In addition, there are three different versions for all people to choose. According to your actual situation, you can choose the suitable version from our SAFe-SPC study materials.

Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q96-Q101):

NEW QUESTION # 96

Which discipline is necessary for a learning organization?

- A. Continuous Exploration
- B. Design Thinking
- C. Lean budgets
- D. Personal mastery

Answer: D

Explanation:

SAFe draws on Peter Senge's work on learning organizations, which identifies "Personal Mastery" as one of the five disciplines necessary for organizational learning and adaptability. Personal mastery encourages individuals to continually grow, learn, and pursue excellence, making it foundational for a true learning organization.

NEW QUESTION # 97

What is the key reason for deploying each team increment to the production-equivalent staging environment?

- A. Teams can verify whether new functionality or Nonfunctional Requirements are compatible with the current production configuration.
- B. If something goes wrong with the production environment, teams can switch their staging to perform the role of production.
- C. It allows the System Team to test the deployability of the Solution.
- D. It enables SAFe teams to Develop on Cadence and Release Any Time.

Answer: A

Explanation:

Deploying to a production-equivalent staging environment enables teams to validate both new functionality and Nonfunctional Requirements (NFRs) in an environment that matches production. This mitigates risk, uncovers issues early, and ensures that what works in staging will likely work in production.

"Deploying increments to a production-equivalent staging environment ensures compatibility and readiness of both functionality and NFRs before moving to production." (Source: SAFe 6.0 Framework: DevOps and Continuous Delivery; SPC 6.0 Guide "Building Solutions with Agile Product Delivery")

NEW QUESTION # 98

(Select 3) According to Lean thinking, how is fast and sustainable flow achieved?

- A. By constant reduction of delays.
- B. By understanding the full Value Stream
- C. By reducing batch sizes.
- D. By applying subjective governance.

Answer: A,B,C

Explanation:

Lean thinking, which underpins SAFe, emphasizes achieving fast and sustainable flow through:

Understanding the full Value Stream (A): This enables identification and removal of bottlenecks and waste.

Constant reduction of delays (B): Reducing delays improves flow and time-to-market.

Reducing batch sizes (C): Smaller batches move through the system faster, reducing cycle time and increasing feedback.

Applying "subjective governance" (D) is not a Lean principle; governance should be objective and supportive of flow.

"Lean organizations achieve fast and sustainable flow by mapping the Value Stream, reducing batch sizes, and continuously removing sources of delay." (Source: SAFe 6.0 Framework: Lean-Agile Mindset and Principles; SPC 6.0 Guide, "Thriving in the Digital Age and Business Agility")

NEW QUESTION # 99

If all Agile Release Trains in a Value Stream are organized around Capabilities, they don't require cross-train coordination.

- A. True
- B. False

Answer: B

NEW QUESTION # 100

What description best represents Capabilities as defined in SAFe?

- A. Capability is a different name for Features, one that is preferred by some organizations.
- B. Capabilities are simply a level or abstraction above Features, exhibiting largely the same characteristics and practices.
- C. Capabilities are simply a different kind of Epic, exhibiting largely the same characteristics and practices.
- D. Capabilities are simply a level of abstraction above Epics, exhibiting largely the same characteristics and practices.

Answer: B

NEW QUESTION # 101

.....
