Free Chrome-Enterprise-Administrator Braindumps | Chrome-Enterprise-Administrator Dumps PDF

We believe you will also competent enough to cope with demanding and professorial work with competence with the help of our Chrome-Enterprise-Administrator exam braindumps. Our experts made a rigorously study of professional knowledge about this Chrome-Enterprise-Administrator exam. So do not splurge time on searching for the perfect practice materials, because our Chrome-Enterprise-Administrator Guide materials are exactly what you need to have. Just come and buy our Chrome-Enterprise-Administrator practice guide, you will be a winner!

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

An organization is deploying 50 new devices which will be managed by a Mobile Device Management solution. Which method should be used to enroll the Chrome browser on those devices into Chrome Enterprise Core?

- A. Use Google Admin to generate an enrollment token and distribute it using mobile device management software
- B. Use Google Admin console bulk enrollment feature to generate a set of unique tokens, and then distribute them via secure file sharing platform

- C. Generate a single device enrollment token and email it to all users, instructing them to enroll their devices individually
- D. Use Google Admin to generate 50 individual device registration keys and distribute them using mobile device management software

Answer: A

Explanation:

The study guide emphasizes using enrollment tokens generated in the Google Admin console for enrolling browsers. When using an MDM solution, the most efficient and recommended method is to generate a single enrollment token and then deploy it to the devices through the MDM software. This allows for automated and scalable enrollment. Bulk enrollment features in the Admin console are typically for direct enrollment, not through MDM. Individual tokens or keys would be inefficient for a large deployment.

NEW QUESTION # 12

To reduce risk, an organization is required to maintain a minimum Chrome browser version. The organization allows updates but finds that not all browsers are within one major version of the stable release.

Which policy option would help an admin enforce Chrome browser updates to the latest major stable version via automatic updates?

- A. Auto-update check period
- B. Relaunch notification
- C. Rollback to target version
- D. Component updates

Answer: A

Explanation:

While not directly stating "enforce to the latest major stable version," the "Auto-update check period" policy, when configured appropriately (shorter intervals), ensures that devices check for and apply updates more frequently. This increases the likelihood of browsers reaching and staying closer to the latest stable version over time. "Rollback to target version" is for reverting updates, "Component updates" manages specific browser components, and "Relaunch notification" prompts users to restart after an update.

NEW QUESTION # 13

The browser administrators at a company have configured the following extension policies:

Policy Name | Policy Value

----- | -----
 ExtensionInstallAllowlist | ["lpbdmphcndlhhacbfcgbdrmnoffaeppii",
 "ghagpmigkmndpbjklmlikibogeofcm", "enebfjpjnlbicamdnfnflaapucdmgkj",
 "hhpkimhnadcdidjaejaegpeeikllochd", "bnpillbeanipnjdkniakhniegbcobanno"] ExtensionInstallBlocklist | []
 ExtensionInstallForceList | ["ghagpmigkmndpbjklmlikibogeofcm":<https://clients2.google.com/service/update2/crx>, "ufrinibicajhgbfhjcgimlmdhccodff",
 [a href="https://clients2.google.com/service/update2/crx">https://clients2.google.com/service/update2/crx(<https://clients2.google.com/service/update2/crx>),
 "hhpkimhnadcdidjaejaegpeeikllochd":<https://clients2.google.com/service/update2/crx>(<https://clients2.google.com/service/update2/crx>)]

An employee at the company wants to install an extension from the Chrome Web Store called "Grammar Friend" with the extension ID 'ufrinibicajhgbfhjcgimlmdhccodff'. What will happen when the user goes to the Grammar Friend page in the Chrome Web Store?

- A. The "Remove from Chrome" button will be available because the extension is already installed.
- B. The "Add to Chrome" button will be available to click, and the user can install the extension.
- C. A red banner that says "Your administrator has blocked this item (ID ufrinibicajhgbfhjcgimlmdhccodff)" will appear, and the "Add to Chrome" button will be grayed out.
- D. A blue banner that says "This item's installation is required by your organization" will appear, and the "Remove from Chrome" button will be grayed out.

Answer: D

Explanation:

The extension ID 'ufrinibicajhgbfhjcgimlmdhccodff' is present in the 'ExtensionInstallForceList'.

Extensions in this list are automatically installed and cannot be removed by the user. Therefore, when the user visits the Chrome Web

Store page for "Grammar Friend," they will see a blue banner indicating that the extension is required by their organization, and the "Remove from Chrome" button will be disabled. The "Add to Chrome" button will not be clickable in the standard way because it's already being force-installed.

NEW QUESTION # 14

An administrator is using Organizational Units (OU) to apply different Chrome browser settings to different types of devices. The administrator needs to ensure that the browsers are placed in the correct OU. Which token must the administrator generate and apply?

- A. Browser Policy Token
- B. Device Management Token
- C. Cloud Management Token
- D. **Enrollment Token**

Answer: D

Explanation:

The **Enrollment Token** is the key to associating a Chrome browser instance with a specific organizational unit (OU) in the Google Admin console during the enrollment process. By applying the correct enrollment token during setup, the browser will be placed in the designated OU and inherit the policies configured for that OU. Device Management Tokens are more relevant for ChromeOS devices. Browser Policy Tokens are not a standard term for OU assignment during enrollment. Cloud Management Token is a general term encompassing the enrollment process.

NEW QUESTION # 15

A browser administrator is looking to deploy Chrome Enterprise Core and build a configuration that supports both managed device browsers as well as managed profiles. Company

- Employees
- Users
- Contractors

If this is the current organizational unit (OU) structure in the Google Admin console, which change should the administrator make to the structure to support the desired use case?

- A. Create a Managed Browsers OU nested under the Users OU
- B. Create a Managed Browsers OU nested under the Employees OU
- C. **Create a Managed Browsers OU nested under the Company OU**
- D. Create a Managed Browsers OU nested under the Contractors OU

Answer: C

Explanation:

To effectively manage both managed device browsers (which apply policies at the device level) and managed profiles (which apply policies at the user profile level), creating a separate OU at the top level (under "Company") or directly under it, specifically for "Managed Browsers," is the recommended approach. This allows for distinct policies tailored to the browser instance, regardless of the user signed in. Nesting under specific user OUs (Employees, Users, Contractors) would complicate the management of shared devices or scenarios where different user types might use the same managed browser.

NEW QUESTION # 16

.....

The number of questions of the Chrome-Enterprise-Administrator preparation questions you have done has a great influence on your passing rate. And we update the content as well as the number of the Chrome-Enterprise-Administrator exam braindumps according to the exam center. As for our Chrome-Enterprise-Administrator Study Materials, we have prepared abundant exercises for you to do. You can take part in the real Chrome-Enterprise-Administrator exam after you have memorized all questions and answers accurately. And we promise that you will get a 100% pass guarantee.

Free Chrome-Enterprise-Administrator Braindumps: https://www.braindumpsit.com/Chrome-Enterprise-Administrator_real-exam.html
