# Free PDF 2026 Perfect Microsoft DP-700: Valid Test Implementing Data Engineering Solutions Using Microsoft Fabric Experience

What's more, part of that FreeDumps DP-700 dumps now are free: https://drive.google.com/open?id=1pcEwR8oId6QJTBPL7tnrWJpxrrtI2c1h

It is really not easy to pass DP-700 exam, but once you get the exam certification, it is not only a proof of your ability, but also an internationally recognised passport for you. You cannot blindly prepare for DP-700 exam. Our FreeDumps technical team have developed the DP-700 Exam Review materials in accordance with the memory learning design concept, which will relieve your pressure from the preparation for DP-700 exam with scientific methods.

On a regular basis, we update the PDF version to improve the DP-700 Questions and accurately reflect any changes that have been made to the test content. We know that Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) certification exam costs can be high, with registration fees often running between $100 and $1000. We provide a free demo version of our product to ensure you are completely satisfied with our Microsoft Certification Exams preparation material. The purpose of this free demo is to help you make a well-informed decision.

Top Valid Test DP-700 Experience | High-quality Microsoft Latest DP-700 Exam Fee: Implementing Data Engineering Solutions Using Microsoft Fabric

Using the DP-700 Study Materials, you will find that you can grasp the knowledge what you need in the exam in a short time. Because users only need to spend little hours on the DP-700 study materials, our learning materials will help users to learn all the difficulties of the test site, to help users pass the qualifying examination and obtain the qualification certificate. If you think that time is important to you, try our learning materials and it will save you a lot of time.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q84-Q89):

NEW QUESTION # 84
HOTSPOT
You have a Fabric workspace that contains a warehouse named Warehouse1. Warehouse1 contains the following tables and columns.

You need to denormalize the tables and include the ContractType and StartDate columns in the Employee table. The solution must meet the following requirements:
Ensure that the StartDate column is of the date data type.
Ensure that all the rows from the Employee table are preserved and include any matching rows from the Contract table.
Ensure that the result set displays the total number of employees per contract type for all the contract types that have more than two employees.

How should you complete the statement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 85

You have a Fabric workspace that contains a lakehouse named Lakehouse1. Data is ingested into Lakehouse1 as one flat table. The table contains the following columns.

You plan to load the data into a dimensional model and implement a star schema. From the original flat table, you create two tables named FactSales and DimProduct. You will track changes in DimProduct.
You need to prepare the data.
Which three columns should you include in the DimProduct table? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. ProductName
- B. TransactionID
- C. Date
- D. SalesAmount
- E. ProductID
- F. ProductColor

Answer: A,E,F

Explanation:
In a star schema, the DimProduct table serves as a dimension table that contains descriptive attributes about products. It will provide context for the FactSales table, which contains transactional data. The following columns should be included in the DimProduct table:
ProductName: The ProductName is an important descriptive attribute of the product, which is needed for analysis and reporting in a dimensional model.
ProductColor: ProductColor is another descriptive attribute of the product. In a star schema, it makes sense to include attributes like color in the dimension table to help categorize products in the analysis.
ProductID: ProductID is the primary key for the DimProduct table, which will be used to join the FactSales table to the product dimension. It's essential for uniquely identifying each product in the model.

NEW QUESTION # 86

You have a Fabric workspace named Workspace1 that contains a data pipeline named Pipeline1 and a lakehouse named Lakehouse1.
You have a deployment pipeline named deployPipeline1 that deploys Workspace1 to Workspace2.
You restructure Workspace1 by adding a folder named Folder1 and moving Pipeline1 to Folder1.
You use deployPipeline1 to deploy Workspace1 to Workspace2.
What occurs to Workspace2?

- A. Folder1 is created, Pipeline1 moves to Folder1, and Lakehouse1 is deployed.
- B. Folder1 is created, and Pipeline1 and Lakehouse1 move to Folder1.
- C. Only Folder1 is created and Pipeline1 moves to Folder1.
- D. Only Pipeline1 and Lakehouse1 are deployed.

Answer: A

Explanation:
When you restructure Workspace1 by adding a new folder (Folder1) and moving Pipeline1 into it, deployPipeline1 will deploy the entire structure of Workspace1 to Workspace2, preserving the changes made in Workspace1. This includes:
Folder1 will be created in Workspace2, mirroring the structure in Workspace1.
Pipeline1 will be moved into Folder1 in Workspace2, maintaining the same folder structure.
Lakehouse1 will be deployed to Workspace2 as it exists in Workspace1.

NEW QUESTION # 87

You have an Azure key vault named KeyVaultl that contains secrets.

You have a Fabric workspace named Workspace-!. Workspace! contains a notebook named Notebookl that performs the following tasks:

* Loads stage data to the target tables in a lakehouse
* Triggers the refresh of a semantic model

You plan to add functionality to Notebookl that will use the Fabric API to monitor the semantic model refreshes. You need to retrieve the registered application ID and secret from KeyVaultl to generate the authentication token.

Solution: You use the following code segment:

Use notebookutils.credentials.getSecret and specify the key vault URL and key vault secret. Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION # 88

You have a Fabric deployment pipeline that uses three workspaces named Dev, Test, and Prod.

You need to deploy an eventhouse as part of the deployment process.

What should you use to add the eventhouse to the deployment process?

- A. GitHub Actions
- B. an Azure DevOps pipeline
- C. a deployment pipeline

Answer: C

Explanation:

A deployment pipeline in Fabric is designed to automate the process of deploying assets (such as reports, datasets, eventhouses, and other objects) between environments like Dev, Test, and Prod. Since you need to deploy an eventhouse as part of the deployment process, a deployment pipeline is the appropriate tool to move this asset through the different stages of your environment.

NEW QUESTION # 89

......

where ever you travel you can prepare simultaneously.

It is acknowledged that there are numerous DP-700 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself.
