Google Associate-Data-Practitioner試験問題集 & Associate-Data-Practitioner受験内容

Googleガイドトレントは、98~100%の合格率と高いヒット率を高めます。弊社のAssociate-Data-Practitionerテストトレントは認定エキスパートを使用し、質問と回答は実際の試験に基づいて入念に選択されます。私たちのAssociate-Data-Practitioner研究急流の言語は理解しやすく、内容は重要な情報を簡素化しました。当社の製品は、機能を強化してAssociate-Data-Practitioner試験、タイミング機能、自己学習および自己評価機能をシミュレートし、学習者がAssociate-Data-Practitionerガイドトレントを簡単かつ便利な方法でGoogle Cloud Associate Data Practitioner習得できるようにします。

Google Cloud Associate Data Practitioner 認定 Associate-Data-Practitioner 試験問題 (Q97-Q102):

質問 # 97

Your team needs to analyze large datasets stored in BigQuery to identify trends in user behavior. The analysis will involve complex statistical calculations, Python packages, and visualizations. You need to recommend a managed collaborative environment to

develop and share the analysis. What should you recommend?

- A. Create a Colab Enterprise notebook and connect the notebook to BigQuery. Share the notebook with your team. Analyze the data and generate visualizations in Colab Enterprise.
- B. Connect Google Sheets to BigQuery by using Connected Sheets. Share the Google Sheet with your team. Analyze the data and generate visualizations in Google Sheets.
- C. Create a Looker Studio dashboard and connect the dashboard to BigQuery. Share the dashboard with your team. Analyze the data and generate visualizations in Looker Studio.
- D. Create a statistical model by using BigQuery ML. Share the query with your team. Analyze the data and generate visualizations in Looker Studio.

正解: A

解説:

Using a Colab Enterprise notebook connected to BigQuery provides a managed, collaborative environment ideal for complex statistical calculations, Python packages, and visualizations. Colab Enterprise supports Python libraries for advanced analytics and offers seamless integration with BigQuery for querying large datasets. It allows teams to collaboratively develop and share analyses while taking advantage of its visualization capabilities. This approach is particularly suitable for tasks involving sophisticated computations and custom visualizations.

質問 #98

You have a BigQuery dataset containing sales data

a. This data is actively queried for the first 6 months. After that, the data is not queried but needs to be retained for 3 years for compliance reasons. You need to implement a data management strategy that meets access and compliance requirements, while keeping cost and administrative overhead to a minimum. What should you do?

- A. Partition a BigQuery table by month. After 6 months, export the data to Coldline storage. Implement a lifecycle policy to delete the data from Cloud Storage after 3 years.
- B. Store all data in a single BigQuery table without partitioning or lifecycle policies.
- C. Set up a scheduled query to export the data to Cloud Storage after 6 months. Write a stored procedure to delete the data from BigQuery after 3 years.
- D. Use BigQuery long-term storage for the entire dataset. Set up a Cloud Run function to delete the data from BigQuery after 3 years.

正解: A

解説:

Partitioning the BigQuery table by month allows efficient querying of recent data for the first 6 months, reducing query costs. After 6 months, exporting the data to Coldline storage minimizes storage costs for data that is rarely accessed but needs to be retained for compliance. Implementing a lifecycle policy in Cloud Storage automates the deletion of the data after 3 years, ensuring compliance while reducing administrative overhead. This approach balances cost efficiency and compliance requirements effectively.

質問 #99

Your organization plans to move their on-premises environment to Google Cloud. Your organization's network bandwidth is less than 1 Gbps. You need to move over 500 TB of data to Cloud Storage securely, and only have a few days to move the data. What should you do?

- A. Connect to Google Cloud using Dedicated Interconnect. Use the gcloud storage command to move the data to Cloud Storage.
- B. Request multiple Transfer Appliances, copy the data to the appliances, and ship the appliances back to Google Cloud to upload the data to Cloud Storage.
- C. Connect to Google Cloud using VPN. Use Storage Transfer Service to move the data to Cloud Storage.
- D. Connect to Google Cloud using VPN. Use the gcloud storage command to move the data to Cloud Storage.

正解: B

解説:

Using Transfer Appliances is the best solution for securely and efficiently moving over 500 TB of data to Cloud Storage within a limited timeframe, especially with network bandwidth below 1 Gbps. Transfer Appliances are physical devices provided by Google

Cloud to securely transfer large amounts of data. After copying the data to the appliances, they are shipped back to Google, where the data is uploaded to Cloud Storage. This approach bypasses bandwidth limitations and ensures the data is migrated quickly and securely.

質問 # 100

Your company uses Looker as its primary business intelligence platform. You want to use LookML to visualize the profit margin for each of your company's products in your Looker Explores and dashboards. You need to implement a solution quickly and efficiently. What should you do?

- A. Create a new dimension that categorizes products based on their profit margin ranges (e.g., high, medium, low).
- **B. Define a new measure that calculates the profit margin by using the existing revenue and cost fields.**
- C. Apply a filter to only show products with a positive profit margin.
- D. Create a derived table that pre-calculates the profit margin for each product, and include it in the Looker model.

正解: B

解説:

Defining a new measure in LookML to calculate the profit margin using the existing revenue and cost fields is the most efficient and straightforward solution. This approach allows you to dynamically compute the profit margin directly within your Looker Explores and dashboards without needing to pre-calculate or create additional tables. The measure can be defined using LookML syntax, such as:

```
measure: profit_margin {  
  type: number  
  sql: (revenue - cost) / revenue ;;  
  value_format: "0.0%"  
}
```

This method is quick to implement and integrates seamlessly into your existing Looker model, enabling accurate visualization of profit margins across your products.

質問 # 101

Your organization stores highly personal data in BigQuery and needs to comply with strict data privacy regulations. You need to ensure that sensitive data values are rendered unreadable whenever an employee leaves the organization. What should you do?

- A. Use dynamic data masking and revoke viewer permissions when employees leave the organization.
- B. Use column-level access controls with policy tags and revoke viewer permissions when employees leave the organization.
- **C. Use customer-managed encryption keys (CMEK) and delete keys when employees leave the organization.**
- D. Use AEAD functions and delete keys when employees leave the organization.

正解: C

解説:

Using customer-managed encryption keys (CMEK) allows you to encrypt highly sensitive data in BigQuery with encryption keys managed by your organization. When an employee leaves the organization, you can render the data unreadable by deleting or revoking access to the encryption keys associated with the data. This approach ensures compliance with strict data privacy regulations by making the data inaccessible without the encryption keys, providing strong control over data access and security.

質問 # 102

.....

私たちに知られているように、当社では世界中で Associate-Data-Practitioner 認定トレーニング資料のベストセラーとアフターサービスがあります。当社は、過去数年にわたり、すべてのお客様に最適で最も適切な Associate-Data-Practitioner 最新の質問を設計するために、この分野で多くの優秀な専門家および教授を採用してきました。さらに重要なことは、当社の Associate-Data-Practitioner トレーニング教材が高品質であることはすべて明白であり、Associate-Data-Practitioner 試験問題の品質が市場の他の学習教材よりも高いことを確認できます。

Associate-Data-Practitioner 試験問題集: <https://www.jpctestking.com/Associate-Data-Practitioner-exam.html>

Google の Associate-Data-Practitioner 試験に合格すればあなたのプロモーションの夢が叶えるかもしれません、我々

のAssociate-Data-Practitioner試験問題集は高い合格率の主な原因で人気を得ていることはよく知られています、Associate-Data-Practitioner試験問題集の迅速で安全な支払い、我々のAssociate-Data-Practitioner最新問題集で真面目に勉強してから、試験に合格しないと、支払い戻しを請求できます、Associate-Data-Practitioner 試験が難しいですが、我々のGoogle Cloud Associate Data Practitioner問題集を利用すれば、あなたは試験に気楽で合格できます、クライアントは、携帯電話、ラップトップ、タブレットコンピューターなどの電子機器で、Associate-Data-Practitioner試験ガイドのAPP /オンラインテストエンジンを使用できます、なんといっても、自分はAssociate-Data-Practitioner学習教材を利用したら、その資料のよさを感じることができます。

俺の手首を力任せに掴み上げると、引きずられるように寝室へと歩き出した、と、呼ばわったそうでございます、GoogleのAssociate-Data-Practitioner試験に合格すればあなたのプロモーションの夢が叶えるかもしれません、我々のAssociate-Data-Practitioner試験問題集は高い合格率の主な原因で人気を得ていることはよく知られています。
