

# Prepare with updated AACN CCRN-Pediatric dumps - Get up to one year of free updates

P.S. Free & New CCRN-Pediatric dumps are available on Google Drive shared by Prep4sures: <https://drive.google.com/open?id=1Pq41RXALjyfMz8hweLWazjbt2ySSmoCF>

For most people who have no much time to prepare the AACN real exam, latest CCRN-Pediatric exam questions will be your excellent partner to help you get high passing score in the valid test. Once you receive our CCRN-Pediatric Dumps Torrent, it will just need one or two days to practice test questions and answers. If you finished it well, clearing exam will be easy.

AACN CCRN-Pediatric (Critical Care Nursing) Certification Exam is a rigorous assessment designed to evaluate the knowledge, skills, and abilities of nurses who provide critical care to pediatric patients. Critical Care Nursing Exam certification is recognized as a mark of excellence in the field of pediatric critical care nursing and is highly valued by employers, colleagues, and patients alike. Nurses who earn this certification are considered experts in their field and are equipped to provide the highest level of care to the most vulnerable patients.

## CCRN-Pediatric Free Dump Download | CCRN-Pediatric Actual Dump

Our CCRN-Pediatric training materials are famous for the instant download. If you buy from us, you can get the downloading link and password for the CCRN-Pediatric exam dumps within ten minutes after purchasing. In this way, you can just start your learning immediately. What's more, we have online and offline chat service stuff, if you have any questions about the CCRN-Pediatric training dumps, you can ask help from us, and we will give you reply as quickly as possible. We also offer free update for one year if you buy CCRN-Pediatric exam dumps from us.

## AACN Critical Care Nursing Exam Sample Questions (Q85-Q90):

### NEW QUESTION # 85

A nurse is aware that findings would differentiate talipes equinovirus as a true clubfoot from a pseudo- clubfoot. A true clubfoot:

- A. can't be rotated past the midline
- B. has little movement
- C. can be rotated past the midline and returns once released
- D. will be cooler to touch than the other foot

**Answer: A**

Explanation:

Explanation: True clubfoot cannot be rotated past the midline. It is an indication that ligaments, tendons, and bone changes are involved.

#### NEW QUESTION # 86

In an infant with bronchopulmonary dysplasia (BPD), pathophysiologic consequences of chronic hypoxia include:

- A. Decreased pulmonary vascular resistance
- B. Anemia
- C. **Cor pulmonale**
- D. Increased systemic vascular resistance

**Answer: C**

Explanation:

Cor pulmonale refers to right ventricular hypertrophy and failure due to chronic pulmonary hypertension, a known complication of long-standing bronchopulmonary dysplasia (BPD) and chronic hypoxia in infants.

"Chronic hypoxia and pulmonary inflammation in BPD lead to vascular remodeling and increased pulmonary vascular resistance, resulting in right heart strain and cor pulmonale." (Referenced from CCRN Pediatric - Direct Care: Pulmonary, Chronic Lung Disease and Cardiac Effects)

#### NEW QUESTION # 87

High-frequency ventilation improves pulmonary air leaks by:

- A. Increasing the mean airway pressure
- B. Increasing the pressure differential between the airway and the intrapleural space
- C. Decreasing minute ventilation
- D. **Decreasing the pressure differential between the airway and the intrapleural space**

**Answer: D**

Explanation:

High-frequency ventilation (HFV) utilizes very small tidal volumes delivered at rapid frequencies (often greater than 150 breaths per minute), which helps minimize alveolar overdistention and cyclical opening and closing of alveoli-both of which contribute to pulmonary air leak syndromes (e.g., pneumothorax, pulmonary interstitial emphysema).

According to CCRN (Pediatric) - Direct Care (Pulmonary Section):

"HFV is particularly beneficial in managing pulmonary air leaks by stabilizing alveoli with a constant mean airway pressure while using very low tidal volumes, which significantly reduce the pressure gradient between the airways and the surrounding intrapleural space. This promotes healing of alveolar disruptions and prevents further leakage." Therefore, the reduced pressure differential protects fragile alveoli and allows for tissue repair without additional mechanical trauma.

#### NEW QUESTION # 88

Jessica, a 29-year-old mother, tells the nurse that her youngest son who is just 7-months-old can already sit without any support. The nurse should tell the mother that this:

- A. is a behavior which indicates that he is going to walk in the next 3 months.
- B. is an activity that shows the upper 10% of physical development.
- C. could be a developmental delay which needs further evaluation.
- D. **is a developmental milestone that is just expected at his age.**

**Answer: D**

Explanation:

Explanation: Sitting without support is an expected developmental milestone that is expected of a 7-month-old infant. It is done by extending the legs to the side and leaning forward on the hands. After a month, an infant is expected to sit steadily without the use of his hands or mother's support. Sitting alone cannot be a predictor of when the baby will start to walk.

## NEW QUESTION # 89

A nurse is caring for a child who has Trisomy 13. During a morning rounds, the mother asks how her child acquired the syndrome. The nurse's response will be based from the fact that:

- A. it is a chromosomal anomaly.
- B. it is an inherited condition.
- C. it is caused by microorganism
- D. it is a complication of previous exposure to streptococcus

**Answer: A**

Explanation:

Explanation: Trisomy 13 is a genetic disorder in which a person has three copies of genetic material from chromosome 13, instead of the usual two copies.

## NEW QUESTION # 90

.....

“There is no royal road to learning.” Learning in the eyes of most people is a difficult thing. People are often not motivated and but have a fear of learning. However, the arrival of CCRN-Pediatric exam materials will make you no longer afraid of learning. Our professional experts have simplified the content of our CCRN-Pediatric Study Guide and it is easy to be understood by all of our customers all over the world. Just try our CCRN-Pediatric learning braindumps, and you will be satisfied.
