What's more, you just need to spend one or two days to practice the C\_BCBAI\_2502 Certification Dumps if you decide to choose us as your partner. It will be very simple for you to pass the C\_BCBAI\_2502 real exam.

### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q20-Q25):

#### NEW QUESTION # 20

What is the primary objective of SAP Responsible Design and Production? Please choose the correct answer.

- A. Manage employee benefits
- B. Automate payroll processing
- C. Enhance customer relationship management
- **D. Support circular economy strategies**

**Answer: D**

Explanation:

SAP Responsible Design and Production is designed to promote sustainable product development and manufacturing, with a focus on circular economy principles. The correct answer is "Support circular economy strategies," as this is the primary objective of the solution.

SAP documentation states: "SAP Responsible Design and Production helps companies design and produce products sustainably by supporting circular economy strategies. It enables organizations to optimize resource use, reduce waste, and integrate sustainability into product lifecycles." This solution supports "tracking material flows, assessing environmental impacts, and ensuring compliance with sustainability regulations," enabling companies to adopt practices like recycling and reuse. For example, it helps manufacturers "design products with end-of-life recycling in mind," aligning with circular economy goals.

The incorrect options are unrelated to SAP Responsible Design and Production. Automating payroll processing is an HR function, typically handled by SAP SuccessFactors. Enhancing customer relationship management is a marketing function, not related to product design. Managing employee benefits is also an HR task. SAP Responsible Design and Production's focus on sustainability, as part of SAP's sustainability portfolio, confirms its role in supporting circular economy strategies.

#### NEW QUESTION # 21

If a company implements SAP's Business AI offerings comprehensively, all things being equal, which bottom-line benefits could they expect? Note: There are 2 correct answers to this question.

- **A. Revenue increase: up to 3.5%**
- B. Revenue increase: up to 1.4%
- **C. Gross profit increase: up to 1.4%**
- D. Gross profit increase: up to 3.5%

**Answer: A,C**

Explanation:

Implementing SAP Business AI comprehensively can lead to significant financial benefits. According to SAP's official documentation, businesses can expect:

- \* An estimated 1.4% increase in gross profits.
- \* An estimated 3.5% increase in revenue.

These figures are based on SAP's analysis of the impact of AI-driven efficiencies and enhancements across various business processes. For instance, a company with €10 billion in revenue could see an annual bottom-line benefit of €141 million and a revenue impact of €352 million.

### NEW QUESTION # 22

Which key advantage does SAP Business AI provide to organizations?

Please choose the correct answer.

Response:

- A. Automated financial accounting processes
- **B. Predictive insights for decision-making**
- C. Isolated data storage without AI integration
- D. Manual business process execution

**Answer: B**

### NEW QUESTION # 23

Which SAP AI solution enables companies to analyze and predict employee attrition rates? Please choose the correct answer.

- A. SAP Intelligent RPA
- **B. SAP SuccessFactors AI**
- C. SAP Conversational AI
- D. SAP Predictive Maintenance

**Answer: B**

Explanation:

SAP SuccessFactors AI is the primary solution for analyzing and predicting employee attrition rates, leveraging AI to enhance HR processes. The correct answer is SAP SuccessFactors AI, as it is specifically designed to provide predictive workforce analytics and talent management insights.

SAP documentation highlights: "AI in human resources involves using artificial intelligence to streamline and enhance HR processes such as recruitment, employee engagement, and performance management. It automates repetitive tasks, analyzes large volumes of data for better decision-making, and offers personalized experiences for employees." Within SAP SuccessFactors AI, predictive analytics are used to "predict employee attrition rates" by analyzing factors like engagement, performance, and career progression. The solution's "talent intelligence hub" enables organizations to identify at-risk employees and implement retention strategies. FC Bayern's use of SAP SuccessFactors AI illustrates how it elevates HR processes by predicting talent needs and improving employee retention.

The incorrect options are not relevant to employee attrition prediction. SAP Intelligent RPA focuses on automating repetitive tasks, not HR analytics. SAP Conversational AI handles natural language interactions, such as chatbots, not attrition analysis. SAP Predictive Maintenance is designed for equipment maintenance in manufacturing, not HR. SAP SuccessFactors AI is the clear choice based on its documented HR-specific AI capabilities.

### NEW QUESTION # 24

A retail business wants to use AI for automating customer support while ensuring personalized customer interactions. Which SAP AI solutions should they implement?

There are 3 correct answers to this question.

Response:

- A. SAP Predictive Analytics
- B. SAP Blockchain for Business
- **C. SAP AI for Customer Experience**
- **D. SAP Conversational AI**
- **E. SAP AI Business Service**

**Answer: C,D,E**
