Never stop challenging your limitations. If you want to dig out your potentials, just keep trying. Repeated attempts will sharpen your minds. Maybe our Plat-Admn-301 study materials are suitable for you. We strongly advise you to have a brave attempt. You will own a wonderful experience after you learning our Plat-Admn-301 Study Materials. Our study materials are different from common study materials, which can motivate you to concentrate on study.

## Salesforce Plat-Admn-301 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Security and Access: This section of the exam measures the skills of Salesforce Administrator and covers how record-level access, field access, and sharing models impact data visibility across the system. It focuses on understanding controlled-by-parent relationships, territory management, role hierarchies, and access to reports, dashboards, and email folders. It also includes comparing custom profiles, permission sets, and delegated administration, along with evaluating different authentication methods. The section also addresses the structure of business models such as person accounts, standard accounts, contacts, and contact-to-multiple-account relationships.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Auditing and Monitoring: This section of the exam measures skills of a Salesforce Support Specialist and covers the tools used to monitor system behavior and review user activity. It includes understanding debug logs, setup audit trail, and methods for ensuring sensitive data is handled correctly in both production and sandbox environments. It also explains how to review and troubleshoot security settings, including recognizing pending updates that might affect system access.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Process Automation:</b> This section of the exam measures skills of Salesforce Consultant and covers choosing the right automation tools to solve complex business problems. It focuses on understanding the capabilities and limitations of declarative tools, identifying the right troubleshooting methods, and applying automation correctly within Salesforce's order of execution. This section emphasizes designing efficient, scalable automation using workflow tools, flows, and other declarative features.</li> </ul>

## Updated Plat-Admn-301 Practice Exam Questions

Software lets you customize your Salesforce Plat-Admn-301 practice exam's duration and question numbers as per your practice needs. You just need an active internet connection to confirm the license of your product. All Windows-based computers support this Salesforce Plat-Admn-301 practice exam software. It is similar to the Salesforce Certified Platform Administrator II (Plat-Admn-301) desktop-based exam simulation software, but it requires an active internet. No extra plugins or software installations are required to take the Salesforce Certified Platform Administrator II (Plat-Admn-301) web-based practice test.

## Salesforce Certified Platform Administrator II Sample Questions (Q80-Q85):

### NEW QUESTION # 80

Cloud Kicks users need to link multiple Case records to multiple Outcome records stored in a custom object. Any user that can view the Case record must be able to create a link. The administrator creates a Case Outcome custom object. What is the recommended option to use when adding a field to Case Outcome?

- A. Master-detail relationship with Read-Only sharing setting.
- B. Lookup relationship with Read-Only sharing setting.
- C. Master-detail relationship with Read/Write sharing setting.
- **D. Lookup relationship with Read/Write sharing setting.**

**Answer: D**

Explanation:

A lookup relationship with Read/Write sharing setting is the recommended option to use when adding a field to Case Outcome custom object. A lookup relationship is a type of relationship that links two objects together and allows users to associate one record with another. A lookup relationship does not affect the security or deletion of either record and can be optional or required. In this case, you can create a lookup relationship field on Case Outcome object that references Case object and allows users to link multiple Case records to multiple Case Outcome records. You can also set the sharing setting for the lookup field to Read/Write, which means that users who have access to the parent record can also access and edit the child record. References: [https://help.salesforce.com/s/articleView?id=sf.relationships\\_lookup.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.relationships_lookup.htm&type=5) [https://help.salesforce.com/s/articleView?id=sf.relationships\\_considerations\\_lookup.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.relationships_considerations_lookup.htm&type=5)

### NEW QUESTION # 81

AW Computing wants to embed a report chart on the Account record page that shows the value of closed sales for that account. The chart should be limited to users in the Sales Manager role on the Account record pages. how should this be accomplished?

- A. Create a new page layout for the Sales Manager role.
- **B. Filter component visibility for the Sales Manager role.**
- C. Filter component visibility for the Account ID.
- D. Create a new report and assign it to the component.

**Answer: B**

### NEW QUESTION # 82

An administrator has a request to write a report listing accounts that have sales from this year and that have a completed activity in the last 30 days.

What reporting feature should the administrator employ to provide only the list of accounts, without listing the details of the opportunities?

- A. Joined Report
- B. Summary Report
- C. Filter Logic
- **D. Cross-Filter**

**Answer: D**

Explanation:

A cross-filter lets you filter records based on related objects and their fields. For example, you can filter accounts that have at least one opportunity from this year and at least one completed activity in the last 30 days. References:

[https://help.salesforce.com/s/articleView?id=sf.reports\\_cross\\_filters.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.reports_cross_filters.htm&type=5)

#### NEW QUESTION # 83

The Cloud Kicks online Lead Intake form was recently updated to allow for new choices on some older picklist fields. The leads are all being created properly in Salesforce, but reps are getting errors as they try to work the leads.

What tool should the administrator use to evaluate what is causing the errors?

- A. Record History
- B. Login History
- **C. Debug Log**
- D. Setup Audit Log

**Answer: C**

Explanation:

Debug Log is a tool that captures information about database operations, system processes, and errors that occur when executing a transaction or running a unit test. Debug Log can help troubleshoot issues related to triggers, workflows, validation rules, or other custom logic by showing the order of execution and the values of variables and expressions

#### NEW QUESTION # 84

How should an administrator ensure the appropriate number of digits are entered into the custom encrypted field created to capture credit card numbers on the Opportunity object?

- A. Define the number of mask characters.
- B. Enter the number of digits at the field level.
- **C. Create a validation rule to ensure the length.**
- D. Use the credit card number mask type.

**Answer: C**

Explanation:

A validation rule is a formula that validates the data entered by a user and prevents the record from being saved if the data does not meet certain criteria. In this case, the administrator can create a validation rule to ensure that the custom encrypted field for credit card numbers has exactly 16 digits. The other options are not applicable for encrypted fields. References:
