

# Reliable FCP\_FGT\_AD-7.6 Test Book - Valid FCP\_FGT\_AD-7.6 Test Blueprint

BTW, DOWNLOAD part of TestPassKing FCP\_FGT\_AD-7.6 dumps from Cloud Storage: [https://drive.google.com/open?id=1j81Vpd\\_8CbcprfkOMNnRAVxltQpTNcN4](https://drive.google.com/open?id=1j81Vpd_8CbcprfkOMNnRAVxltQpTNcN4)

While making revisions and modifications to the Fortinet FCP\_FGT\_AD-7.6 practice exam, our team takes reports from over 90,000 professionals worldwide to make the FCP - FortiGate 7.6 Administrator exam questions foolproof. To make you capable of preparing for the Fortinet FCP\_FGT\_AD-7.6 Exam smoothly, we provide actual Fortinet FCP\_FGT\_AD-7.6 exam dumps.

## Fortinet FCP\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.</li> </ul>

## FCP\_FGT\_AD-7.6 Latest Torrent Pdf & FCP\_FGT\_AD-7.6 Valid Study Vce & FCP\_FGT\_AD-7.6 Updated Torrent

The way to pass the FCP\_FGT\_AD-7.6 actual test is diverse. You can choose the one which is with high efficiency and less time and energy invested to get qualified by FCP\_FGT\_AD-7.6 certification. The FCP\_FGT\_AD-7.6 practice download pdf offered by TestPassKing can give you some reference. You just need to practice with FCP\_FGT\_AD-7.6 Vce Torrent for 1-2 days, then, you can be confident to face the FCP\_FGT\_AD-7.6 actual test with ease mood. The 99% pass rate of FCP\_FGT\_AD-7.6 training vce will ensure you 100% pass.

### Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q49-Q54):

#### NEW QUESTION # 49

Which three strategies are valid SD-WAN rule strategies for member selection? (Choose three.)

- A. Lowest Quality (SLA) with load balancing
- B. Best Quality with load balancing
- C. Lowest Cost (SLA) with load balancing
- D. Manual with load balancing
- E. Lowest Cost (SLA) without load balancing

**Answer: B,C,E**

Explanation:

Lowest Cost (SLA) without load balancing → This is a valid strategy, selecting the path with the lowest cost that meets SLA requirements.

Lowest Cost (SLA) with load balancing → Also valid; it distributes sessions across the lowest-cost links that satisfy the SLA.

Best Quality with load balancing → Valid; it chooses the best-performing link based on SLA metrics such as latency, jitter, and packet loss, while also distributing sessions.

#### NEW QUESTION # 50

Refer to the exhibits. Based on the current HA status, an administrator updates the override and priority parameters on HQ-NGFW-1 and HQ-NGFW-2 as shown in the exhibit.

### Current HA status

```

HQ-NGFW-1 # get system ha status
***
Configuration Status:
  FGVM02TM24013423(updated 0 seconds ago): in-sync
  FGVM02TM24013423 chksum dump: e1 60 2e 42 b8 c1 c6 df 11 34 0c 21 80 79 a4 9f
  FGVM02TM24013501(updated 4 seconds ago): in-sync
  FGVM02TM24013501 chksum dump: e1 60 2e 42 b8 c1 c6 df 11 34 0c 21 80 79 a4 9f
***
number of member: 2
HQ-NGFW-1      , FGVM02TM24013423, HA cluster index = 1
HQ-NGFW-2      , FGVM02TM24013501, HA cluster index = 0
number of vcluster: 1
vcluster 1: work 169.254.0.2
Primary: FGVM02TM24013423, HA operating index = 0
Secondary: FGVM02TM24013501, HA operating index = 1
  
```

### New FortiGate HA configuration

```

HQ-NGFW-1
# config system ha
  set group-id 5
  set group-name "Fortinet"
  set mode a-p
  set password *
  set hbdev "port7" 50 "port8" 60
  set session-pick enable
  set override disable
  set priority 90
  set monitor "port3"

HQ-NGFW-2
# config system ha
  set group-id 5
  set group-name "Fortinet"
  set mode a-p
  set password *
  set hbdev "port7" 50 "port8" 60
  set session-pick enable
  set override enable
  set priority 110
  set monitor "port3"
  
```

What would be the expected outcome in the HA cluster?

- A. HQ-NGFW-1 will remain the primary because HQ-NGFW-2 has lower priority.
- B. The HA cluster will become out of sync because the override setting must match on all HA members.
- C. HQ-NGFW-2 will take over as the primary because it has the override enable setting and higher priority than HQ-

### NGFW-1.

- D. HQ-NGFW-1 will synchronize the override disable setting with HQ-NGFW-2.

**Answer: C**

Explanation:

With override enabled on HQ-NGFW-2 and its higher priority (110 vs. 90), HQ-NGFW-2 will become the primary device, preempting HQ-NGFW-1 despite the current primary status.

### NEW QUESTION # 51

Refer to the exhibit. Which two statements are true about the routing entries in this database table? (Choose two.)

#### FortiGate routing database

```
Local-FortiGate # get router info routing-table database
Codes: K - kernel, C - connected, S - static, R - RIP, B - BGP
       O - OSPF, IA - OSPF inter area
       N1 - OSPF NSSA external type 1, N2 - OSPF NSSA external type 2
       E1 - OSPF external type 1, E2 - OSPF external type 2
       i - IS-IS, L1 - IS-IS level-1, L2 - IS-IS level-2, ia - IS-IS inter area
       V - BGP VPNv4
       > - selected route, * - FIB route, p - stale info
```

Routing table for VRF=0

```
S      0.0.0.0/0 [20/0] via 10.200.2.254, port2, [1/0]
S      *> 0.0.0.0/0 [10/0] via 10.200.1.254, port1, [1/0]
C      *> 10.0.1.0/24 is directly connected, port3
C      *> 10.200.1.0/24 is directly connected, port1
C      *> 10.200.2.0/24 is directly connected, port2
C      *> 172.16.100.0/24 is directly connected, port8
```

- A. The port2 interface is marked as inactive.
- B. All of the entries in the routing database table are installed in the FortiGate routing table.
- **C. The default route on port2 is marked as the standby route.**
- **D. Both default routes have different administrative distances.**

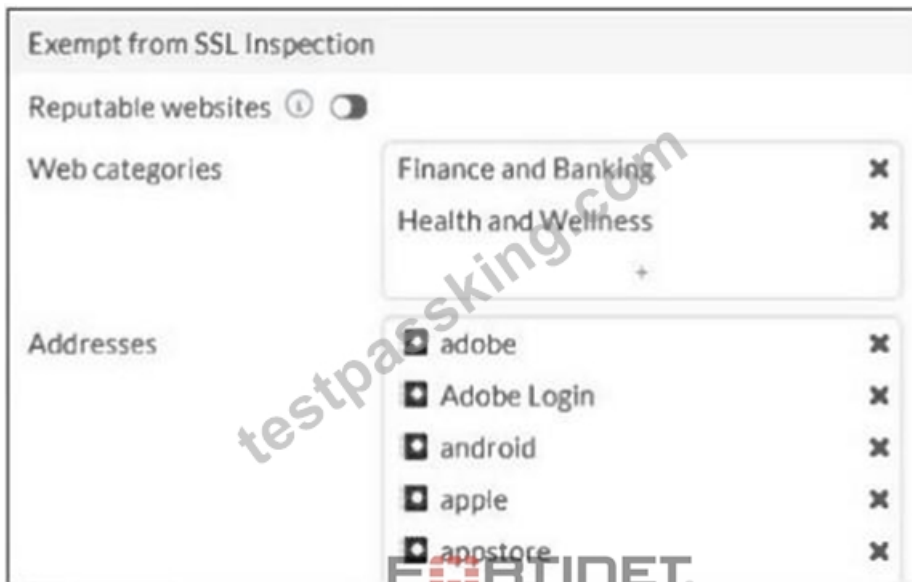

**Answer: C,D**

Explanation:

The default route via port2 has the same prefix as the route via port1 but a higher administrative distance [20/0] vs [10/0] and is not marked with ">" or "\*". This indicates it is kept as a standby/backup route, to be used only if the better route via port1 fails. The two static default routes clearly show different administrative distances in the brackets: [20/0] for port2 and [10/0] for port1, confirming that their administrative distances are different.

### NEW QUESTION # 52

Refer to the exhibit.

The predefined deep-inspection and custom-deep-inspection profiles exclude some web categories from SSL inspection, as shown in the exhibit.

For which two reasons are these web categories exempted? (Choose two.)

- A. The FortiGate temporary certificate denies the browser's access to websites that use HTTP Strict Transport Security.
- B. The legal regulation aims to prioritize user privacy and protect sensitive information for these websites.
- C. These websites are in an allowlist of reputable domain names maintained by FortiGuard.
- D. The resources utilization is optimized because these websites are in the trusted domain list on FortiGate.

**Answer: A,B**

Explanation:

FortiGate's temporary SSL certificate may cause access denial to sites using HTTP Strict Transport Security (HSTS), so such sites are exempted from deep SSL inspection.

Legal regulations require exemption of certain categories to protect user privacy and sensitive information, so these web categories are excluded from SSL inspection.

### NEW QUESTION # 53

Refer to the exhibits. You have implemented the application sensor and the corresponding firewall policy as shown in the exhibits. You cannot access any of the Google applications, but you are able to access [www.fortinet.com](http://www.fortinet.com).

Which two actions would you take to resolve the issue? (Choose two.)

## Application sensor

### Edit Application Sensor

certificate-inspection

- A. Set the action for Google in the Application and Filter Overrides section to Allow.
- B. Change the Inspection mode to Flow-based.
- C. Set SSL inspection to deep-content inspection.
- D. Move up Google in the Application and Filter Overrides section to set its priority to 1.
- E. Add \*Google\*.com to the URL category in the security profile.

**Answer: C,D**

Explanation:

Move up Google in the Application and Filter Overrides section to set its priority to 1.

The "Excessive-Bandwidth" filter has a higher priority (1) and is configured to Block. Because Google applications generate significant bandwidth, they match this rule first and get blocked.

Moving the "Google" filter to priority 1 ensures that the monitor action for Google is applied before the block rule.

Set SSL inspection to deep-content inspection.

Google applications use HTTPS encryption, so the FortiGate cannot identify or control them unless SSL traffic is decrypted.

Changing from certificate-inspection (which only inspects certificates) to deep-inspection allows FortiGate to fully analyze encrypted application traffic and properly apply the Application Control rules.

## NEW QUESTION # 54

.....

One of the most effective ways to prepare for the FCP - FortiGate 7.6 Administrator FCP\_FGT\_AD-7.6 exam is to take the latest Fortinet FCP\_FGT\_AD-7.6 exam questions from TestPassKing. Many candidates get nervous because they don't know what will happen in the final FCP - FortiGate 7.6 Administrator FCP\_FGT\_AD-7.6 exam. Taking FCP\_FGT\_AD-7.6 exam dumps from TestPassKing helps eliminate exam anxiety. TestPassKing has designed this set of real Fortinet FCP\_FGT\_AD-7.6 PDF Questions in accordance with the FCP\_FGT\_AD-7.6 exam syllabus and pattern. You can gain essential knowledge and clear all concepts related to the final exam by using these FCP\_FGT\_AD-7.6 practice test questions.
