# Quiz UiPath-ABAv1 - High Pass-Rate Free UiPath Certified Professional Automation Business Analyst Professional v1.0 Exam

Many customers may be doubtful about our price. The truth is our price is relatively cheap among our peer. The inevitable trend is that knowledge is becoming worthy, and it explains why good UiPath-ABAv1 resources, services and data worth a good price. We always put our customers in the first place. Thus we offer discounts from time to time, and you can get 50% discount at the second time you buy our UiPath-ABAv1 question dumps after a year. Lower price with higher quality, that's the reason why you should choose our UiPath-ABAv1 prep guide.

UiPath UiPath-ABAv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Manipulation: String manipulation, array operations, list initialization, dictionary usage, and DataTable operations are discussed in this topic.
Topic 2	• Logging: This topic addresses interpreting robot execution logs and implementing logging best practices during development for effective debugging and analysis.
Topic 3	• Working with Files and Folders: Creating, managing, and iterating through local files and folders are covered here.
Topic 4	• Implementation Methodology: Understanding project implementation stages, interpreting PDDs and SDDs, and conducting peer reviews are discussed here.
Topic 5	• Control Flow: Control Flow activities, workflow types, and Flowchart layouts are discussed here, along with the usage of IF, Flow Decision, Switch activities, While, Do While, and For Each.
Topic 6	• Business Knowledge: This topic focuses on understanding business process automation (BPA) and its value proposition, as well as exploring key concepts related to business processes.
Topic 7	• Integration Service: This topic explains Integration Service, use of integration service connectors, triggers, and the Integration Service Connector Builder.

Topic 8	• PDF Automation: It discusses extracting data from native and scanned PDFs. Moreover, the topic focuses on different techniques for working with PDF documents.
Topic 9	• Workflow Analyzer: This topic covers the use of Workflow Analysis, along with configuring Workflow Analyzer settings.
Topic 10	• Exception Handling: This topic covers using Try Catch, Throw, Rethrow, and Retry Scope activities.
Topic 11	• Object Repository: Creation, publication, and consumption of UI libraries with static and dynamic descriptors are covered in this section.
Topic 12	• Platform Knowledge: It delves into UiPath products and their uses, including Studio types, Robot types, Orchestrator, and Integration Service. Additionally, it discusses the value of components within the UiPath Ecosystem.
Topic 13	• Email Automation: Handling emails via IMAP, POP3, SMTP, and integrating with Microsoft and Gmail are covered in this section. It also discusses the usage of Microsoft 365 and Gsuite packages.
Topic 14	• Studio Interface: Here, the topic covers installing Studio Community Edition, connecting to Orchestrator, and navigating the Studio interface. It also includes explanations of different Studio profiles, management of packages, use of activity project settings, and the use of options in the Studio Backstage view.
Topic 15	• Version Control Integration: It focuses on utilizing Git integration in Studio to add a project, clone a repository is explained, including common Git operations.

Valid UiPath-ABAv1 Exam Online & UiPath-ABAv1 Valid Cram Materials

The Exams is committed to making the UiPath UiPath-ABAv1 exam dumps the best UiPath-ABAv1 exam study material. To achieve this objective the Exams have hired a team of experienced and qualified UiPath UiPath-ABAv1 Exam trainers. They work together and check all UiPath UiPath-ABAv1 exam questions step by step and ensure the top standard of UiPath UiPath-ABAv1 practice test material all the time.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q31-Q36):

NEW QUESTION # 31
What is the order of steps in the Document Understanding processing flow for a generic document?

- A. Digitize, classify, data extraction, data export
- B. Digitize, data extraction, classify, data export
- C. Classify, data extraction, data export
- D. Classify, data export, data extraction

Answer: A

Explanation:
The correct order of steps in the Document Understanding processing flow for a generic document is as follows:
1. Digitize: The first step involves digitizing the document to turn it into machine-readable content.
2. Classify: Next, the document is classified to determine the types of documents found within the digitized file.
3. Data Extraction: After classification, the relevant data is extracted from the document.
4. Data Export: Finally, the extracted data is exported for consumption1.
This sequence ensures that the document is first made readable for the system, then categorized, followed by data extraction, and concluding with the export of the data.

NEW QUESTION # 32
In the PDD, what should a complete Out of Scope section contain?

- A. List of out of scope inputs & outputs
- B. List of out of scope process steps
- C. List out of scope process steps, reason and impact on the to Be process
- D. List of out of scope process steps and inputs

Answer: C

Explanation:
The Out of Scope section of a PDD (Process Definition Document) should include detailed information on processes or sub-processes that are not included in the scope of the RPA (Robotic Process Automation) project. This should not only list the out-of-scope steps but also provide the reasons why they are not included and the impact this exclusion has on the to-be process. Understanding and documenting what is out of scope is crucial for setting clear boundaries and expectations for the project, ensuring that all stakeholders have a common understanding of what the automation will and will not cover.References:https://docs.uipath.com/task-capture/standalone/2022.4/user-guide/details-about-the-pdd

NEW QUESTION # 33
Which of the following can be found in the Process Overview part of the PDD?

- A. Process SME and Process Owner
- B. High Level As-ls Process Map
- C. Applications names and versions
- D. Process schedule and frequency

Answer: B

Explanation:
In the Process Overview part of the Process Design Document (PDD), a high-level As-Is Process Map is included. This part typically encompasses the current state of the process, outlining the steps, decisions, and interactions that occur in the process as it currently exists without automation.
UiPath Documentation on PDD at https://docs.uipath.com/.

NEW QUESTION # 34
As a Business Analyst, what is a recommended action to take once the team has a comprehensive view of the tasks and work towards process automation in an Assisted Task Mining project?

- A. Record and upload all the traces.
- B. Review the merged trace and fill in beneficial details for the larger group.
- C. Request users to record a trace.
- D. Perform the task to be recorded again.

Answer: B

Explanation:
Next Steps After Gaining Comprehensive Task Insights:
After obtaining a detailed view of tasks, the Business Analyst should focus on refining the merged trace to ensure it accurately represents the task. This includes annotating beneficial details to provide clarity for broader use.
Why Option D is Correct:
Reviewing and annotating the merged trace ensures the process documentation is complete, actionable, and aligned with automation goals.
Why Other Options Are Incorrect:
Option A: Re-performing the task is redundant after data has been captured.
Option B: Uploading all traces is not the primary action once a comprehensive view has been achieved.
Option C: Additional recording is unnecessary if sufficient data has already been collected.

NEW QUESTION # 35

When executing test cases during the User Acceptance Testing phase of Automation Implementation and an unexpected scenario arises that was not covered in the initial plan, what should the Business Analyst do?

- A. The Business Analyst must handle this new situation independently, make necessary changes, and ensure that the automation performs as expected in this new scenario.
- B. The Business Analyst should ignore the new scenario as it was not initially included in the UAT plan and focus on the scenarios that were agreed upon.
- C. The Business Analyst should log the new scenario as a deviation, communicate it to the automation implementation team, and together they should decide on how to handle this new situation.
- D. The Business Analyst should escalate the new scenario to the project manager or the testing manager to get a solution instead of working with the automation development team.

Answer: C

Explanation:
During the User Acceptance Testing (UAT) phase, unforeseen scenarios are not uncommon. The Business Analyst (BA) plays a crucial role in ensuring that these scenarios are managed effectively to maintain the integrity and functionality of the automation.
Understand the Role of UAT:
UAT is designed to ensure that the developed automation aligns with the agreed-upon business requirements.
It involves validating both happy path and exception scenarios. Any new scenario not documented in the UAT plan needs to be addressed systematically.
Why Option B is Correct:
Logging the scenario as a deviation ensures transparency and accountability.
Collaborating with the implementation team allows the BA to leverage their technical expertise for a resolution.
This approach ensures that the scenario is evaluated, documented, and potentially included in future testing cycles.
Why Other Options Are Incorrect:
Option A: Handling the situation independently disregards team collaboration, potentially leading to gaps in understanding or misaligned fixes.
Option C: Escalating the issue to the project manager without involving the development team delays resolution and bypasses the experts directly responsible for the automation.
Option D: Ignoring the scenario undermines the purpose of UAT, risking the deployment of incomplete or non-functional automation.
Reference to UiPath Practices:
The PDD and UAT plans emphasize logging deviations and continuously updating documentation during UA.
Change management principles highlight the importance of documenting new requirements and involving the relevant teams.
By logging and addressing deviations collaboratively, the BA ensures the automation solution is robust, efficient, and aligned with business needs.

NEW QUESTION # 36

......

TestPassKing is subservient to your development. And our experts generalize the knowledge of the exam into our products showing in three versions. PDF version of UiPath-ABAv1 exam questions - support customers' printing request, and allow you to have a print and practice in papers. Software version of UiPath-ABAv1 learning guide - supporting simulation test system, and remember this version support Windows system users only. App/online version of UiPath-ABAv1 mock quiz - Being suitable to all kinds of equipment or digital devices, and you can review history and performance better.
