Microsoft SC-401 인증시험은 최근 가장 핫한 시험입니다. 인기가 높은 만큼 Microsoft SC-401 시험을 패스하여 취득하게 되는 자격증의 가치가 높습니다. 이렇게 좋은 자격증을 취득하는데 있어서의 필수과목인 Microsoft SC-401 시험을 어떻게 하면 한번에 패스할 수 있을까요? 그 비결은 바로 ExamPassdump의 Microsoft SC-401 덤프를 주문하여 가장 빠른 시일내에 덤프를 마스터하여 시험을 패스하는 것입니다.

Microsoft SC-401 시험요강:

주제	소개
주제 1	Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
주제 2	Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
주제 3	Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

주제 4	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.

IT인증시험이 다가오는데 어느 부분부터 공부해야 할지 망설이고 있다구요? 가장 간편하고 시간을 절약하며 한방에 자격증을 취득할수 있는 최고의 방법을 추천해드립니다. 바로 우리ExamPassdump IT인증덤프제공사이트입니다. ExamPassdump는 고품질 고적중율을 취지로 하여 여러분들인 한방에 시험에서 패스하도록 최선을 다하고 있습니다. Microsoft인증SC-401시험준비중이신 분들은ExamPassdump 에서 출시한Microsoft인증SC-401 덤프를 선택하세요.

최신 Microsoft Certified: Information Security Administrator Associate SC-401 무료샘플문제 (Q206-Q211):

질문 # 206

Hotspot Question

You have a Microsoft SharePoint Online site that contains the following files.

Users are assigned roles for the site as shown in the following table.

Which files can User1 and User2 open? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

정답:

설명:

Explanation:

User1: User1 is a Site Owner, meaning they have full control over all files in the site. Even though File3.docx is blocked by DLP, a Site Owner can override or manage DLP restrictions and still access all files.

User2: User2 is a Site Member, meaning they have standard permissions to view and edit files unless blocked. File1.docx has no DLP action, so User2 can access it. File2.docx is matched by DLP, but it is not blocked, so User2 can still access it. File3.docx is blocked by DLP, which means User2 cannot access it.

질문 # 207

DRAG DROP

You need to create a trainable classifier that can be used as a condition in an auto-apply retention label policy.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

정답:

설명:

Explanation:

To create a trainable classifier that can be used in an auto-apply retention label policy, you need to follow these key steps:

1. Create the trainable classifier

This is the first step where you define the classifier, specifying the types of content it should identify.

2. Test the trainable classifier

Before using the classifier in production, you need to validate its accuracy by testing it against sample documents to ensure it correctly classifies the intended data.

3. Publish the trainable classifier

Once testing is successful, you must publish the classifier so that it can be used in policies like auto-apply retention labels in

Microsoft Purview.

질문 # 208

You have 4 Microsoft 365 E5 subscription that contains two Microsoft SharePoint Online sites named Site1 and Site2. You plan to configure a retention label named Label1 and apply label1 to all the files in Site1. You need to ensure that two years after a file is created in Site1, the file moves automatically to Site2. How should you configure the Choose what happens after the retention period setting for Label1?

- A. Change the label
- B. Deactivate retention settings
- C. Run a Power Automate flow
- D. Start a disposition review

정답: C

질문 # 209

SIMULATION

Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and select the username below.

To enter your password, place your cursor in the Enter password box and select the password below.

Microsoft 365 Username:

admin@WWLx971455.onmicrosoft.com

Microsoft 365 Password: XXXXXXXXXX

If the Microsoft Edge browser or Microsoft 365 portal does not load successfully, select the Microsoft Edge browser icon from the task bar, type the URL "https://admin.microsoft.com", and press Enter.

The following information is for technical support purposes only:

Lab Instance: XXXXXXXXX.

Task 7

You need to create a retention policy that meets the following requirements:

- Applies to Microsoft Teams chats and Teams channel messages.
- Retains items for five years from the date they are created, and then deletes them.

정답:

설명:

Stage 1: Create an adaptive scope

Step 1: Sign into Microsoft Purview compliance portal using credentials for an admin account in your Microsoft 365 organization.

Step 2: In the compliance portal, select Roles and Scopes.

Step 3: Select Adaptive scopes, and then + Create scope.

Step 4: Follow the prompts in the configuration where you'll first be asked to assign an administrative unit. If your account has been assigned administrative units, you must select one administrative unit that will restrict the scope membership. (Does not apply here) If you don't want to restrict the adaptive scope by using administrative units, or your organization hasn't configured administrative units, keep the default of Full directory. (Applies here) Step 5: Select the type of scope, and then select the attributes or properties you want to use to build the dynamic membership, and type in the attribute or property values. Select Add attribute (for users and groups).

For example, to configure an adaptive scope that will be used to identify users in Europe, first select Users as the scope type, and then select the Country or region attribute, and type in Europe:

Step 6: For User Attributes select: Department, is equal to, Sales

Stage 2: Create and configure retention policies

Step 1: From the Microsoft Purview compliance portal, select Data lifecycle management > Microsoft 365 > Retention Policies.

Step 2: Select New retention policy to start the Create retention policy configuration, and name your new retention policy.

Step 3: For the Assign admin units page (skip)

Step 4: For the Choose the type of retention policy to create page, select Adaptive or Static.

Select Adaptive.

We need Adaptive scopes.

Step 5: On the Choose adaptive policy scopes and locations page, select Add scopes and select the one you created in Stage 1.

Step 6: Then, select one or more locations. The locations that you can select depend on the scope types added. For example, if you

only added a scope type of User, you'll be able to select Teams chats but not Teams channel messages.

Select: Teams chat and Teams channel

Step 7: For Decide if you want to retain content, delete it:

Select: On the Decide if you want to retain content, delete it, or both page, select Retain items for a specific period, specify the retention period [specify 5 years], and then for At end of the retention period select Delete items automatically.

Note: We need to retains item for five years from the date they are created, and then deletes them

질문 # 210

You have Microsoft 365 E5 subscription that uses data loss prevention (DLP) to protect sensitive information.

You have a document named Form.docx.

You plan to use PowerShell to create a document fingerprint based on Form.docx.

You need to first connect to the subscription.

Which cmdlet should you run?

- A. Connect-MgGraph
- B. Connect-ExchangeOnline
- C. Connect-SPOService
- **D. Connect-IPSSession**

정답: D

설명:

Currently, you can create a document fingerprint only in Security & Compliance PowerShell, and Connect-IPSSession is how you connect to it.

<https://learn.microsoft.com/en-us/purview/document-fingerprinting#create-a-custom-sensitive-information-type-based-on-document-fingerprinting-using-powershell>

<https://learn.microsoft.com/en-us/powershell/module/exchange/connect-ippsession?view=exchange-ps>
