What's more, part of that PassExamDumps AIGP dumps now are free: https://drive.google.com/open?id=1wOkt1j-OiQIDk4fWDdAhCOiAvHGZde_q

Well preparation is half done, so choosing good AIGP training materials is the key of clear exam in your first try with less time and efforts. Our website offers you the latest preparation materials for the AIGP real exam and the study guide for your review. There are three versions according to your study habit and you can practice our AIGP Dumps PDF with our test engine that help you get used to the atmosphere of the formal test.

IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.

Topic 2	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Topic 3	<ul style="list-style-type: none"> • Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Topic 4	<ul style="list-style-type: none"> • Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

Visual AIGP Cert Test | Latest AIGP Exam Vce Format: IAPP Certified Artificial Intelligence Governance Professional

When it comes to a swift AIGP exam preparation with the best reward, nothing compares PassExamDumps AIGP dumps. They are made with an aim to provide you the most relevant information and knowledge within a few days and ensure you a brilliant success. Each AIGP ExamDumps is unique and vitally important for your preparation. The work you are supposed to do have already been done by our highly trained professionals.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q95-Q100):

NEW QUESTION # 95

Scenario:

An organization is planning to deploy a new internal application that uses AI to make automated decisions about individuals. This application will process personal information and may affect individuals' access to certain benefits or opportunities.

Which of the following documents must be updated to ensure transparency?

- A. The organization's website privacy notice
- B. The organization's privacy policy
- C. The user privacy notice
- D. The organization's acceptable use policy

Answer: C

Explanation:

The correct answer is D. Transparency obligations under data protection laws, such as GDPR and most AI governance frameworks, require that users whose data is being processed be directly informed.

From the AIGP ILT Guide (Privacy Module):

"The user privacy notice must be updated to explain the nature of automated processing, the logic involved, and the significance and consequences for the data subject." Also, per AI Governance in Practice Report 2024 (Part III):

"Transparency obligations apply throughout the lifecycle of AI... Individuals must be informed about automated decision-making and profiling that may impact them" Unlike internal policies or general privacy notices, the user privacy notice provides direct transparency to the individual data subjects affected by AI processing.

NEW QUESTION # 96

CASE STUDY

Please use the following to answer the next question:

A local police department in the United States procured an AI system to monitor and analyze social media feeds, online marketplaces and other sources of public information to detect evidence of illegal activities (e.g., sale of drugs or stolen goods). The AI system works by surveying the public sites in order to identify individuals that are likely to have committed a crime.

It cross-references the individuals against data maintained by law enforcement and then assigns a percentage score of the likelihood of criminal activity based on certain factors like previous criminal history, location, time, race and gender.

The police department retained a third-party consultant to assist in the procurement process, specifically to evaluate two finalists.

Each of the vendors provided information about their system's accuracy rates, the diversity of their training data and how their system works. The consultant determined that the first vendor's system has a higher accuracy rate and based on this information, recommended this vendor to the police department.

The police department chose the first vendor and implemented its AI system. As part of the implementation, the department and consultant created a usage policy for the system, which includes training police officers on how the system works and how to incorporate it into their investigation process.

The police department has now been using the AI system for a year. An internal review has found that every time the system scored a likelihood of criminal activity at or above 90%, the police investigation subsequently confirmed that the individual had, in fact, committed a crime. Based on these results, the police department wants to forego investigations for cases where the AI system gives a score of at least 90% and proceed directly with an arrest.

What should a police officer explain about the use of the AI system at the time of arrest?

- A. Information about the scoring protocol of the AI system
- B. Information about use of the AI system in prosecuting the case.
- C. Information about how the individual was identified by the AI system.
- D. Information about the public sites surveilled by the AI system.

Answer: C

Explanation:

The officer should inform the individual how the AI system was used to identify them, ensuring transparency about the basis for the arrest decision.

NEW QUESTION # 97

CASE STUDY

Please use the following to answer the next question:

XYZ Corp., a premier payroll services company that employs thousands of people globally, is embarking on a new hiring campaign and wants to implement policies and procedures to identify and retain the best talent. The new talent will help the company's product team expand its payroll offerings to companies in the healthcare and transportation sectors, including in Asia.

It has become time consuming and expensive for HR to review all resumes, and they are concerned that human reviewers might be susceptible to bias.

To address these concerns, the company is considering using a third-party AI tool to screen resumes and assist with hiring. They have been talking to several vendors about possibly obtaining a third-party AI-enabled hiring solution, as long as it would achieve its goals and comply with all applicable laws.

The organization has a large procurement team that is responsible for the contracting of technology solutions. One of the procurement team's goals is to reduce costs, and it often prefers lower-cost solutions. Others within the company deploy technology solutions into the organization's operations in a responsible, cost-effective manner.

The organization is aware of the risks presented by AI hiring tools and wants to mitigate them. It also questions how best to organize and train its existing personnel to use the AI hiring tool responsibly. Their concerns are heightened by the fact that relevant laws vary across jurisdictions and continue to change.

The frameworks that would be most appropriate for XYZ's governance needs would be the NIST AI Risk Management Framework and:

- A. NIST Information Security Risk (NIST SP 800-39).
- B. Human Rights, Democracy, and Rule of Law Impact Assessment (HUDERIA).

- C. NIST Cyber Security Risk Management Framework (CSF 2.0).
- **D. IEEE Ethical System Design Risk Management Framework (IEEE 7000-21).**

Answer: D

Explanation:

The IEEE Ethical System Design Risk Management Framework (IEEE 7000-21) complements the NIST AI Risk Management Framework by addressing ethical considerations in AI system design, fitting XYZ Corp's governance needs for responsible AI hiring tool use.

NEW QUESTION # 98

An EU bank intends to launch a multi-modal AI platform for customer engagement and automated decision-making assist with the opening of bank accounts. The platform has been subject to thorough risk assessments and testing, where it proves to be effective in not discriminating against any individual on the basis of a protected class.

What additional obligations must the bank fulfill prior to deployment?

- A. The bank must obtain explicit consent from users under the privacy Directive.
- **B. The bank must disclose the use of the AI system and implement suitable measures for users to contest automated decision-making.**
- C. The bank must disclose how the AI system works under the EII Digital Services Act.
- D. The bank must subject the AI system an adequacy decision and publish its appropriate safeguards.

Answer: B

Explanation:

Under the EU regulations, particularly the GDPR, banks using AI for decision-making must inform users about the use of AI and provide mechanisms for users to contest decisions. This is part of ensuring transparency and accountability in automated processing. Explicit consent under the privacy directive (A) and disclosing under the Digital Services Act (B) are not specifically required in this context. An adequacy decision is related to data transfers outside the EU (C).

NEW QUESTION # 99

All of the following may be copyright risks from teachers using generative AI to create course content EXCEPT?

- A. Content created by an LLM may be protectable under U.S. intellectual property law.
- B. Generative AI often creates content without attribution.
- C. Generative AI is generally trained using intellectual property owned by third parties.
- **D. Students must expressly consent to this use of generative AI.**

Answer: D

NEW QUESTION # 100

.....

In today's society, our pressure grows as the industry recovers and competition for the best talents increases. By this way the AIGP exam is playing an increasingly important role to assess candidates. Considered many of our customers are too busy to study, the AIGP real study dumps designed by our company were according to the real exam content, which would help you cope with the AIGP Exam with great ease. With about ten years' research and development we still keep updating our AIGP prep guide, in order to grasp knowledge points in accordance with the exam, thus your study process would targeted and efficient.
