

# The Open Group OGEA-101 Actualtest - OGEA-101 Valid Exam Sample

BONUS!!! Download part of TestInsides OGEA-101 dumps for free: <https://drive.google.com/open?id=1HIDuJ8o-rSik5Jd6qapv-DcnLVca1T16>

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, our OGEA-101 study materials have been designed to serve most of the office workers who aim at getting a OGEA-101 certification. Our OGEA-101 Test Guide keep pace with contemporary talent development and makes every learner fit in the needs of the society. There is no doubt that our OGEA-101 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 Exam.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.</li></ul>

## OGEA-101 Valid Exam Sample & OGEA-101 Reliable Braindumps Book

Make yourself more valuable in today's competitive computer industry TestInsides's preparation material includes the most excellent features, prepared by the same dedicated experts who have come together to offer an integrated solution. TestInsides's OGEA-101 preparation material includes the most excellent features, prepared by the same dedicated experts who have come together to offer an integrated solution. OGEA-101 Preparation material guarantee that you will get most excellent and simple method to pass your

certification OGEA-101 exams on the first attempt.

## The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q95-Q100):

### NEW QUESTION # 95

In which part of the ADM cycle do building block gaps become associated with work packages that will address the gaps?

- A. Phases F
- B. Phases G and H
- C. Phase E
- D. Phases B C and D

**Answer: C**

Explanation:

The TOGAF ADM uses Gap Analysis during Phases B, C, and D (Business, Information Systems, and Technology Architectures) to identify building block gaps—the differences between the Baseline Architecture and the Target Architecture. However, simply identifying gaps does not complete the process.

The association of gaps with work packages happens later in the cycle:

\* Phase E: Opportunities and Solutions is where the identified gaps are analyzed and translated into work packages, projects, or initiatives that will deliver the required changes.

\* In Phase E, architects also determine whether Transition Architectures are needed, and they generate the initial Architecture Roadmap.

\* This is the phase where gaps become actionable, linked with specific work packages that can be executed to close them.

Phase F (Migration Planning) takes this further by finalizing the roadmap and building the detailed Implementation and Migration Plan, but the initial association of gaps with work packages occurs in Phase E.

### NEW QUESTION # 96

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

\* General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission

\* The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture

\* A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle

\* A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture

Complete the sentence. Deliverable 1 is an output from the \_\_\_\_\_, deliverable 2 can occur \_\_\_\_\_.

- A. Phase A, once an architecture has been defined
- B. Preliminary Phase, at various stages of the ADM
- C. Phase A, in Requirements Management
- D. Preliminary Phase, in Phase E

**Answer: B**

Explanation:

Deliverable 1 refers to Architecture Principles. In TOGAF, Architecture Principles are established as part of the Preliminary Phase, where the enterprise prepares the architecture capability, defines the framework and governance approach, and sets the foundational rules that will guide architecture work. These principles are intended to be enduring and stable, which matches the wording in the question exactly.

Deliverable 2 refers to Architecture Contracts. In TOGAF, Architecture Contracts are formal agreements between development partners and sponsors concerning the deliverables, quality expectations, and fitness-for-purpose of the architecture. These contracts are not limited to a single phase only. They may be initiated and refined at various stages of the ADM, especially wherever there is a need to formalize agreement between architecture and implementation organizations. Although they are strongly associated with implementation governance, the concept is broader and can appear across the ADM lifecycle depending on governance needs. The other answer options are incorrect because Architecture Principles are not outputs of Phase A, and Architecture Contracts are not restricted only to Phase E or Requirements Management. Therefore, the correct completion is that deliverable 1 is from the Preliminary Phase, and deliverable 2 can occur at various stages of the ADM.

### NEW QUESTION # 97

Complete the sentence The purpose of the Preliminary Phase is to \_\_\_\_\_.

- A. describe the target architecture
- B. identify the stakeholders and their requirements
- C. architect an Enterprise Architecture Capability
- D. define the enterprise strategy

**Answer: C**

Explanation:

The purpose of the Preliminary Phase is to architect an Enterprise Architecture Capability that meets the needs and expectations of the enterprise's stakeholders and supports and enables subsequent phases of architecture development and transition. This phase involves defining the scope, principles, framework, and governance for the Enterprise Architecture Capability. Reference: The TOGAF Standard | The Open Group Website, Section 3.2 Preliminary Phase.

### NEW QUESTION # 98

Exhibit

Consider the illustration showing an architecture development cycle Which description matches the phase of the ADM labeled as item 1?

- A. Provides architectural oversight for the implementation
- B. Operates the process of managing architecture requirements
- C. Establishes procedures for managing change to the new architecture
- D. Conducts implementation planning for the architecture defined in previous phases

**Answer: B**

Explanation:

The illustration shows an architecture development cycle based on the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture<sup>1</sup>.

The ADM consists of nine phases, each with a specific purpose and output. The phases are<sup>1</sup>:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

In addition to these phases, there is a central process called Requirements Management, which is labeled as item 1 in the illustration. This process operates throughout the ADM cycle, and its purpose is to manage the architecture requirements throughout the architecture development, ensuring that they are aligned with the business requirements and the stakeholder concerns<sup>2</sup>.

Therefore, the description that matches the phase of the ADM labeled as item 1 is C. Operates the process of managing architecture requirements.

1: The TOGAF Standard, Version 9.2, Chapter 5: Architecture Development Method (ADM)

2: The TOGAF Standard, Version 9.2, Chapter 17: Requirements Management

### NEW QUESTION # 99

Consider the illustration.

What are the items labelled A, B and C?

- A. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture
- **B. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum**
- C. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks
- D. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture

**Answer: B**

Explanation:

The illustration shows the relationship between the Enterprise Continuum, the Architecture Continuum, and the Solutions Continuum, which are key concepts in the TOGAF framework. The Enterprise Continuum is a view of the Architecture Repository that shows how generic foundation architectures can be leveraged and specialized to support the requirements of an individual organization. The Architecture Continuum specifies a structured classification for architectural artifacts, such as models, patterns, and descriptions, that can be reused and adapted across different domains and levels of abstraction. The Solutions Continuum identifies implemented solutions that support various stages of business and IT capability evolution, such as common systems, industry solutions, and organization-specific solutions. The illustration also shows how the architecture context and requirements are influenced by external factors, such as business drivers, stakeholders, and standards, and how they shape the generic and specific architectures and solutions. The illustration also shows how the deployed solutions become part of the architecture context for future iterations of the architecture development cycle. Reference:

\* TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 6: Architecture Repository, Section 6.2

Enterprise Continuum

\* TOGAF Standard, 10th Edition, Part IV: Architecture Content Framework, Chapter 35: Enterprise Continuum and Tools, Section 35.1 Introduction.

### NEW QUESTION # 100

.....

Valid TOGAF Enterprise Architecture Part 1 Exam OGEA-101 test dumps demo and latest test preparation for customer's success. The Open Group offers latest TOGAF Enterprise Architecture Part 1 Exam exam and valid practice questions book to help you pass the TOGAF Enterprise Architecture Part 1 Exam OGEA-101 Exam in your field. The TOGAF Enterprise Architecture Part 1 Exam exam is 365 days updates and true. New OGEA-101 study questions pdf in less time. And TOGAF Enterprise Architecture Part 1 Exam OGEA-101 price is benefit!
