

Quiz 2026 High-quality The Open Group OGEA-101: TOGAF Enterprise Architecture Part 1 Exam Updated Testkings

BONUS!!! Download part of Rea4Prep OGEA-101 dumps for free: <https://drive.google.com/open?id=14tY52xqtS3ex2eRO4U9u8ceWi0jmbokH>

Having a general review of what you have learnt is quite necessary, since it will make you have a good command of the knowledge points. OGEA-101 Online test engine is convenient and easy to learn, and it has the testing history and performance review. It supports all web browsers, and you can also have offline practice. Before buying OGEA-101 Exam Dumps, you can try free demo first, so that you can have a deeper understanding of the exam. We have online and offline chat service for OGEA-101 training materials. If you have any questions, you can contact us, and we will give you reply as quickly as we can.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
Topic 2	<ul style="list-style-type: none"> • Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.
Topic 3	<ul style="list-style-type: none"> • ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.
Topic 4	<ul style="list-style-type: none"> • Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.

Topic 5	<ul style="list-style-type: none"> • Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 Exam.
Topic 6	<ul style="list-style-type: none"> • Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.

OGEA-101 Latest Exam Review, Valid OGEA-101 Test Topics

For candidates who are going to buy the OGEA-101 training materials online, they have the concern of the safety of the website. Our OGEA-101 training materials will offer you a clean and safe online shopping environment, since we have professional technicians to examine the website and products at times. In addition, OGEA-101 Training Materials have 98.75% pass rate, and you can pass the exam. We also pass guarantee and money back guarantee if you fail to pass the exam

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q99-Q104):

NEW QUESTION # 99

Refer to the table below:

□ Which ADM Phase does this describe?

- A. Phase G
- B. Phase A
- C. Phase E
- D. Phase F

Answer: A

Explanation:

The table describes the output, outcome, and essential knowledge of an ADM phase that oversees the implementation of changes necessary to reach the adjusted target state. This corresponds to Phase G, also known as Implementation Governance, which ensures that the architecture defined in earlier phases is realized, and it oversees the development and implementation of projects to align with this architecture. The essential knowledge required during this phase includes understanding constraints on the implementation team and adjusting stakeholder priority and preference in response to success, value, effort, and risk of change.

NEW QUESTION # 100

Which statement best summarizes the TOGAF Content Framework?

- A. It is fixed and should not be changed or modified.
- B. It is organized based on the phases of ADM.
- C. It shows the detailed relationships and interactions between information entities.
- D. It provides lifecycle management capabilities to create and manage architectures.

Answer: C

Explanation:

The TOGAF Content Framework defines a set of artifacts, deliverables, catalogs, matrices, and diagrams and describes how they relate to one another (i.e. their relationships and interactions), forming a structure by which architecture work is documented and integrated across domain areas. It captures the information architecture of architecture deliverables. While the Content Framework is

guided by the ADM, it is not rigidly locked to phases but rather describes the content and relationships independent of timing. Its focus is not on process or lifecycle management per se, but on how architectural information is structured, interconnected, and traceable. Thus the best summary is that it shows the detailed relationships and interactions between information entities (artifacts, models, and content elements) across architecture work.

NEW QUESTION # 101

Complete the sentence. The purpose of the Gap Analysis technique is to _____.

- A. identify non-functional requirements for the architecture
- B. determine service levels for the architecture
- C. validate the architecture
- D. establish quality metrics for the architecture

Answer: C

Explanation:

Comprehensive and Detailed Explanation

Gap Analysis is an ADM technique used in Phases B, C, and D of the TOGAF ADM (Business, Information Systems, and Technology Architectures).

Its main purpose is to validate the target architecture by comparing the Baseline Architecture with the Target Architecture and identifying:

- * Gaps (building blocks or capabilities present in the target but missing in the baseline).
- * Overlaps (building blocks duplicated across architectures).
- * Conflicts (inconsistencies between baseline and target).

The output of Gap Analysis provides:

- * A validated Target Architecture.
- * A set of identified gaps that must be addressed by future work packages in Phase E: Opportunities and Solutions.

Therefore, the purpose of Gap Analysis is best expressed as to validate the architecture (Answer D).

Why the other options are incorrect

- * A. Establish quality metrics for the architecture: This is part of performance management and governance, not Gap Analysis.
- * B. Identify non-functional requirements: Non-functional requirements are captured through requirements management and stakeholder analysis, not Gap Analysis.
- * C. Determine service levels: Service levels are typically defined in SLAs and operational models, not through Gap Analysis.

NEW QUESTION # 102

Complete the following sentence. In the ADM documents which are under development and have not undergone any formal review and approval process are _____.

- A. In between phases
- B. Invalid
- C. Called "draft"
- D. Known as "Version 0.1"

Answer: C

Explanation:

In the ADM documents which are under development and have not undergone any formal review and approval process are called "draft". This indicates that they are subject to change and refinement as the architecture development progresses. NEW QUESTION # 103

Consider the following ADM phases objectives.
