MB-500試験の準備方法 | 最新のMB-500試験関連赤本試験 | 認定するMicrosoft Dynamics 365: Finance and Operations Apps Developerテスト難易度

Microsoftの認定資格を取得しようと懸命に努力している方もいらっしゃるかもしれませんが、当然、1つのレベルの重要な指標の1つに対する評価になります。仕事を探すとき、もちろん、多くの会社は、ShikenPASS人事マネージャーがあなたの能力を証明するためにMB-500認定を取得した志願者に何を求めるのか、したがって、私たちが得た知識を証明するために他の方法を使用する必要があります MB-500テスト準備を取得して資格証明書

を取得し、包括的な能力のすべての側面を示すなど、大学で勉強しますMicrosoft Dynamics 365: Finance and Operations Apps Developer試験ガイドは、短期間で完璧に自分を証明するのに役立ちます。そして効率的に。

Microsoft Dynamics 365: Finance and Operations Apps Developer 認定 MB-500 試験問題 (Q71-Q76):

質問 # 71

You are a Dynamics 365 Finance developer. You have two tables as shown in the following exhibit:

You need to configure Table1 to ensure that records cannot be deleted from Table1 if Table2 contains related records. Which value should you use for the OnDelete property?

- A. None
- B. Cascade
- **C. Restricted**
- D. Cascade + Restricted

正解: C

解説:

Example of Restricted

Suppose we have two tables (Customer & Order) and the relation is of One-To-Many i.e. Customer can have many orders.

So on a parent table i.e.(Customer) if I set a delete action property to "RESTRICTED" for Order table. Then If I go and delete the record from a Customer table. It will first check the record in the child table and if exist that warning prompt saying that first we need to delete a record from child table.

Incorrect Answers:

B: Example of Cascade:

Suppose we have two tables (Customer & Order) and the relation is of One-To-Many i.e. Customer can have many orders.

So on a parent table i.e.(Customer) if I set a delete action property to "CASCADE" for Order table. Then If I go and delete the record from a Customer table. It will also delete all the related records in Order table automatically.

C: Example of Cascade + Restricted

Suppose we have three tables (Person ,Customer & Order) Now Person is a parent of Customer table, and Customer is a parent of Order table having (One-To-Many) relations If I set a Delete action property on Person table to "CASCADE" for customer table and If I set a Delete Action property on a CUSTOMER table for Order table to "CASCADE +RESTRICTED".

So if I delete a record from Customer table then It will first check the record in the child table(order table) and if exist that warning prompt saying that first we need to delete a record from child table.

But if I delete a record from Person table it will automatically delete a record in Customer table and all records related to customer table in Order table would also be deleted.

質問 # 72

You need to integrate Dynamics \$65 Finance win the following applications.

Which integration patterns should you use? To answer, drag the appropriate patterns to the correct applications. Each pattern may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

正解:

解説:

Explanation

質問 # 73

You have a table in which multiple properties must be changed. Multiple table properties are locked down at the base table and must not be overwritten.

You need to modify the table properties by extending the table.

Which table property can you populate in a table extension by using the property sheet?

- A. Configuration key
- B. Clustered index
- C. Table group
- D. Created by

正解: D

解説:

Explanation

You can now modify the following properties through the property sheet:

- * Created By
- * Created Date Time
- * Modified By
- * Modified Date Time
- * Country Region Codes

質問 # 74

You are Dynamics 365 Finance and Operations developer.

You need to explain the performance advantages of the different concurrency models.

What are three performance advantages of optimistic concurrency control over pessimistic concurrency control? Each control answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Fewer resources are used to lock records during updates.
- B. Records remain available for other processes while they are selected from the database.
- C. Records are locked for a shorter length of time.
- D. Records are locked as soon as they are retrieved from the database.

正解: A、B、C

解説:

Optimistic Concurrency only locks records from the time when the actual update is performed.

Following are the advantages of using OCC:

Records remain available for other processes to update if they have been selected from the database but haven't yet been updated.

Records are locked for a shorter length of time.

Fewer resources are used to hold the locks during the update process.

Incorrect Answers:

A: Pessimistic Concurrency Control locks records as soon as they are fetched from the database for an update.

質問 # 75

You need to implement the reporting requirements for the Vendor exclusion list.

Which options you should use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

正解:

解説:

☐

Explanation:

SQL Server Reporting Services

Controller class
