

# Actual4test F5 F5CAB3 Desktop-based Practice Test Software

Our to-the-point and trustworthy F5 BIG-IP Administration Data Plane Configuration Exam Questions in three formats for the BIG-IP Administration Data Plane Configuration (F5CAB3) certification exam will surely assist you to qualify for F5 F5CAB3 certification. Do not underestimate the value of our F5 F5CAB3 Exam Dumps because it is the make-or-break point of your career. Therefore, make the most of this opportunity of getting these superb exam questions for the Financials in F5 F5CAB3 certification exam.

Do you still have doubts about the quality of the F5 F5CAB3 product? No worries. Visit Actual4test and download a free demo of F5 Certification Exams for your pre-purchase mental satisfaction. Moreover, the F5 F5CAB3 product of Actual4test is available at an affordable price.

## Quiz 2026 F5 F5CAB3: BIG-IP Administration Data Plane Configuration – Efficient Exam Dumps Demo

We guarantee most F5CAB3 exam bootcamp materials are the latest version which is edited based on first-hand information. Our educational experts will handle this information skillfully and publish high passing-rate F5CAB3 test preparation materials professionally. Our high quality can make you rest assured. Besides, we provide one year free updates and one year service

warranty, you don't need to worry too much if how long our F5CAB3 Exam Guide will be valid. Once we release new version you can always download free within one year.

## F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q41-Q46):

### NEW QUESTION # 41

All pool members are online. All other virtual server settings are at default.

What might alter the load balancing behavior? (Choose one answer)

- A. Adding a persistence profile
- B. Enabling a fallback host in the HTTP profile
- C. Enabling SNAT automap
- D. Adding a OneConnect profile

**Answer: A**

Explanation:

By default, BIG-IP load balancing algorithms (such as Round Robin) distribute connections evenly across all available pool members. However, persistence profiles override normal load balancing decisions by forcing subsequent connections from a client to be sent to the same pool member.

According to the BIG-IP Administration: Data Plane Configuration documentation:

- \* Persistence creates a client-to-server mapping that is honored before load balancing algorithms are applied.
- \* When persistence is enabled, BIG-IP may repeatedly select the same pool member even if others are available.
- \* This directly alters load balancing behavior.

Why the other options are incorrect:

- \* A. Adding a OneConnect profileOneConnect optimizes server-side TCP connections but does not change which pool member is selected.
- \* B. Enabling SNAT automapSNAT affects source address translation, not pool member selection.
- \* C. Enabling a fallback host in the HTTP profileA fallback host is only used when no pool members are available.

Correct Resolution:

Adding a persistence profile alters load balancing behavior by maintaining client affinity to a specific pool member.

### NEW QUESTION # 42

All pool members are online. All other virtual server settings are at default.

What might alter the load balancing behavior? (Choose one answer)

- A. Adding a persistence profile
- B. Enabling a fallback host in the HTTP profile
- C. Enabling SNAT automap
- D. Adding a OneConnect profile

**Answer: A**

Explanation:

By default, BIG-IP load balancing algorithms (such as Round Robin) distribute connections evenly across all available pool members. However, persistence profiles override normal load balancing decisions by forcing subsequent connections from a client to be sent to the same pool member.

According to the BIG-IP Administration: Data Plane Configuration documentation:

Persistence creates a client-to-server mapping that is honored before load balancing algorithms are applied.  
When persistence is enabled, BIG-IP may repeatedly select the same pool member even if others are available.

This directly alters load balancing behavior.

Why the other options are incorrect:

A . Adding a OneConnect profileOneConnect optimizes server-side TCP connections but does not change which pool member is selected.

B . Enabling SNAT automapSNAT affects source address translation, not pool member selection.

C . Enabling a fallback host in the HTTP profileA fallback host is only used when no pool members are available.

Correct Resolution:

Adding a persistence profile alters load balancing behavior by maintaining client affinity to a specific pool member.

#### NEW QUESTION # 43

A BIG-IP Administrator configures an SSH pool with five members.  
Which health monitor should be applied?

- A. UDP
- **B. TCP**
- C. HTTP
- D. HTTPS

#### Answer: B

Explanation:

SSH is a TCP-based service. A TCP monitor validates service availability without requiring application-layer inspection.

#### NEW QUESTION # 44

Refer to the exhibit.

A BIG-IP Administrator creates a new Virtual Server to load balance SSH traffic. Users are unable to log on to the servers.  
What should the BIG-IP Administrator do to resolve the issue? (Choose one answer)

- A. Set Source Address to 10.1.1.2
- B. Set Destination Address/Mask to 0.0.0.0/0
- C. Set Protocol to UDP
- **D. Set HTTP Profile to None**

#### Answer: D

Explanation:

SSH is a Layer 4 TCP-based protocol that operates on TCP port 22 and does not use HTTP in any capacity. In the exhibit, the Virtual Server is configured with an HTTP Profile applied, which is inappropriate for SSH traffic and causes connection failures. According to the BIG-IP Administration: Data Plane Configuration documentation:

An HTTP profile must only be applied to Virtual Servers handling HTTP or HTTPS traffic.

When an HTTP profile is attached, BIG-IP expects HTTP headers and attempts to parse application-layer data.

Non-HTTP protocols such as SSH, FTP (control), SMTP, and other raw TCP services will fail if an HTTP profile is enabled.

Why the other options are incorrect:

A . Set Protocol to UDP

SSH uses TCP, not UDP. Changing the protocol would break SSH entirely.

B . Set Source Address to 10.1.1.2

The source address setting controls client access restrictions and is unrelated to protocol parsing issues.

C . Set Destination Address/Mask to 0.0.0.0/0

The destination address is already valid for a specific SSH service and does not impact protocol handling.

Correct Resolution:

The BIG-IP Administrator should remove the HTTP Profile (set it to None) so the Virtual Server functions as a pure Layer 4 TCP service, allowing SSH connections to pass through successfully.

#### NEW QUESTION # 45

During a high-demand event, the BIG-IP Administrator needs to limit the number of new connections per second to a Virtual Server.  
What should be applied?

- **A. Connection Rate Limit**
- B. HTTP Compression profile
- C. Connection Limit
- D. OneConnect profile

#### Answer: A

Explanation:

Connection rate limits restrict how many new connections are accepted per second, protecting application resources.

## NEW QUESTION # 46

.....

Actual4test have a professional IT team to do research for practice questions and answers of the F5 F5CAB3 exam certification exam. They provide a very effective training tools and online services for your. If you want to buy Actual4test products, Actual4test will provide you with the latest, the best quality and very detailed training materials as well as a very accurate exam practice questions and answers to be fully prepared for you to participate in the F5 Certification F5CAB3 Exam. Safely use the questions provided by Actual4test's products. Selecting the Actual4test is equal to be 100% passing the exam.

**New F5CAB3 Test Labs:** [https://www.actual4test.com/F5CAB3\\_examcollection.html](https://www.actual4test.com/F5CAB3_examcollection.html)

We have been collecting the important knowledge into the F5CAB3 learning materials: BIG-IP Administration Data Plane Configuration over ten years and the progress is still well afoot, Our F5CAB3 test dumps can certainly assist you to do your real test with full confidence and then you will receive the email to remind you passing actual exams, Once the update comes out, we will inform our customers who are using our F5CAB3 exam bootcamp so that they can have a latest understanding of F5CAB3 actual test.
