ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which of the following sentences is true?

- A. Modeling the existing original is called prescriptive modeling.
- B. Modeling an original to be created is called descriptive modeling.
- C. All the other options are wrong.
- D. A model is used to increase information in relation to the reality, allowing for a deeper understanding.

Answer: C

NEW QUESTION # 14

All the following are general documentation guidelines, EXCEPT:

- A. Avoid inconsistencies by repeating the same content throughout the document.
- B. Use terms as defined in the glossary.
- C. Structure work products accordingly (e.g., using standard structures).
- D. Select a work product type aligned with the intended purpose.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The handbook recommends choosing documentation forms that match purpose-formal specs for contracts, user stories for agile backlogs, etc.-and encourages consistent structure using standard templates or reference models. It also insists on using glossary terms to prevent ambiguity. However, repeating the same content in multiple places is discouraged because redundancy quickly leads to inconsistencies when updates are made. Instead, authors should reference existing sections rather than duplicate them. Therefore B is not a recommended guideline and is the correct "EXCEPT" option.

NEW QUESTION # 15

Which of the following are NOT categories of validation techniques?

- A. Review techniques
- B. Sample development techniques
- C. Assertive techniques
- D. Evaluation techniques

Answer: C,D

NEW QUESTION # 16

Regarding the influencing factors to consider when configuring an RE process, it is correct to say that:

- A. Complexity requires a more loose, informal RE process to be dealt with.
- B. Experienced requirements engineers do better with a lightweight RE process.
- C. All the other options are wrong.
- D. A tight budget requires a robust RE process to compensate.

Answer: C

NEW QUESTION # 17

Requirements conflict resolution is considered to be part of which major RE task?

- **A. Elicitation**
- B. Management
- C. Documentation
- D. Validation

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the CPRE syllabus, Requirements Engineering comprises four major tasks: elicitation, documentation, validation and management. Elicitation is not just "collecting" requirements; it also includes dealing with conflicts that emerge when different stakeholders express incompatible needs, expectations or priorities. Conflict analysis, negotiation and resolution are therefore components of elicitation activities.

Validation focuses on checking correctness and quality of documented requirements, while management handles versioning, traceability and change control. Documentation is about representing requirements in suitable forms. Thus, conflict resolution is explicitly placed under elicitation.

NEW QUESTION # 18

.....
