used devices NCP-DB-6.10 are mobile phones and hands-free headsets, With this computer-based program, you may automate the entire Nutanix exam testing procedure.

Get 365 Days Free Updates For Nutanix NCP-DB-6.10 Dumps at 25% Discount

We are sure that our NCP-DB-6.10 updated questions will enable you to crack the Nutanix NCP-DB-6.10 test in one go, Nowadays, there are more and more people realize the importance of NCP-DB-6.10, because more and more enterprise more and more attention it.

This is a mutually beneficial learning platform, that's why our NCP-DB-6.10 study materials put the goals that each user has to achieve on top of us, our loyal hope that users will be able to get the test NCP-DB-6.10 certification, make them successful, and avoid any type of unnecessary loss and effortless harvesting that belongs to their success.

This Nutanix NCP-DB-6.10 Exam Questions pdf file format is simple to use and can be accessed on any device, including a desktop, tablet, laptop, Mac, or smartphone.
