

Get Latest OGEA-103 Test Dumps and High Hit Rate OGEA-103 Reliable Study Questions

The screenshot shows a software interface for the OGEA-103 exam. At the top, it says 'The Open Group OGEA-103 (TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam)'. Below that is a 'Mark Question' button and 'Question 1 of 5'. The question text is 'Consider the following ADM phases objectives.' followed by a table with 4 rows and 2 columns: 'Objective' and 'Description'. The descriptions are: 1. Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan; 2. Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders; 3. Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABIs; 4. Ensure conformance with the Target Architecture by implementation projects. Below the table, it asks 'Which phase does each objective match?' with four radio button options: A. 1F-2G-3F-4F, B. 1E-2F-3E-4G (selected), C. 1G-2E-3F-4E, and D. 1F-2F-3E-4G. Below the options, it says 'Answer: B' and 'Explanation:'. At the bottom, there are buttons for 'Previous', 'Next', 'Show Answer', 'Review', 'Show List', 'Save Session', and 'End Exam'.

Objective	Description
1	Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
2	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
3	Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABIs
4	Ensure conformance with the Target Architecture by implementation projects

Which phase does each objective match?

☐ A. 1F-2G-3F-4F

☒ B. 1E-2F-3E-4G

☐ C. 1G-2E-3F-4E

☐ D. 1F-2F-3E-4G

Answer: B

https://drive.google.com/open?id=1pzmEL6Bi1acZ_OhJB75DnYBEPeDdsm5R

The desktop TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) practice test software is similar to the web-based OGEA-103 format as far as its features are concerned. But it works offline only on the Windows operating system. The offline OGEA-103 practice exam can be taken easily just by just installing the software on your Windows laptop or computer. All three TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) formats of PDFDumps are according to the latest content of the The Open Group OGEA-103 examination.

PDFDumps will give you confidence to pass The Open Group OGEA-103 test. Our Exam Preparation Material provides you everything the candidates will need to get the OGEA-103 certification. Our The Open Group OGEA-103 will provide you with exam questions with verified answers that reflect the actual exam. These questions and answers will help you to do preparation for taking a certification examination. High quality and Value for the OGEA-103 Exam: 100% guarantee to Pass Your The Open Group OGEA-103 exam and get your certification.

OGEA-103 Reliable Study Questions & New OGEA-103 Test Price

Even the fierce competition cannot stop demanding needs from exam candidates. To get more specific information about our OGEA-103 learning quiz, we are here to satisfy your wish with following details. So you can get detailed information with traits and information about our OGEA-103 Real Exam requested on the website. You can free download the demos of our OGEA-103 exam questions and click on every detail that you are interested.

The format of the OGEA-103 Exam is a closed-book, multiple-choice exam that lasts for four hours. OGEA-103 exam is split into two sections, and the passing score for each section is 60%. OGEA-103 exam can be taken at authorized test centers or online. Upon passing the exam, individuals will receive their TOGAF Enterprise Architecture certification, which is globally recognized and highly regarded in the industry.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which phase of the ADM has the purpose to develop an Enterprise Architecture Capability?

- A. Phase A
- B. Phase G

- C. Preliminary Phase
- D. Phase B

Answer: C

Explanation:

According to the TOGAF Standard, 10th Edition, the Preliminary Phase of the Architecture Development Method (ADM) has the purpose to develop an Enterprise Architecture Capability 1. An Enterprise Architecture Capability is the ability of the organization to perform the activities and tasks related to Enterprise Architecture, such as defining the scope, principles, vision, governance, and stakeholders of the architecture. The Preliminary Phase also establishes the architecture framework, the architecture repository, the architecture tools, and the architecture team 1. The other options are not correct, as they have different purposes in the ADM. Phase G: Implementation Governance has the purpose to ensure that the implementation projects conform to the target architecture 2. Phase A: Architecture Vision has the purpose to define the scope, stakeholders, business drivers, and objectives of the architecture project 3. Phase B: Business Architecture has the purpose to describe the baseline and target business architecture, and to identify the gaps between them. Reference: 1: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 6: Preliminary Phase. 2: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 18: Phase G: Implementation Governance. 3: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 12: Phase A: Architecture Vision. : TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 13: Phase B: Business Architecture.

NEW QUESTION # 46

What is an objective of the ADM Preliminary Phase?

- A. To create the initial version of the Architecture Roadmap
- B. To obtain approval for the Statement of Architecture Work
- C. To develop a vision of the business value to be delivered by the proposed enterprise architecture
- D. To select and implement tools to support the Architecture Capability

Answer: D

Explanation:

The Preliminary Phase is the preparatory phase of the Architecture Development Method (ADM) cycle, which sets the context and direction for the architecture work. One of the objectives of this phase is to select and implement tools to support the Architecture Capability, which is the ability of an organization to perform enterprise architecture effectively and efficiently. Tools can include software applications, methods, techniques, standards, and frameworks that assist the architecture development and governance processes. The selection and implementation of tools should be based on the requirements and constraints of the organization, and the alignment with the Architecture Principles and the Architecture Vision³

NEW QUESTION # 47

In which part of the ADM cycle do building block gaps become associated with work packages that will address the gaps?

- A. Phase E
- B. Phases B C and D
- C. Phases G and H
- D. Phases F

Answer: A

Explanation:

In Phase E of the ADM cycle, building block gaps become associated with work packages that will address the gaps. This phase involves creating an Implementation and Migration Plan that defines a set of work packages and Transition Architectures that will deliver the Target Architecture. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.5 Phase E: Opportunities & Solutions.

NEW QUESTION # 48

Please read this scenario prior to answering the question

You are working as the Chief Enterprise Architect within a law firm specializing in personal injury cases. Many of the firm's competitors have improved their litigation strategies, and efficiency by streamlining their processes using Artificial Intelligence (AI).

The CIO has approved a Request for Architecture Work to examine the use of Machine Learning in defining a new AI-driven litigation and finance process for the firm. This process would instruct the lawyers and analysts as to what tasks and portfolio they should work on. The key objectives are to increase task profitability, maximize staff utilization, and increase individual profitability. The CIO has emphasized that the architecture should enable the fast implementation of continuous Machine Learning. The solution will need to be constantly measured for delivered value and be quickly iterated to success.

Some of the partners have expressed concerns about letting the AI make the decisions, others about the risks associated with use of it for the type of service they deliver. The CIO wants to know if these concerns can be addressed, and how risks will be covered by a new architecture enabling AI and Machine Learning.

Refer to the scenario

You have been asked to respond to the CIO recommending an approach that would enable the development of an architecture that addresses the concerns of the CIO and the concerns of the partners.

Based on the TOGAF standard which of the following is the best answer?

- A. You recommend that all possible models be created for each candidate architecture that will enable the AI and Machine Learning solution. This ensures that all the necessary data and detail is addressed. A formal review should be held with the stakeholders to verify that their concerns have been properly addressed by the models. Agility will be considered during Phase G Implementation Governance.
- B. You recommend that an analysis of the stakeholders is undertaken resulting in documenting the stakeholders and their concerns in a Stakeholder Map. The concerns and relevant views should then be defined for each group and recorded in the Architecture Vision document. The requirements will include risk mitigation through regular assessments. This will also allow a supervised agile implementation of the continuous Machine Learning.
- C. You recommend creation of a set of business models that can be applied uniformly across all architecture projects. The stakeholders will be trained to understand the business models to ensure they can see that their concerns are being addressed. Risk will be addressed once the Security Architecture is developed, which will happen later to avoid slowing down the agility required by the CIO.
- D. You recommend that a Communications Plan be created to address the key stakeholders, the most powerful and influential partners. This plan should include a report that summarizes the key features of the architecture reflecting their requirements. You will check with each key stakeholder that their concerns are being addressed. Risk mitigation and agility will be explicitly addressed as a component of the architecture being developed.

Answer: B

Explanation:

A Stakeholder Map is a technique that can be used to identify and classify the stakeholders of the architecture work, and to document their key interests, requirements, and concerns. A stakeholder is any person, group, or organization that has a stake in the outcome of the architecture work, such as the sponsor, the client, the users, the suppliers, the regulators, or the competitors. A Stakeholder Map can help to understand the needs and expectations of the stakeholders, and to communicate and engage with them effectively¹ The steps for creating a Stakeholder Map are:

Identify the stakeholders of the architecture work, using various sources and methods, such as interviews, surveys, workshops, or existing documents.

Classify the stakeholders according to their roles, responsibilities, and relationships, using various criteria and dimensions, such as power, influence, interest, attitude, or impact.

Define the concerns and relevant views for each stakeholder group, using various techniques, such as business scenarios, use cases, or value propositions. A concern is a key interest or issue that is relevant to the stakeholder, such as a goal, a problem, a need, or a risk. A view is a representation of the system of interest from the perspective of one or more stakeholders and their concerns.

Record the stakeholders and their concerns in a Stakeholder Map, which shows the mapping between the stakeholder groups, the concerns, and the views. The Stakeholder Map also shows the dependencies, assumptions, and issues related to each stakeholder and concern.

Therefore, the best answer is B, because it recommends the approach that would enable the development of an architecture that addresses the concerns of the CIO and the partners, using the Stakeholder Map technique. The answer covers the following aspects:

An analysis of the stakeholders is undertaken, which involves identifying, classifying, and defining the stakeholders and their concerns.

The stakeholders and their concerns are documented in a Stakeholder Map, which provides a clear and comprehensive picture of the stakeholder landscape and their interests.

The concerns and relevant views are recorded in the Architecture Vision document, which is the output of Phase A: Architecture Vision of the Architecture Development Method (ADM), which is the core process of the TOGAF standard that guides the development and management of the enterprise architecture. The Architecture Vision defines the scope and approach of the architecture work, and establishes the business goals and drivers that motivate the architecture work. The Architecture Vision also involves obtaining the approval and commitment of the sponsors and other key stakeholders, and initiating the Architecture Governance process² The requirements include risk mitigation through regular assessments, which involves identifying, analyzing, and

evaluating the risks that may affect the architecture, and determining the appropriate measures or actions to prevent, reduce, or mitigate the risks. Risk mitigation can also involve monitoring and reviewing the risk situation, and communicating and reporting the risk status and actions³ This approach also allows a supervised agile implementation of the continuous Machine Learning, which involves applying agile principles and practices to the architecture development and implementation, such as iterative and incremental delivery, frequent feedback, collaboration, and adaptation. A supervised agile implementation can help to ensure the quality, value, and alignment of the architecture, and to respond to the changing needs and expectations of the stakeholders.

NEW QUESTION # 49

Consider the following ADM phases objectives.

	Objective
1	Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value
2	Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D
3	Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
4	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders

Which phase does each objective match?

- A. 1F-2E-3F-4G
- B. 1E-2E-3F-4F
- C. 1G-2E-3F-4F
- D. 1E-2F-3E-4F

Answer: C

NEW QUESTION # 50

.....

As a worldwide leader in offering the best OGEA-103 test torrent, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in OGEA-103 certification training application as well as interactive sharing and after-sales service. As a matter of fact, our company takes account of every client's difficulties with fitting solutions. As long as you need help, we will offer instant support to deal with any of your problems about our OGEA-103 Guide Torrent to help you pass the OGEA-103 exam.
