One of the key areas tested in the Oracle 1z1-809 Exam is functional programming. This refers to the ability to write code that is more declarative and less imperative, using features such as lambda expressions and streams. 1z1-809 exam also tests your understanding of concurrency and how to write multithreaded code that is safe and efficient. You will also be tested on your knowledge of database connectivity, including JDBC and SQL.

**Given that this exam is at the professional level of certification, candidates have a large amount of work to do. Therefore, the first thing that is recommended is to thoroughly review the complete list of topics available on the official exam page, which includes:**

- **I/O Fundamentals.** It means the skill of reading and writing data from the console.
- **Java Concurrency.** The candidates must be able to create worker threads, as well as to use parallel Fork/Join Framework and parallel Streams.
- **NIO.2, Path Interface, and Files Class.**
- **Advanced Class Design.** Specifically, candidates must demonstrate skills in how to implement encapsulation, polymorphism, and inheritance.
- **Localization.** In particular how to read and set the locale by using the Locale object, to create and read a Properties file, and to build a recourse bundle for each locale.
- **Stream API.** It means the code development that uses optional class, Stream data, and calculation methods in addition to sorting a collection using Stream API.

To apply for this Oracle certification test, you should first pay \$245 for a voucher. After that, go to Pearson VUE and log into your account. Enter the exam code, which should be 1Z0-809, and follow the instructions that will pop up.
