EC-COUNCIL 312-38 Exam Sample & Reliable 312-38 Test Simulator

The latest 312-38 dumps pdf covers every topic of the certification exam and contains the latest test questions and answers. By practicing our 312-38 vce pdf, you can test your skills and knowledge for the test and make well preparation for the formal exam. One-year free updating will ensure you get the Latest 312-38 Study Materials first time and the accuracy of our 312-38 exam questions guarantee the high passing score.

EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q147-Q152):

NEW QUESTION # 147

The network administrator wants to strengthen physical security in the organization. Specifically, to implement a solution stopping people from entering certain restricted zones without proper credentials.

Which of following physical security measures should the administrator use?

- A. Mantrap
- B. Fence
- C. Bollards
- D. Video surveillance

Answer: A

Explanation:

A mantrap is a physical security mechanism designed to control access to a secure area through a small space that can only fit one person. It typically consists of two sets of interlocking doors. The first set of doors must close before the second set opens, effectively trapping the individual temporarily. This allows security personnel to verify the person's credentials before granting them access to the restricted zone. Mantraps are particularly effective in sensitive areas where strict access control is required.

References: The concept of a mantrap as a physical security measure is discussed in various security frameworks and guidelines. It is a recognized method for strengthening physical security by controlling individual access to secure areas, as outlined in security best practices and standards¹²³.

NEW QUESTION # 148

What is the IT security team responsible for effectively managing the security of the organization's IT infrastructure, called?

- A. Grey Team
- B. Red Team
- C. Blue Team
- D. Yellow Team

Answer: C

Explanation:

In the context of cybersecurity, the Blue Team refers to the group responsible for defending an organization's IT infrastructure. This team's primary focus is on internal security measures, maintaining defensive protocols, and ensuring that the organization's systems and data are protected against cyber threats. They are tasked with the effective management of security controls, incident response, and the overall maintenance of the organization's cybersecurity posture.

References:

* The Certified Network Defender (CND) course by EC-Council includes modules that cover network security controls, protocols, perimeter appliances, secure IDS, VPN, and firewall configuration, which are all relevant to the functions of a Blue Team.

* The CND curriculum also emphasizes the importance of understanding and responding to cyber threats, which aligns with the Blue Team's role in an organization's IT security framework.

NEW QUESTION # 149

John is a senior network security administrator working at a multinational company. He wants to block specific syscalls from being used by container binaries. Which Linux kernel feature restricts actions within the container?

- A. Cgroups
- B. Userns
- C. Seccomp
- D. LSMs

Answer: C

NEW QUESTION # 150

Chris is a senior network administrator. Chris wants to measure the Key Risk Indicator (KRI) to assess the organization. Why is Chris calculating the KRI for his organization? It helps Chris to:

- A. Identifies adverse events

- B. Facilitates backward
- **C. Notifies when risk has reached threshold levels**
- D. Facilitates post Incident management

Answer: C

Explanation:

Key Risk Indicators (KRIs) are crucial metrics used in risk management to measure the likelihood of potential risks and their impact on an organization. They are designed to provide an early warning signal to notify management when a risk has reached a level that may exceed the organization's risk appetite and could have a profoundly negative impact on its ability to succeed.

KRIs are not typically used to identify adverse events, which is more the role of Key Performance Indicators (KPIs), nor are they used to facilitate backward or post-incident management directly.

Instead, KRIs are forward- looking indicators that help in predicting and preventing risks before they materialize into significant threats.

NEW QUESTION # 151

Which of the following tools is described below? It is a set of tools that are used for sniffing passwords, e-mail, and HTTP traffic. Some of its tools include arpreldirect, macof, tcpkill, tcpnice, filesnarf, and mailsnarf. It is highly effective for sniffing both switched and shared networks. It uses the arpreldirect and macof tools for switching across switched networks. It can also be used to capture authentication information for FTP, telnet, SMTP, HTTP, POP, NNTP, IMAP, etc.

- A. Libnids
- **B. Dsniff**
- C. Cain
- D. LIDS

Answer: B

Explanation:

Dsniff is a set of tools that are used for sniffing passwords, e-mail, and HTTP traffic. Some of the tools of Dsniff include dsniff, arpreldirect, macof, tcpkill, tcpnice, filesnarf, and mailsnarf. Dsniff is highly effective for sniffing both switched and shared networks. It uses the arpreldirect and macof tools for switching across switched networks. It can also be used to capture authentication information for FTP, telnet, SMTP, HTTP, POP, NNTP, IMAP, etc.

Answer option B is incorrect. Cain is a multipurpose tool that can be used to perform many tasks such as Windows password cracking, Windows enumeration, and VoIP session sniffing. This password cracking program can perform the following types of password cracking attacks:

Dictionary attack

Brute force attack

Rainbow attack

Hybrid attack

Answer options D and C are incorrect. These tools are port scan detection tools that are used in the Linux operating system.

NEW QUESTION # 152

.....

Our iPassleader have a lot of IT professionals and the exam practice questions and answers we provide have been certified by many IT elites. Besides, the exam practice questions and answers have wide coverage of the content of the examination and the correct rate is up to 100%. Although there are many similar websites, perhaps they can provide you study guide and online services, our iPassleader is leading these many websites. The reason of making the iPassleader stand out in so many peers is that we have a lot of timely updated practice questions and answers which accurately and correctly hit the exam. So we can well improve the exam pass rate and make the people ready to participate in EC-COUNCIL Certification 312-38 Exam safely use practice questions and answers provided by iPassleader to pass the exam. iPassleader 100% guarantee you to pass EC-COUNCIL certification 312-38 exam.
