Which two approaches can the developer use to ensure Pricing _Structure__c records are available when the test class is executed? Choose 2 answers

- B. Use without sharing on the class declaration.
- C. Use the Test. leadteat{) method.

This ensures that the test is independent of existing data and can be executed in isolation.
Option B: The@IsTest(SeeAllData=true)annotation allows the test to access existing records in the database, includingPricing_Structure__c. However, this is less recommended as it creates a dependency on existing org data.
Not Suitable:
Option C:Test.loadDatais used to load records from a static resource (CSV) but doesn't suit the requirement directly.
