Reliable JN0-336 Braindumps Free, Reliable JN0-336 Cram Materials

They check each Juniper JN0-336 practice test question and ensure the top standard of Security, Specialist (JNCIS-SEC) (JN0-336) exam questions all the time. So you can trust Pass4Test Juniper JN0-336 practice test questions and start Juniper JN0-336 exam preparation with confidence. The Pass4Test is a leading platform committed to making entire Security, Specialist (JNCIS-SEC) (JN0-336) exam preparation simple, quick, and easy for everyone. To fulfill this objective the Pass4Test are offering top-rated and real Security, Specialist (JNCIS-SEC) (JN0-336) practice test questions in three different formats.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q20-Q25):

NEW QUESTION # 20
What information does encrypted traffic insights (ETI) use to notify SRX Series devices about known malware sites?

- **A. domain names**
- B. MAC addresses
- C. certificates
- D. dynamic address groups

Answer: A

Explanation:
Encrypted traffic insights (ETI) uses domain names to notify SRX Series devices about known malware sites. ETI is a feature of the SRX Series firewall that can detect and block malware that is hidden in encrypted traffic. It works by analyzing the domain names of the websites that the encrypted traffic is attempting to access. If the domain name matches a known malware site, ETI will send an alert to the SRX Series device, which can then take appropriate action to block the traffic. ETI is a useful tool for protecting against threats that attempt to evade detection by hiding in encrypted traffic.

NEW QUESTION # 21
Which two statements about unified security policies are correct? (Choose two.)

- A. Unified security policies require an advanced feature license.
- **B. Traffic can initially match multiple unified security policies.**
- C. Unified security policies are evaluated after global security policies.
- **D. APPID results are used to determine the final security policy**

Answer: B,D

NEW QUESTION # 22
Which two statements about SRX chassis clustering are correct? (Choose two.)

- **A. SRX chassis clustering supports active/passive for the control plane.**
- **B. SRX chassis clustering supports active/passive and active/active for the data plane.**
- C. SRX chassis clustering supports active/active for the control plane.
- D. SRX chassis clustering only supports active/passive for the data plane.

Answer: A,B

Explanation:
SRX chassis clustering allows for both active/passive and active/active configurations for the data plane.
In an active/passive setup, one node is active (handling traffic) while the other remains passive (idle and waiting to take over in case of failure). In an active/active setup, both nodes can handle traffic simultaneously, distributing different traffic flows or services between them for load balancing and redundancy.
For the control plane, SRX chassis clustering typically operates in an active/passive mode. This means one node actively handles the control plane responsibilities, such as managing routing tables and maintaining sessions, while the other stands by ready to take over these tasks if the active node fails.

NEW QUESTION # 23

Click the Exhibit button.

```
user@host> show chassis cluster status redundancy-group 1
Cluster: 1, Redundancy-Group: 1
Device name    Priority      Status      Prempt   Manual   failover
node0          0             Secondary   No       No
node1          200           Primary     No       No
```

Which two statements describe the output shown in the exhibit? (Choose two.)

- A. Redundancy group 1 experienced an operational failure.
- B. Redundancy group 1 was administratively failed over.
- C. Node 1 is controlling traffic for redundancy group 1.
- D. Node 0 is controlling traffic for redundancy group 1.

Answer: C,D

Explanation:
The output indicates that node1 has a priority of 200 and is marked as "Primary," which means it is currently the active node controlling traffic for redundancy group 1. The "Primary" status designates that this node is handling the traffic for the specified redundancy group.
According to the exhibit, node0 is listed with a priority of 0 and is marked as "Secondary." This status indicates that node0 is currently not controlling traffic for redundancy group 1, serving instead in a standby role ready to take over should node1 fail or become unavailable.

NEW QUESTION # 24
You want to permit access to an application but block application sub.
Which two security policy features provide this capability? (Choose two.)

- A. APPID
- B. URL filtering
- C. micro application detection
- D. content filtering

Answer: A,C

Explanation:
Micro application detection is a feature that enables more granular control over applications by identifying and taking action on sub-features or specific behaviors within an application. For example, allowing access to Facebook while blocking Facebook Chat.
Application Identification (APPID) is a feature that identifies and controls applications based on their traffic patterns and characteristics. APPID can be configured to recognize not only the main application but also its various subcomponents, allowing for precise control over what is allowed or blocked.

NEW QUESTION # 25
......

For some candidates, a good after-sale service is very important to them, since they may have some questions about the JN0-336 exam materials. We have the both live chat service stuff and offline chat service, if any question that may bother you , you can ask for a help for our service stuff. They have the professional knowledge about the JN0-336 Exam Materials, and they will give you the most professional suggestions.

Reliable JN0-336 Braindumps Free: https://www.pass4test.com/JN0-336.html

Simply make sure your grip on the Juniper braindumps devised the industry's best JNCIS-SECs and get a 100% guaranteed success in Juniper JN0-336 exam, For most people JN0-336 test exam is very difficult because it is high-quality and low pass-rate .As one of most important exam of Juniper, JN0-336 test exam attach great importance from most IT workers, Juniper JN0-336 Latest Test Report We can supply you with 7*24 customer support to settle your questions and will timely deal with your problems after receiving them.

It means not succumbing to the fear and greed **JN0-336 Latest Test Report** that recruiters and others will try to use to take advantage of you, SaaS SharedResponsibility SaaS implementations occur when JN0-336 Questions Exam the vendor provides a
